A Modern Methuselah.

In the axis, or upper burial ground of Germantown, there is a tombstone which gives the age of him who lies beneath it, one John Adam, as 960 years. The records, I believe, show that his age was rightly sixty-nine, and the explanation given is that the stonecutter cut his nine first and then found he had no room for his six. So he filled in the nine with cement and cut behind his first markings. Time having worn out the cement, reveals apparently the tomb of an ancient. It to be classed with those mentioned in Genesis.—Philadelphia Ledger.

 "Out to tell all the family secrets to the neighbors," said the child firmly.—Life.

It Was Horrifying.
