## URGE DEVELOPMENT OF SEED POTATOES

(From Tuesday's Daily.)

(By United Press to The Daily Bulletin.)

Development of the seed potato industry in this section is urged in the latest news letter to be sent out from the office of the secretary of the Deschutes Valley Potato Growers association. The letter in full follows:

"Redmond, Or., Feb. 24, 1917.—Overtures have been made to the people in the vicinity of Tumalo, Terrebonne and Bend to join the association. Our association does not belong to Redmond, it covers the Deschutes valley in Crook and Deschutes counties, and will serve all the localities therein. Already several from the Bend district and from Terrebonne have joined, and branch loading stations will be established there. We now have 81 members.

"Our reputation in the 'Blue Book' (a guide of the producers' associations) is A-1. Our quality is unapproachable. We have the making here of an important industry, but for seed. Our geographical situation together with the climate and altitude are big advertising features. When potatoes on the market take the ordinary price, seed potatoes always sell better. Yakima grows many more times the potatoes than we, but about two years of their seed, and they have to send off for seed. They have been sending to Minnesota. We have just sold them a car of Deschutes Gems for seed. If it takes well, there is a future close at hand.

"On good authority we are advised that Texas will take 10 or 15 cars of Early Ohio seed potatoes from our organization next year, and pay 25 per cent more for them.

"Three cars were sold on the 13th of this month at \$3.35 cwt. The car of seed to Yakima brought \$3.75 yesterday. The market is still very strong, with no indication of a decline, as yet.

"During this high price period, and sometimes as a general matter of farm practice, the good-sized potatoes are sold and the small ones used for seed. Just a word of caution. Don't sell the other fellow your best stuff, while you plant the culls and then expect to hold his trade and keep it up. Remember that we are trying to be the best potato producers and there is none too good for our own use. We have a future here, a good industry, and let us not wreck it by a short-sighted policy.

"Five men have been selected to promote the production of Certified Potato Seed in this section. One man has been chosen from Tumalo, Powell Butte, Redmond, Lower Bridge and Terrebonne. These men will plant the same variety, give careful cultivation, weed out those not true to type, hill select in the fall and after two or three inspections by a college officer, the potatoes will be certified and sealed. Next year it is planned to enlarge the scope of the work. The advantage of producing this kind of seed is quite apparent.

The county agent's office is planning together with others interested, a potato contest of such proportions that this industry will be featured at the fairs in the fall, and the production of standard varieties of better grade and quality will be encouraged.

Yours very truly,

R. H. PARSONS,

Mgr. Deschutes Valley Potato Growers' Ass'n.

R. A. BLANCHARD,

County Agricultural Agent.

## SNOW IN MOUNTAINS THE DEEPEST EVER

White Deposit Eight Feet in Depth is Reported by Trapper at Cultus Lake.

(From Tuesday's Daily.)

While Bend snow has ceased to be a hindrance to pedestrians in the city, four feet at Big River, six feet at Crane Prairie, and eight feet at Cultus Lake, is the fact reported this morning to Forest Supervisor Hastings by Forest Ranger Burton Ohne. A trip made by Jim Childers, Cultus Lake trapper, from his cabin, to Crane Prairie yesterday, a distance of only seven miles, took the veteran woodsman the entire day.

Foresters report that the snow is lying deeper in the mountains than at any time last winter, arguing well for the water supply for the coming summer.
