MARKET REPORT.
NORTH PORTLAND, May 6.—The receipts for the week have been: Cattle 975, calves 10, hogs 2138, sheep 2442. With a medium supply on sale the cattle market opened on a good active basis and with prices 10 to 15 cents higher than a week ago. Choice steers are selling around \$7.50 to \$7.90, cows \$6.25 to \$6.60. Swine market opened up with an advance of 10 to 15 cents over the closing of last week's quotation. Several loads at \$8.05 to \$8.10 represented the top of the market, while the bulk went from \$7.80 to \$8. Market steady at close of week. The sheep supply was small and the market quiet. A couple loads of spring lambs went at \$8.25 being the top price paid for that class of stuff. Shorn ewes are quoted at \$5.50 to \$5.75 and yearlings at \$7.

ACT QUICKLY.
Delay has been dangerous in Bend. Do the right thing at the right time. Act quickly in time of danger. In time of kidney danger Doan's Kidney Pills are most effective. Plenty of evidence of their worth. Carl Peetz, W. Main street, Moro, Oregon, says: "For years I had kidney complaint and rheumatic pains. I got so bad that I could hardly walk. I couldn't stoop on account of lameness in my back. The kidney secretions gave me a great deal of annoyance and I had to get up several times at night to pass them. I went to Hot Springs and while I was relieved, the least cold brought the trouble back as bad as ever. One day I read about Doan's Kidney Pills and I began using them. The first box helped me and before long, the backache and kidney weakness left me." At a later date, Mr. Peetz said "When I am in need of a kidney medicine, a few doses of Doan's Kidney Pills always bring benefit." Price 50 cents, at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Peetz had. Foster-McBarn Co., Props., Buffalo, N. Y.—Adv.

CARE OF BLUE GRASS LAWN

By County Agriculturist A. E. LOVETT.

Several persons have inquired regarding the condition of their blue grass lawns in this section, in most instances because of poor growth of grass in spots in the lawn. As with alfalfa and other crops on a desert soil, such as we have here in most sections, it is surprising that we have obtained as good results as we have with these crops and grasses. In practically all cases where lawns have been planted in this section, the seeds have been put into the raw land and in the majority of cases without any addition of manures or humus to the soil. It is not hard to find men in almost any neighborhood who are "cussing" the country because it will not grow better crops; yet these same men know that there is little or no humus in a desert soil such as they are working, and would be surprised in land of this kind produced as this does, were they to find the same in the locality from which they came to this country. Blue grass, as well as the farm crops, must have not only a proper amount of moisture, but also the required amount of plant foods. Any one of these plant foods or moisture being deficient, the crop suffers accordingly. It would be surprising if, taking a raw land which has grown nothing but sage brush for decades, we should find plant foods, etc., in proper proportions and amounts for the growth of any crop we might wish to plant. Then, if we wish to raise a good

lawn, the first thing to do is to prepare the land for that lawn. Add large amounts of barnyard manures to the soil and prepare it as for a garden. Furnish sufficient water at all times and, too, be careful about supplying too much water. If the lawn has grown fairly well for a year or so and then spots appear where the growth is not good, it indicates a lack of necessary foods which may include moisture for those spots. An application of mixed fertilizers especially prepared for lawns will prove beneficial on these spots, and in fact over the entire lawn. The application of fine, well-rotted barnyard manure will prove very beneficial, especially if applied in the fall or early winter. The application of this kind of manure at any time of the year will not injure the lawn. With the application in the fall, the rains and snow will wash the plant food to the roots of the grass and furnish food for its nourishment. If you have these spots in your lawn at the present time, rather than see the grass die you should apply fine and well-rotted barnyard manure at once and water thoroughly whenever water is needed. Although lawns may be helped through this method to an appreciable degree, the best policy is to prepare the land for the grass before planting and any work worth doing at all is worth doing well. A lawn is a permanent crop and deserves very careful preparation before seeding.

A Seventy-Year-Old Couple.
Mr. and Mrs. T. B. Carpenter, Harrisburg, Pa., suffered from kidney trouble for many years but have been entirely cured by Foley Kidney Pills. He says: "Although we are both in the seventies we are as vigorous as we were thirty years ago." Foley Kidney Pills stop sleep disturbing bladder weaknesses, backache, rheumatism and aching joints.
