Stop the Loss====Fires are Unnecessary

BRICK IS ABSOLUTELY FIRE PROOF IN ANY ORDINARY CONFLAGRATION.

BRICK BUILDINGS NEVER BURN, ALTHOUGH THEY ARE SOMETIMES INJURED BY FALLING TIMBERS OR COMBUSTIBLE INTERIOR WOODWORK.

A BRICK BUILDING IS ABSOLUTELY FIRE PROOF IF WIRE GLASS IS USED IN THE WINDOWS AND IF BURNED CLAY FLOORS ARE USED.

AN INTERIOR FIRE IN SUCH A BUILDING IS CONFINED TO THE ROOM IN WHICH IT ORIGINATES; NO OUTSIDE FIRE CAN ATTACK IT.

THE PROPORTION OF BURNED CLAY IN BUILDING CONSTRUCTION MEASURES ITS FIRE PROOF QUALITIES.

BURNED CLAY IS THE ONLY BUILDING MATERIAL THAT HAS BEEN THROUGH THE FIRE BEFORE YOU GET IT, IN SUCH A MANNER THAT IT WILL RESIST FIRE. ALL COMBUSTIBLE MATERIAL IS BURNED OUT OF THE BRICK BEFORE YOU GET IT.

WHEN YOU BUILD USE BRICK.

International Harvester Oil and Gas Engines

SUCCESSFUL farmers are no longer asking, "Shall I buy an engine?" They have passed that point and now inquire, "Which engine shall I buy?"

A little careful observation will show that International Harvester engines are the most satisfactory. No doubt is left when features like the following are studied: Detachable valve guides, offset cylinder head, fuel pump, split-hub fly-wheels, extra large intake and exhaust valves, etc.

Ask the men who have used I H C engines. That is the best test. They will explain the excellence of I H C construction, simplicity, strength and durability.

Study the engines yourself at the nearest dealer's where International Harvester engines are sold. They are made in all styles, and range in size from 1 to 50-H. P. They operate on low and high grade fuels.

Write for our interesting and instructive catalogues, and when we send them we will tell you where the engines may be seen. A postal will do.
