You will receive in return a trial package containing Foley's Honey and Tar Compound, for coughs, colds, croup; Foley Kidney Pills, and Foley Cathartic Tablets. Sold everywhere.—Adv.

# Irrigation Committee Asks Benham Falls Tract Opening

Acting on authorization from the Commercial club, the irrigation committee of that body has prepared a communication to Secretary of the Interior, Franklin K. Lane, urging the throwing open for settlement of the Benham Falls segregation.

The letter sketches the history of the project as follows:

"October 17, 1905, a contract under the Carey act was made by the state of Oregon and the United States for the segregation of 74,198 acres of public land in this vicinity.

"On January 5, 1909, the Deschutes Irrigation and Power Company, predecessor of the Central Oregon Irrigation Company, entered into a contract with the State of Oregon for the reclamation of these lands which were comprised in what is known as 'Oregon List No. 20.'

"By the terms of this contract the project was to be abandoned unless right of way for reservoir purposes was secured from the United States prior to October 17, 1915 and such right of way has never been secured.

"The original contract between the State and the United States expired October 17, 1915, as did also the contract between the state and the irrigation company.

"Up to Oct. 17, 1915, except for minor surveys, absolutely nothing was done by the irrigation company toward the reclamation of the Benham Falls irrigation project.

"On November 18, 1915, the Central Oregon Irrigation Company petitioned the Oregon Desert Land Board to request from the Secretary of the Interior a five year extension of the contract for reclamation.

"On November 24, 1915, the Desert Land Board made such petition to the Secretary of the Interior.

"On December 21, 1915, the Interior Department required that a showing be made in support of the application for the extension of contract and allowed 90 days from the receipt of notice within which to submit the required data. The matter was submitted to the irrigation company by the Desert Land Board so that it might compile and submit such data.

"The lands embraced in this segregation lie southeasterly from Bend, the distances varying from five to twenty-five miles. Certain portions of them are susceptible of irrigation while a large portion of the balance is of the same class as lands adjoining and outside the segregation which are now being successfully farmed.

"The Central Oregon Irrigation Company is admittedly unable to effect the reclamation of these lands and there is no other company or individual who wishes to do the work.

"The land now lies idle and un-taxed."

# Why Not Apply It Here?

The European consumer is the most scientific buyer of foods on earth. He has, from necessity, been forced to buy that which gives the greatest return for the money.

# HE IS THE WORLD'S GREATEST USER OF FLOUR

Flour, and yet more flour has been the cry of stricken Belgium. England and France consider it relatively the cheapest food at \$12 per barrel.

# Don't subscribe to popular fallacies FACE THE FACTS

Meat contains 60 per cent water.  
Potatoes, 75 per cent water.  
Milk 80 to 90 per cent water.  
Flour, 13 1/2 per cent water.  
A pound of meat costs 20 and 25 cents.  
A pound of flour costs four cents. And yet there is more energy in a pound of flour than in a pound of beef.

## REAL ECONOMY MEANS THE USE OF MORE FLOUR

WHEAT FLOUR—Cheapest and best food. U. S. test proves it. Deschutes Spray and True Blue Flours make the finest tasting bread on the market, because they are made from the highest grade wheat obtainable.

FARMERS: Inquire about our re-cleaned seed before you do your Spring seeding.
