

# CREW FINISHES DIVERSION JOB

## CRATER CREEK WORK IS DONE

### Flow of Two Streams Turned Into Tumalo Drainage Basin—Irrigation Will be Aided and Help Given Repairing Reservoir Leaks

The work of diverting Crater creek into the Tumalo drainage basin has been completed and its waters are now flowing into Tumalo creek, providing additional resources for irrigation and helping to repair the leaks in the Tumalo reservoir. The work has been done well within the estimated cost.

The protest of the Central Oregon Irrigation Company against the diversion of the water to the Tumalo, presented to the Desert Land Board at the same meeting at which an extension of its contract on the North Canal lands was sought, has been put on file by the board. This is the report brought from Salem by John Dubois, engineer-inspector of the board who arrived in Bend on Saturday on his way to inspect the Crater creek work.

William Brown has been in charge of the Crater creek camp having under him an average of 30 men. Assisting him have been Alfred Hansen, who has supervised the concrete and flume work, and H. S. Hutchins, who had charge of the teams. The work was begun on July 22 and on Saturday noon water from the first creek was turned into the Tumalo, the diversion of the second being completed and the water turned in Monday night. The last of the crew is expected to arrive back at Tumalo today.

Money for the work was provided by a loan from the State Land Board on improved Tumalo project lands, made possible largely through the confidence in these lands held by Governor Withycombe.

On account of the lateness of the season and the altitude of the diversion it is not expected that the results of the work will be noticeable this season, Crater creek being fed wholly by glaciers and there being no run off except during the heat of the day. During June, July and August the run off is large and uniform. During the irrigation season a patrolman will be stationed on the creek for whose use a small log cabin has been built by a crew under the supervision of B. C. Cady.

With the flow from this diversion it is expected that there will never be any shortage of water on the Tumalo project even in years like the present when all projects have noted a deficiency due to the lack of snow fall last winter.

## ROAD WORK IS PLANNED

### Fund Raised for Bend-Burns Route—County Helps the Project.

As a result of a movement initiated by P. B. Johnson of Millican funds have been raised to be spent in removing rock and otherwise improving the Bend-Burns road. The County Court has duplicated the amount subscribed and a day will be announced in the near future when the work will be done.

- Subscribers to the work are as follows:
- L. E. Kilgore, Sink, Ore. .... \$2.50
  - Albert Reichel, Bend ..... 2.50
  - Glen O. Powers, Bend ..... 2.50
  - Furst Bros., Bend ..... 2.50
  - A. B. Cooley, Burns ..... 2.50
  - V. B. Gray, Bend ..... 2.50
  - Farris & Linstor, Bend ..... 2.50
  - Jay Saltzman, Bend-Burns ..... 2.50
  - Geo. S. Roberts, Millican ..... 2.50
  - Firat National Bank, Bend ..... 5.00
  - Bend Flour Mill Co. .... 5.00
  - A. L. Mackintosh, Bend ..... 5.00
  - Patterson Drug Co., Bend ..... 2.50
  - R. M. Smith Clo. Co., Bend ..... 2.50
  - Bend Hardware Co. .... 5.00
  - E. A. Sather, Bend ..... 5.00
  - O. A. Thorson, Bend ..... 1.00
  - Mannheimer Bros. .... 2.00
  - W. C. McCuiston ..... 2.00
  - E. M. Thompson ..... 1.00
  - United Warehouse Co. .... 5.00
  - Owl Pharmacy ..... 2.50

  - The Bend Bulletin ..... 2.50

## BOARD ALLOTS WATER

### Portland Irrigation Company Gets Two Acre Feet At Paisley. (Oregon Journal.)

SALEM, Sept. 2.—The right of the Chewaucan Land and Cattle Company to prevent the Portland Irrigation Company from getting a water supply for its irrigation project was lost before the state water board, it developed today, when announcement was made of the adjudication of the waters of the Chewaucan river. Though the board held that the cat-

the company had the first right to the waters of the Chewaucan river, and the Portland Irrigation Company's right was subsequent, it limited the cattle company to two acre feet of water. Instead of the five demanded.

The Portland Irrigation Company was given two acre feet of water on condition that it construct a reservoir of sufficient capacity to supply the amount of water allotted and complete the entire system within the time limited in the contract with the state.

The adjudication involves the cattle company's 23,000 acres, 12,000 acres in the Portland company's segregation, and between 5,000 and 6,000 acres owned by others.

## BRIDGE IS DONE

### Plans Now Call For Sidewalks And Water in Boulevard.

With the new bridge over the river near the Boy Scout's lodge at the foot of California street, completed, The Bend Company is now preparing to build sidewalks in Boulevard addition and make other improvements in anticipation of a brisk sale of the property.

The bridge is about 250 feet long and was built under the direction of M. J. Danielson, who also built the logging pond dam for the new saw mill companies. As an approach on the west side of the river a walk will be built from the foot of California street down to it.

According to D. E. Hunter, real estate manager of The Bend Company, arrangements are now being made to lay water mains in the main streets of the addition.

## CHARLIE CHAPLIN CORRALLED

The management of the Bend Theatre has obtained "Tillie's Punctured Romance" for Thursday evening. This six-reel comedy made Charlie Chaplin famous as a reel comedian. Marie Dressler, well known as one of the greatest comedienne on the stage, plays opposite Chaplin. No picture has ever provoked more laughs. In the coming six weeks a number of New York successes will be shown at the Bend. They are: Emma Dunn, in "Mother;" Tom Wise in "A Gentleman From Mississippi;" Clara Kimball Young in "Lola" and "Deep Purple;" Vivian Martin, in "Wishing Ring;" Lew Fields in "Old Dutch;" Lillian Russell in "Wildfire," and Robert Warwick in "Alias Jimmy Valentine."

# FIRE DANGER IS LESSENERD

## RAIN NOW WILL MEAN SAFETY

### Flames Burn 8000 Acres of Yellow Pine Last Week—70 Men Were Employed—Negligence Is Believed to Have Been Cause.

If a certain combination of the elements can prevail upon Jupiter Pluvius now, local forest officials will not be troubled for the remainder of the year with forest fires. All fires are out, according to M. L. Merritt, Supervisor of the Deschutes National Forest, and unless something unforeseen occurs, there will be no more fire damage this year. The cold nights and the cool days combine to lessen the danger in the forests.

During the last fire season between 50 and 55 fires of varying magnitude have been reported to the local forest office and extinguished. The most damaging of all those in the Deschutes National forest this season was the one reported August 29 near the south ice cave. This fire, believed to have been started through the carelessness of tourists, burned over an area of 8,000 acres before it was extinguished. Some of the highest grade yellow pine in the forest was burned and considerable personal property of settlers was destroyed.

The forest officials are led to believe that the fire started through negligence of travelers, basing their conclusions upon the place and nature of its origin. The fire started near the main road. Spontaneous combustion was impossible, say the forest officers, in that particular place and there was an absence of electrical storms. The fire burned over an area of 100 acres in less than 30 minutes. More than 70 men were engaged in fighting the fire, which was quelled late last week.

The fire at La Pine, although not in the national forest, burned over a large area, but the timber was not so valuable as that burned in the forest reserve.

From Agent O.W.R. & N.

If it's a surface to be painted, enameled, stained, varnished or finished in any way, there's an Acme Quality Kind to fit the purpose.

# 5 Strong Reasons for Fall Painting

- The wood is thoroughly dry. *Summer's sun has removed all moisture.*
- Paint penetrates deeper into dry wood. *The deeper it goes the better it holds.*
- Fall weather is warm, dry and dependable. *Little danger of cold, damp, rainy days, which endanger the durability of the paint.*
- Wet weather decays and destroys unprotected surfaces. *Lack of paint means unsightly and less valuable property.*
- Fall painting keeps out winter moisture. *The greatest enemy to the life and beauty of all structures.*

Ask us about ACME QUALITY HOUSE PAINT. It insures the greatest protection and beauty, at the least cost per year of service. Questions cheerfully answered.
