THE BEND BULLETIN, BEND, ORE., WEDNESDAY, FEBRUARY 2, 1916.

SUN ECLIPSED THURSDAY A. M.

SHOW WILL BE VISIBLE IN BEND

Sun Will Rise in Partial Shadow-Time of Beginning Computed for This Section is 7:32-Event Will Last About Forty Minutes.

University of Oregon, Eugene, Jan. 29-For the first time in many years, a solar eclipse visible in the northest will occur on February 3, 1916. The following information regarding it has been prepared by Edward H. McAlister, professor of n echanics and astronomy in the University of Oregon.

The eclipse will be total within a narrow belt, varying from 30 to 50 miles in width lying mainly in the Pacific and Atlantic oceans. This belt, called the "path of total eclipse" This egins in the Pacific ocean some degrees of longitude west of the Isthmus of Panama, traverses the Pacific to the west coast of Colombia, crosses Colombia and the northern part of Venezuela, thence pursues : general northeasterly course, extendnearly but not quite to the Britich Isles.

Oregon is situated far from the path of total collpse but for all points in Oregon the sun will rise partially eclipsed. Imagine a line beginning on the north boundary of the state at the point where the Columbia river first touches it (longitude 119 de-grees west of Greenwich.) and extending thence to the southern boundary of the state at the point where the common boundary between Call-fornia and Nevada touches the Ore-gon boundary (longitude 120 de-grees); then for all points on that line the "middle of cellpse," or moment of greatest obscuration, will occur precisely at sunrise; for all points in the state east of that line, the middle of eclipse will occur shortly after sunrise, and more than half of the eclipse will be visible; for all points in the state west of that line the middle of eclipse will have passed before sunrise, and less than half the eclipse will be visible. The greatest degree of obscuration

visible in different parts of the state varies in a complicated manner, but n a general way it may be said that in the extreme northwestern part of the state only about one-tenth of the sun's diameter will appear ob-scured, while in the extreme southeastern part nearly one fourth of the diameter will be obscured; at other points within the state the amount of obscuration will fall within these limits.

The time of sunrise on the date of eclipse has been computed for difforent points in Oregon, widely dis-tributed over the state, so that the time in other localities can be in-ferred wihin a minute or so. The ferred wihin a minute or so. been reduced to Patimes have all cific Standard time. In particular localities the time of apparent sunviso may be slightly modified by the fact that mountains obscure the true The computed times are as origon. follows.

ing, agree with the New York writer when he says "Tom Shevin was a real man." And all the country brogue. "This is the day, I suppose, when we will become famous as the knows what a real man Sheylin was during his four mighty years at New fathers of two great athletes." After the game, which Princeton, as will be remembered, won, the two Haven. Of them, and of his foot-ball work, "Fair Play" writes as follows

"This football," he said on one octheir casion, when he was supposed to have "Woll, Shevlin," said Mr. Rafferty, shoking his head sadly, "I see we are gallantly placed his whole business career in jeopardy for the sake of the still old man Rafferty and old man college team, "is to play, after all. I enjoy this business as a recreation;" Shevlin. but the man who allows it to take up his whele time and thought is a fool drums he came east, bringing with him the Minnesota shift. He took the disorganized Eli band, and in one week worked them up to a pitch which resulted in the defeat of Princeton and the tying of a power-Harvard game. The world will go on. And I've got a lot of things vastly greater than football to worful Harvard eleven. This year he came east again and gave Yale sixty y about." Nevertheless, to the 'man in the bleachers' Tom Shevry minutes of the greatest fighting spiril a team has ever shown. Results, another Princeton defeat. But he had done all he could do. Yale lin's fame as a great end and a great coach in football will always be rank-ed above any of his quite notable schlevements as a timber-merchant and financier in the Northwest." slumped at the Stadlum and Harvard won a crushing victory. He was extremely busy this fall.

"Fair Play" writes as follows:

and rather below par physically, but As a rich man's son, the son of a when Frank Hinkey wrote him Shevman who regarded only the sky as the limit of anything that his offlin promised to come east the fort-night before the Princeton game. spring wished to do, Tom acquired an Princeton game he was fury incar-nate. He gave every ounce of spirit expansive style which was a charac-teristic of him at Hill, at Yale, and in later life. But, generally speak-ing, he kept his balance better than and energy, and on the Thursday be-fore that contest he confided to Hinmany boys would have done, than many boys, as a matter of fact, have done. He selected his friends alkey that he thought he could last just one more day. He lasted that day and the next morning, Saturways with reference to their appeal day, the team was in such an exalted and it made not the slightest differmood that Professor Corwin thought ense who they were, whether rich or poor, or what they stood for. Many a student who was working his way through Yale had reason to suspect it expedient to summon phlegmatic graduates to the training table at luncheon, in order to apply a sedative. that many pleasant things which happened to assist him in a material was the dominant impression happened to assist him in a batterial was the dominant impression of way in the course of his collegecar-him. And he was a true friend. His eer came from Tom Sheviln; but he personality was so tremendous, his never could be certain. For Shevin was not prone to advertise himself in this way; what he did was done for the personal doct her here a here the sake of doing. When he brought a racing motor to New Haven and distanced a crack New York. New the inter-collegiate sky." He will leave a vacant place against

TREES IN BOOKS.

Probably the Most Curious Collection of Volumes in the World.

There is perhaps one of the most curious collections of books in the world to be found in a small town on the continent of Europe, says the London Tit-Bits. It is really a botanical collection. Outwardly each volume presents the appearance of a block of wood, and that is what it actually is But an examination reveals the fact that it is also a complete bistory of the particular tree which it represents. At the back of the book the back has been removed from a space which

THE RUINS ON THE HILL.

Where Richard of the Lion Heart **Dwelt In France.**

Perhaps the lovellest spot in all the winding miles of beauty along the river Seine between Rouen and Paris is Petit Andely. Ragged and shattered looking, the stony hills rear proudly up

above the placid river and sleepy town. and squarely upon its crest looms the ruin of Richard the Lion Heart's Castle Gallant, a great, burst keep and a few bits of massive wall. Once the castle flaunted its menacing leopard In spite of the best care mothers standards against the blue and white can give them this weather brings and gold of the Frankish skies, but that was before Philippe Auguste stormed and smashed it and smashed the townsfolk while he was doing it. Now, ghostly and wan, the stark ruin shimmers upon its hill, with never a single spear to glint from keep or The spears are still growbarblean. ing far below-the stout young poplars on the river bank and island sentineling through golden days when the river is gleaming jade; in the fiery sunwhen it mirrors back every sets. sturdy limb and feathery frond, and all the silent blue nights, when the stars bend crackling down to whisper and coquette and the ripples chuckle

softly against the rich brown banks .-Arthur Stanley Riggs in National Geographic Magazine.

The Parson Bird.

Among the feathered inhabitants of New Zealand there is a bird called the parson bird, or tul. It is about the size and shape of a blackbird, but has a pair of delicate white tufts at its throat and is a glossy dark green otherwise, which looks black in the sun-

take up a medical career, and he began his studies with some zen). The love of the drama, however, was far greater than the love of the pill box, and in the interval of the other work Sardou was busy upon a play. Life was a struggle for him, for he had little money, though he managed to get journalistic work to supplement his more slender income. His first play was a failure, and Sardou rushed from the theater vowing never to enter one again. He fell seriously ill, was nursed back to health by Mile, de Brecourt, an actress who lived on a floor below, and from that time his fortune was made.

Ship of the Desert.
