

STATE HELPS TO FOSTER FISHING

LOCAL HATCHERY IS IMPROVED.

Care of Trout Minnows for Central Oregon's Lakes and Streams Involves Much Time and Constant Attention.

To make fishing the delight that the anglers want in this section, involves no small expenditure by the state of Oregon in the way of employment of game specialists, outlay in hatcheries, transportation facilities and other outlay. To keep the lakes and streams of the state well stocked with trout entails the constant attention of an important arm of the state's administration.

Among the districts so far as fishing is concerned, Central Oregon occupies an important place in the hearts of fishermen, for the haunts, the unexcelled fishing grounds and some of the best biting and largest trout anywhere obtainable.

The state of Oregon maintains a hatchery near Bend where fish are propagated for this section. During the last year many changes have been made in improving the local hatchery to accommodate a larger capacity and to enable the hatching and raising of trout most suited to this locality. With the present facilities the Bend hatchery will easily have room to feed two million trout. The main ditch was widened to enable the flow of more fresh water for the three fish ponds which are 12 feet wide and 20 feet long. Before the new ponds were built less than 500,000 trout minnows could be properly fed. With the present outlay two more ponds can be supplied with water from the ditch at its present size.

Great Care Taken.
The rearing of trout involves almost all-year around employment of a man. The eggs for the local hatchery are obtained from fish in Odell and Davis lakes about May, the time depending on how far the season is advanced. Before transporting the eggs from the lakes they are carefully packed in large boxes in which is moss. The moss is covered with ice. When the eggs arrive at the hatchery they are placed in large wire trays, two feet long and 12 inches wide, and are put in the troughs so that water can pass through the baskets over the eggs. The eggs remain in these trays about four weeks, or until such a time as the egg's sack remains. Then they are removed to the feeding ponds, supplied constantly with fresh running water. It is the theory that the young minnows should be taken from the trays as soon as possible to plant them in the troughs, because they

thrive better when next to nature. The minnows are supplied with a diet, the principle features of which are liver and old mackerel. It is one of the principle duties of the hatchery tender to see to it that the water is kept at an even temperature. Great care is also exercised that the troughs and ponds are kept exceedingly clean and free from diseases. Not until the minnows are at least four months old, or about two inches long, are they planted in the lakes and streams of this vicinity.

Local Hatchery Successful.
Experience has shown that trout hatched and cared for here do much better than they did when they were taken to the Bonneyville hatchery for hatching and returned here for feeding and planting. The wardens explain that hatching and feeding in one place enable the trout to become acclimated more readily.

The rainbow and steelhead trout are the varieties which seem to be the most suited to local hatching and feeding. By experience it has been shown that they thrive better in water the temperature of the Deschutes river. Eastern Brook trout are said to be becoming more popular each year.

Season Best Ever.
Since last August more than 650,000 trout have been planted in Central Oregon lakes and streams. The places where stocking has occurred are East Lake, Paulina Lake, Deschutes river and several of its main branches, Metolius river, Blue and Suttle lakes, Trout Creek, Mill Creek and several of the smaller streams in the vicinity of Sisters.

In the opinion of Clyde M. McKay, fishing in the Central Oregon streams and lakes ought to be the best it has ever been, owing to the extensive planting that has been done by the state in the last three years. The fish are, or ought to be, he says, of considerable size, and there should be an abundance.

BULLETIN TEAM WINS FROM SHEVLIN-HIXON

Lumbermen Lose Three Straight in City League Match—Swanson Captures High Score.

(From Saturday's Daily.)
Standing of the Teams.

UNION MEN TO URGE CLAIMS

WANT HOME WORKMEN FOR RAILROAD.

Central Council Committee Will Put Matter Up to Commercial Club Committee Next Week—To Consider Other Phases.

(From Saturday's Daily.)

Desiring to come into closer touch with the Commercial club work in regard to the proposed \$100,000 city bond issue for the Strahorn railway, a special committee representing the Central Labor Trades & Farm Council will meet with the Commercial club committee next week, before the final report is given at the Commercial club luncheon on Wednesday. This was decided on last night at the regular meeting of the council, when Harry Pearson, A. E. Edwards and H. Hall were named to confer with the hostess' committee and come to an understanding in regard to the relation of local labor with the proposed railroad.

Can Swing Election.
While it is understood that labor in Bend is generally favorable to the voting of \$100,000 bonds to insure Strahorn construction, instructions are still to be given, and it is claimed that a solid union vote can swing the election either way. One of the chief points which the council's committee will ask to have settled, is in regard to the labor supply. They contend that labor for the construction of the road from Bend should be drawn from Bend and the vicinity, rather than bringing in crews of workmen from other parts of the state and the United States. They will ask that local men be given the preference.

Other questions of minor importance, it is understood will be brought up when the labor committee and the Commercial club members who are investigating public opinion on the subject get together.

AUTO OWNERS ORGANIZE CLUB

MEETING TODAY EFFECTED PERMANENT ORGANIZATION TO CARRY ON GOOD ROADS WORK—OVERTURE PRESIDENT.

(From Saturday's Daily Bulletin.)

The first spring day in several weeks started the bug on good roads, as a result of which the Bend Automobile club was organized this noon at a meeting held at the Pilot Butte Inn.

Dispensing with many of the usual formalities of organization, the club elected H. J. Overture, president; Harper W. Skuse, vice president; Frank R. Prince, secretary, and Clyde M. McKay, treasurer.

That the club may be on a working foundation within a short time, President Overture appointed Dennis Carmody, O. C. Henkle and P. C. Garrison a committee on constitution and bylaws, upon which a report will be given at the next meeting March 31.

To interest not only owners of automobiles in the advancement of the cause of good roads, it was suggested that a Riders' Club be an adjunct organization to the automobile club, this organization to have a membership of "go-alongs" who are interested in the good roads movement of this locality.

The meeting this noon was called at the instigation of A. Whelan, who called the meeting together and briefly outlined the purposes and intentions.

Twenty-seven auto owners and others were in attendance at the meeting.

OPPOSITION IS DENIED

Elks at The Dalles Will Not Block Organization at Bend.

(From Monday's Daily.)
That the Elks lodge at The Dalles will offer no opposition to the granting of a charter for a lodge in Bend, was the word received here today by Vernon A. Forbes, one of the prime movers in the preliminary work of organization here.

The statement was made in contradiction of a report which had intimated that the lodge at The Dalles would prove a stumbling block in the way of the Bend antlered herd.

BOY IS STABBED BY YOUNGER LAD

HARRY EVANS, 17, WILL RECOVER.

Thirteen Year Old Howard Raney Named as Assailant, But Will Not Face Formal Action Because of Father's Illness.

(From Saturday's Daily.)

As the sequel to a fistie encounter in which he engaged last night, 17 year old Harry Evans, son of Bert Evans, of this city, is confined in the Bend Surgical Hospital today, suffering from a knife wound in the left side. His alleged assailant is Howard, the 13 year old son of J. C. Raney, of Bend.

According to information placed in the hands of District Attorney H. H. DeArmond, the two boys were scuffling shortly after 6 o'clock last night and the blows exchanged became too strenuous to suit the taste of the younger lad. Drawing his pocket knife, he plucked it into young Evans' side. Heavy clothes worn by the older boy saved him from serious injury, and it was reported at the hospital today that he was in no real danger.

Young Raney's father is reported to be seriously ill, and because of this, Evans' parents are unwilling to take any formal action in the matter. District Attorney DeArmond is taking the matter under advisement, he stated this afternoon.

WILL PICK TEACHERS ON TUESDAY EVENING

School Board Meets and Adjourns, After Deciding on Co-Operation With Athletic Club.

(From Saturday's Daily.)

Lacking time to go into the work thoroughly, the Bend school board, meeting last night, postponed the annual election of teachers for the coming school year, and will take up this and other business at an adjourned meeting to be held Tuesday evening.

Discussion was held as to the advisability of co-operating with the Bend Amateur Athletic club by having an instructor in the schools who would be able to handle both manual training and physical training. It was decided to take the matter up with the athletic club.

The directors voted in favor of taking out a membership in the National Educational association.

TO GIVE DINNER DANCE

(From Monday's Daily.)
Manager W. C. Birdsall, of the Pilot Butte Inn, announces that on Thursday evening the first of a series of dinner dances will be given at the new hotel to which the public is invited. It is expected to hold the dances regularly hereafter.

BETTER ATTENDANCE IN SCHOOLS WANTED

County Superintendent Thompson Plans to Introduce Certificate System, as Suggested.

(From Monday's Daily.)
Acting on a suggestion received from Superintendent of Public Instruction J. A. Churchill, County School Superintendent J. Alton Thompson is planning on the introduction of the certificate of attendance system in the county schools.

duction of the certificate of attendance system in the county schools.

According to this plan, each pupil neither absent nor tardy during the school year, will receive a certificate of award signed by the instructor, the county superintendent, and the state superintendent.

Mr. Thompson believes that the scheme will be of considerable value as a stimulus to better attendance.

Cut This Out—It Is Worth Money.

DON'T MISS THIS. Cut out this slip, enclose with 5c to Foley & Co., 2835 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive in return a trial package containing: Foley's Honey and Tar Compound for coughs, colds and croup; Foley Kidney Pills, and Foley Cathartic Tablets. Sold everywhere.—Adv.

The Family Cream Separator

Have you seen the New Sharples? The entire family will be delighted with this wonderful invention which we have received from the "world's largest separator factory." Your girl may turn slowly and make the work very easy. Your boy can readily fill the large low supply can.

THE NEW SHARPLES SUCTION-FEED

separator skims clean at any speed. Capacity increases as you turn faster so you can finish the no matter what the speed. No other separator has these important advantages. The simple tubular bowl is a favorite with the women folks—it's so easy to clean. There are only three pieces—no discs to wash. The Suction-feed Separator has many other new and exclusive features. Bring in the whole family and let us show you just how it works. You'll all be interested and we'll be glad to see you.
