THE MAY WEATHER

Warmest Day of the Year Came on Sunday.

May ended with the hottest day of the year, the mercury climbing to 88 degrees on Sunday. Several warm days were registered earlier in the month bringing the mean maximum up several degrees higher than in April to 69.9 degrees. The mean minimum was 35.6 degrees and the mean for the month 52.7 degrees.

The lowest temperature for the month was 29 degrees on the night of the 4th.

Little rain fell during May, the total amount being about one and a quarter inches, but what there was came at opportune times serving to break the dry spell that had prevailed for several weeks and greatly improving the situation both for the farmer and the forest officials.
 There were 24 clear days during the month, five partly cloudy and 2 cloudy.

A LETTER FROM MEXICO

Herb Lowell, a Marine at Mazatlan, Writes to Parents Here.

Mr. and Mrs. George Lowell, who live out on the Bend-Burns road, have received an interesting communication from their son Herb, who is a marine on one of the battleships. The letter was written from Mazatlan, on the west coast of Mexico, and dated May 6.

In part the letter is as follows: "We are expecting a great battle tonight. The Rebels are taking Mazatlan and we are only 1000 yards away looking at it through the glasses on our guns and it is wonderful. The Rebels are up on a hill with field pieces firing on the fort and the Federal soldiers return the fire with six-inch guns. But I don't think we will land or do anything. There is a French

ship, a German ship, and a Japanese ship here watching it too. I wish Dad was here to see it, as it is certainly fine."

Mr. Lowell senior is himself a veteran of the Civil War.

SUCCESSFUL farmers are no longer asking, "Shall I buy an engine?"

They have passed that point and now inquire, "Which engine shall I buy?"

A little careful observation will show that International Harvester engines are the most satisfactory. No doubt is left when features like the following are studied: Detachable valve guides, offset cylinder head, fuel pump, split-hub fly-wheels, extra large intake and exhaust valves, etc.

Ask the men who have used IHC engines. That is the best test. They will explain the excellence of IHC construction, simplicity, strength and durability. Study the engines yourself at the nearest dealer's where International Harvester engines are sold. They are made in all styles, and range in size from 1 to 50-H. P. They operate on low and high grade fuels.

Write for our interesting and instructive catalogues, and when we send them we will tell you where the engines may be seen. A postal will do.
