## POWELL BUTTE.

POWELL BUTTE, Dec. 8.—Geo. Elser came home Tuesday from the ditch camp east of Bend where he has been working for the past two months.

Irvin Bros. of the Willamette valley were visitors in this section several days the past week. They were looking for locations and were favorably impressed with possibilities in these parts.

Harvey Harris of Redmond was a business visitor in this locality Tuesday.

Mr. and Mrs. Ed Williams returned Monday from their honeymoon trip to Portland and other valley points and are now located on their Powell Butte farm where they will be at home to their friends.

Mr. and Mrs. A. S. Humphreys and daughter of Parlier, Cal., arrived the fore part of the week with the intention of locating. They are staying at the home of Mr. Humphrey's brother for the present.

A pile of bridge timbers at the river bed crossing would indicate that there is to be a new bridge there.

Miss Poore, a sister of Mrs. J. J. Cnapman, came in from the valley Tuesday and will make a three months' visit with relatives here.

L. Jones, the Prineville sheepman, has bought hay of A. H. Rhode and will winter his large flock of sheep here, herding them on the "desert" during the day and feeding and bedding them at Mr. Rhode's place.

Hobbs Bros. and Dewey Johnson went to Prineville Wednesday where Lee Hobbs and young Johnson were to appear in court as defendants in a case which, upon presentation, was denied a hearing. On their return a most deplorable accident happened to Dewey, who was horseback and in some manner became separated from the others, who were in a hack. The particulars of the matter will probably never be known, but the young man was picked up by some folks in an auto, evidently having been thrown or having fallen from his horse. It is presumed that the animal fell and threw the rider in such a way as to stun him, and the subsequent exposure, together with this injury, are the causes of his continued inability to tell a connected story of the accident.

Mrs. Allen Willcoxon and daughter Harriet left Thursday for Portland where they will join Mr. Willcoxon for a visit with friends. On their way home they will stop over at Hood River for a few days' visit with Mr. and Mrs. E. A. Bussell and family, former residents here.

Miss Mabel Allen was a Prineville visitor Saturday.

Mrs. A. W. Bays returned from Prineville Sunday, where she visited Miss Hazel for several days.

N. P. Alley went to Prineville on Friday and submitted the plans for the Wilson school house to County Superintendent Meyers. The plans were entirely satisfactory with the exception of the windows, Mr. Meyers stating that to comply with the new laws the windows must all be located so the light will come from the left hand side of the pupils. To make this possible it will be necessary to place all the windows in the north side of the house with the exception of the two small ones which will be in the east end of the building. The lumber for this school house is on the ground and work has commenced.

Frank Bailey and sister, Mrs. Zelma Cox, and Miss Eva Hannah of Southern Oregon are visiting at the Geo. Hobbs home. These people are former friends of Mr. Hobbs and will probably remain in this locality for the winter. Mr. Bailey is a mining man and expects to do a little prospecting while here.

The local co-operative weather observer, Earl Saunders, has furnished the following report of the conditions in this locality during November: Mean maximum temperature, 37.7 degrees; mean minimum, 31.72 degrees; mean, 43.2 degrees. The warmest day was the 6th, with 62 degrees registered, and the coldest days were the 3rd and 28th, with 21 degrees recorded. The record shows November to have had 4 cloudy days and 17 partly cloudy, with 9 clear. The total precipitation was 0.45 in.

Geo. Hobbs shipped a car of hogs Tuesday. This is the first car ever billed from the yards in Redmond, the stock in which were owned by one man alone. The carload was billed to Seattle via Portland and the hogs were to be sold at the latter city if the market price was satisfactory. Mr. Hobbs accompanied the shipment.

Mrs. N. P. Alley entertained the

Powell Butte Sosis Wednesday at an all-day session. The ladies tied comforters in the early afternoon following a sumptuous dinner served by the hostess. ## SAMPLE POTATOES WANTED!

MAY HAVE NEW DISEASE  
CORVALLIS, Dec. 8.—In order to ascertain whether the potato disease that recently appeared in this country has gotten into Oregon, the department of plant pathology of the Oregon Agricultural College would like to receive specimens of scabby tubers from every part of the state. The disease under investigation is known as powdery scab and in its early stages is hard to distinguish from common potato scab, although it is much more destructive when developed.

Powdery scab is widely distributed in Europe and is known to be in Eastern Canada, and in Massachusetts and Nebraska. It is likely that its distribution in the United States is more general. Anyone who has used seed potatoes from any of the above named districts or from any recent importations would do well to have this examination made. It costs nothing and may result in checking the disease, should it have reached Oregon.
