

BEND SMOTHERS REDMOND 39-0

LOCAL TEAM PLAYS GOOD FOOTBALL

Visitors Were Outclassed in Every Department of Saturday's Game—Home Eleven Uses Forward Pass Handily and Rips up Line.

The Redmond high school football team was easy picking for the Bend high school eleven Saturday on the local field and went down to defeat to the tune of 39 to 0. At no stage of the game did Redmond have any chance to score, while, apparently the visitors were afflicted with paralysis when Bend flashed the forward pass, tearing off from 15 to 50 yards at a crack.

Bend kicked off to Redmond, who lost the ball on its own 40 yard line. Bend opened up with two clean cut passes and it was six minutes from the time that Referee Erskine's whistle blew that Gorton had the oval across the line for Bend's initial touchdown of the year. Hunnell failed to kick goal. Score, Bend 6, Redmond 0. Bend kicked off to Redmond's 20 yard line. Young intercepted a pass and a long pass, Young to Grube and a right end run by Hunnell, brought the ball behind Redmond's goal five minutes after the first touchdown. The first quarter ended 13-0 in favor of Bend.

Forward Pass Effective.

In the second quarter Bend kicked off to Redmond's 15 yard line and the ball was brought back 30 yards. Here Redmond showed a flash, using the forward pass handily. Johnson to Stenkoph, and bringing the ball to Bend's 20 yard line. A pass, Johnson to Stenkoph failed, and Bend, in possession of the ball, started a march for Redmond's goal. In the center of the field Young shot a high long pass to Grube who tore off 40 yards to a touchdown. Hunnell kicked goal. Score, Bend, 20, Redmond 0.

On Bend's kick-off, Redmond advanced the ball 50 yards in a pretty broken field sprint by Duval, Redmond's left half, but lost the ball on downs. Brandenburg, Bend's captain and star half back, here went into the game with a lame shoulder, and in two minutes after he had planted his feet into the ground, he ran 65 yards in a broken field and tucked the ball safely behind Redmond's goal posts. Hunnell kicked goal. Score: Bend 27, Redmond 0.

Touchdowns Come Easy.

In the second half Redmond kicked to Bend, who brought the ball to Redmond's 20 yard line. Two clean passes, one to the right end and one to the left end, brought the ball to the 15 yard line. Two bucks by Gorton and Young brought the ball across the line. Hunnell failed to kick goal. Score: Bend 33, Redmond 0.

Here Redmond began to come back stronger, tearing off 20 and 30 yards on line bucks, and it began to look as though the Redmond beef was beginning to tell on their lighter adversaries, but this advance was broken up when Grube intercepted a pass. Two more clean cut passes from Johnson to Grube netted 50 yards and brought the ball to Redmond's one foot line. The quarter ended with the ball in that position and at the opening of the next quarter Hunnell carried it across in one buck. He failed to kick goal. The game ended with the ball in Bend's possession on Redmond's seven yard line. Final score: Bend 39, Redmond 0.

Young and Gorton Star.

Despite the big score the game was marked by brilliant flashes by both teams. The feature of the game was the work by Young at full back for Bend and the handling of the passes by Grube at right end. The duo worked like high school veterans and smothered the Redmond secondary defense with their fast play.

Redmond's weakest spot was in the line. Bend repeatedly punctured it for long gains. The backfield, despite its weight and speed, was unable to get away from the Bend ends. Duval, at left half, Jackson at full and Stenkoph were responsible for most of Redmond's gains. For Bend, Young at fullback, Grube at right end and Boyd at tackle starred for Bend. Jackson played a fast, heady game at quarterback. The Bend team played a 200 per cent better game Saturday than it did against Prineville the preceding Sunday. The lineup has been greatly strengthened and the team is working faster and more steadily.

Bend will play a return game next Saturday at Redmond and Prineville at Bend on November 20.

True Blue Flour has been a larger seller than any month before. The whiteness, purity, excellence and the acme of good milling makes it a large repeater.—Adv.

Farmers' Meetings and Courses at O. A. C.

By A. E. LOVETT, County Agriculturist. The Agricultural College is the farmer's school. Those who have gone into business for themselves and have families to support can not usually take advantage of a four or a two years' course, but the Oregon Agricultural College has prepared a special short course for farmers, and these will prove of great value to all who can take advantage of them. To those who can spare eight or nine months from the farm, the one year course in agriculture will prove of especial value. This course is also a very good one for the young man or woman who feels that they can not afford a four years' course.

Of especial value to farmers is the "farmer's week" short course, which this year will be held the week beginning January 3rd. The regular school is closed at this time and the entire staff of teachers and experi-

mentation officers is given over to lectures and demonstrations for the benefit of the farmers in attendance. There were last year 2,106 farmers in attendance. A much larger attendance is expected this year. There should be several in attendance at this course from Crook county.

Another meeting of importance to farmers interested in fruit growing is that of the State Horticultural Society, which meets November 16th to 18th. Crook county is not, of course, a commercial fruit growing section, but there are many who are growing home orchards to whom this meeting would prove a benefit. At this meeting, there will be given lectures and demonstrations on pruning and care of orchards.

I am a firm believer in farming as a business, and in that business must be included a study of all of the phases appertaining thereto. I should like to see a large number of our farmers take advantage of these courses and meetings.

The New Bend Flour Mill Co., is now manufacturing Deschutes Self-Raising Pancake flour. Ask your grocer for it.—Adv.

The Care of Farm Machinery

By A. E. LOVETT, County Agriculturist.

In normal years there is probably as little need for protection of the farm machinery from the weather in Eastern Oregon as in any section of the country, but even in Eastern Oregon money may be saved by protecting all farm machinery from the weather. Some of our farm machinery, such as the wagons and buggies, are used the year round, and in most instances are out in the wet weather in use, and still even with these two machines a shed would prove a saving of money. Our plows, harrows, mowers and rakes and most especially our grain binders deteriorate more rapidly because of their exposure to the weather than they do from use. I have heard farmers in this section state that their machinery did not rust in this section, but upon investigation have found a considerable amount of rust on practically all machines. A machine shed can be easily built at one side or end of the horse or cow stable at very little expense. Some of our machines are used only one to four weeks throughout the year, and their life should be from ten to fifteen or twenty years. However, because of exposure to the weather, there are very few of our machines that will last this length of time. The machinery shed will pay even in Central Oregon.

Another item worth considering in the matter of farm machinery is the painting and repairing of same. This can easily be done on stormy days when there is little outside work that can be done, and if the machines are repaired and painted when stored after using, it will be found that a good deal of time and money can be saved, not only because of the saving through this special care, but also because of the clear knowledge of the repairs necessary immediately after using the machine. "A penny saved is a penny earned," and this can be no more rapidly proven than by keeping the machinery in best repair and protecting it from the weather.

CROP REPORT ISSUED

Figures Show Oregon's Production Exceeds a Year Ago, Except Apples

The latest government crop report just compiled by the bureau of crop estimates making comparisons between production and price in the present year and a year ago, shows that out of the five articles mentioned all but one is more plentiful this year in Oregon and bringing a lower price.

The Oregon apple crop is 100,000 barrels short of last year's production and is bringing 18 cents a bushel more. Wheat, oats, barley and po-

tatoes have all exceeded last year's crop and the price is down.

Locating the Trouble
When one is suffering from backache, rheumatism, lumbago, biliousness, sharp pains, sore muscles and stiff joints it is not always easy to locate the source of trouble but nine time out of ten it can be traced to overwork, weakened or diseased kidneys. Foley Kidney Pills have benefited thousands of sufferers. Patterson Drug Co.—Adv.
