

## BIG NEW PRESS FOR BULLETIN

PRESENT BUILDING TO  
BE ENLARGED

Modern Machine For High Grade  
Printing and Additional Shop.  
Room Will Shortly Equip Plant  
For Increased Business Here.

While The Bulletin today has a shop well enough equipped to handle almost any sort of printing normally occurring in a town the size of Bend, it is following its policy of trying to keep a little ahead of the trade and is about to make a great improvement in its plant.

A Pony Miehle press, has been purchased and is now in the warehouse. It will be installed as soon as an addition to the present building can be erected to house it and other new equipment. The machine has a press bed of 26x34 inches, and is capable of handling any sort of large job work, such as booklets, two and three color work, large posters and every other kind of high grade printing.

With the new press The Bulletin can effect economies in larger jobs and will be in a position to compete with Portland houses on any kind of printing, as it always has done successfully on smaller work. The Miehle presses are recognized to be the highest type of presses manufactured, and are in use in most of the large printing establishments. The cost of this type of press, now, is about \$1,800. It weighs about 9,000 pounds, and will have a separate electric motor of its own.

Plans are completed for an addition to the present Bulletin building. A new room will be placed on the north end of the present quarters with dimensions of 25x34 feet. The walls will be of brick, with a skylight as well as windows. Beside accommodating the big new press the addition will provide space for the present stapling and punching machines and give ample room for folding and assembling large jobs. Facilities for binding will be added, and new type will reinforce the already large assortment. The present stock room will be moved into the addition providing more space and better lighting in the main shop.

Hereafter the present Babcock cylinder press will be used entirely for printing the newspaper, and will be available for a daily at any time, or for long runs as special editions are desired. In this connection, The Bulletin this summer will issue a large and very comprehensive development number with many illustrations which will be by all odds the most important publication of the kind ever attempted in Central Oregon and will offer an extremely valuable advertising medium.

### BEND DEFEATS REDMOND.

The local nine easily defeated a team from Redmond on Sunday, the score being 11 to 5. Both teams hit the ball easily but the Bend infield kept the runs of the visiting team to a minimum. Games have been arranged with Madras for July 6 and 7, and other games are to be played on the 3rd, 4th, and 5th.

### SHOUSE RECEIVES APPOINTMENT

Word has recently been received of the honor accorded J. B. Shouse, formerly superintendent of schools in this district, in appointment to the professorship of education at the University of South Dakota. Mr. Shouse is a graduate of the university and is at present attending Chicago university where he will receive the Ph. D. degree this summer.

### LAMBERSON-CALDWELL.

H. G. Lambersen and Hazel F. Caldwell, both of Bend, were married by Rev. A. C. Rhoten of Redmond, at Redmond last night. Mrs. S. C. Caldwell and daughter Ruth accompanied them. Mr. and Mrs. Lambersen are living at the Wright for the present, but expect to keep house shortly.

### EAST SIDE PIER

(Continued from page 1.)

down to the point where the bridge contractors take hold.

On the other side of the river the clearing continues, it being the intention of the company to remove all brush which might be a fire danger. In all 65 acres will be cleared at present at the mill site. On the logging road the clearing runs back about three miles and grading will start soon.

The latest new development caused by the mill building is the starting up of the brick yard west of town. A. H. Horn, the owner of the yard, having received a contract for over 700,000 bricks to be delivered at the mill site. Delivery of these bricks was expected to begin today. They will be used for the saw mill power house, the engine and boiler room and the boiler settings. In beginning work at the brick yard again Mr. Horn is employing 25 men.

## During Chautauqua Week

We will put on the best  
reels we have ever shown.

We will run every night and as usual  
have two shows, the second beginning  
at nine o'clock. By attending the second  
show you will be able to go to  
the Chautauqua and attend a good all-  
around picture show. Everybody come

### MORE WATER FIGURES GIVEN

Present Flow at Lava Falls is Lowest Ever Recorded.

Supplementing his statements concerning the water situation reported in The Bulletin last week, Fred F. Henshaw, district engineer water resources branch of the U. S. Geological Survey, stated before leaving town that his measurements at Lava falls showed 1190 second feet to be running the river at the present time. This is lower than the lowest water ever recorded.

The average minimum in June for the past ten years has been 1700 second feet while the lowest minimum recorded was 1430 in 1908. The

same point was reached again in 1914. The flow in June, 1907, was about double that of the present year.

On Tumalo creek the same low water conditions prevail, the flow on Friday of last week being 125 second feet as against 160 second feet average for June. One year, in 1910, the Tumalo showed a lower stage than that at the present time, running only 111 second feet.

### TO APPOINT POSTMASTER.

A post office inspector has been detailed to make an investigation with the view to the appointment of a postmaster at Rivers, Oregon. The office is now vacant due to the resignation of the former incumbent.

### MILL PLEASES GOVERNOR

In Oregonian Interview Putnam Says Development Encouraging.

SALTEM, June 28.—With news of real development in Central Oregon, George Palmer Putnam, secretary to Governor Withycombe, returned to Salem this morning, after leaving the Governor and his party at Bend, whence they proceeded south to Klamath Falls and Crater Lake. The primary purpose of the Central Oregon trip was an examination by members of the Desert Land Board of the Tumalo project, recently completed by the state. It was the first official visit of the Governor and Attorney General Brown.

"The Governor was greatly pleased with the project," said Mr. Putnam. "However, I really believe what pleased him and the other visitors most was the big lumber mill development they found under way at Bend. To come upon the construction of a mill that is costing \$500,000 and will employ 500 men certainly is encouraging."

The mill in question is being constructed by the Shevlin-Hixon Company, which recently acquired the Deschutes pine timber holdings of A. R. Rogers and the Johnson-Prince interests. Already more than 150 men are at work. To reach the mill the railroad is building about a mile of track and placing a large steel bridge over the Deschutes.

### NOTICE OF ANNUAL MEETING.

The annual stockholder's meeting of the Arnold Irrigation Company will be held at the Bend Commercial Club room at 2 p. m. on Thursday, July 15. 17-18c

### WITHYCOMBE INSPECTS TUMALO

(Continued from page 1.)

tained by the Bend commercial Club where President Keyes said a few words of welcome to which Governor Withycombe responded. H. H. De Armond presided. Arriving at Tumalo at noon, after the Grange hall meeting, the visitors found an elaborate luncheon spread in Community hall to which more than 200 sat down. In the speaking which followed, G. P. Putnam acted as toastmaster, introducing V. A. Forbes, Attorney General Brown, Wesley O. Smith, W. C. Wilkes, W. D. Barnes and Governor Withycombe.

The afternoon was spent in an inspection of the project on which the Governor commented enthusiastically saying: "I am more than pleased with the Tumalo project. The work has been well done and it seems to me that the project as the state has built it stands not only as a monument to the efficiency but especially as a more desirable example of the right way to construct irrigation enterprises. If the example set will

## Chautauqua Week Specials

Beginning Friday July 2nd, and ending Wednesday July 7th, I will put on sale a SPECIAL ARTICLE each day. It will be something special each day, and to be sure of getting the benefit of this sale you should come in every morning and see what is on sale.
