Three Months50

THURSDAY, APRIL 19, 1917.

So great have been the increases in the price of news paper and other materials in the past two years that newspapers all over the country have been forced to adopt the strictest economies in order to meet the rising costs. Some newspapers have reduced their size, some have increased their subscription rate, some have gone out of business. The Bulletin has, during all this time, maintained the unusual size, for a country weekly, of 12 pages, on two occasions even going to 16 pages. Today, with the country at war, our leaders calling for economy in every possible form, and the price of paper threatening a still further advance, the weekly edition of The Bulletin is reduced to eight pages.

ELECTRIC COOKING DEMONSTRATION

(From Tuesday's Daily.)

The Bend Water, Light & Power Co. has concluded arrangements with the Western Electric Co., Inc., of Portland, and the Hughes Electric Heating Co., manufacturers of the Hughes Electric range, to conduct a series of demonstrations beginning Wednesday, April 18, and lasting until Saturday, April 21, at the Bend Theatre.

Each afternoon from 2:30 until 4 o'clock, numerous and dainty viands will be cooked electrically to show the superiority of electric cooking over coal, wood or gas.

In commenting on the field that this city presents for the promotion of this economical and sanitary method of preparing the meals, Mr. Cooley, representing the Western Electric Co., said, "The people of Bend are to be congratulated on being able to enjoy electrical cooking rates from their power company that enables them to cook by the use of electricity as economical, if not at less cost than coal or wood. We do not promote the electric range in territories having a cooking rate of over four cents per kilowatt, and it is indeed a pleasure to conduct educational work in a community where the rates are as low as at Bend."

"Your cooking rate here is three cents per kilowatt for the first 100 used, and one cent for all over 200 kilowatts used during any month."

"Bend has made a deep impression with me. Everything appears new and up to date, new residences are to be seen wherever one looks and I cannot help but feel that the ladies will want to know all about the modern way of conducting their kitchen by cooking electrically."

The new Western Electric Portable sewing machine, recently advertised in the national magazines, will also be shown. This machine weighs but 23 pounds, can be carried from room to room and placed on the top shelf when not in use. An electric motor and control are embodied in its manufacture.

COUNTY RECORDS.

William P. Setak to C. O. Boynton, deed to 40 acre tract in section 17, township 14 south, range 13 east, and to 40 acres in section 8, township 14 south, range 13 east.

DESCHUTES INVESTMENT CO. AND THE FIRST NATIONAL BANK BUILDING.

Front elevation of the new building of the Deschutes Investment Co. (doorway and building to left), now under construction on Oregon street adjoining the present First National Bank building (to right of doorway). The Deschutes county court room and county offices will occupy the greater portion of the second floor of the new building.

AUSTRIAN WILL FIGHT FOR U. S.

JOSEPH MURASKA READILY GETS PARENTS' CONSENT — HE HAS THREE COUSINS SERVING IN AUSTRIAN ARMY.

(From Tuesday's Daily.)

The son of Austrian parents and the cousin of three soldiers in the Austrian army who are now in active service, Joseph Muraska, of Fort Rock, arrived in Bend last night, passed an excellent physical examination, and enlisted at once in the United States navy. He declared that his father and mother, although somewhat reluctant to let him leave home, had no scruples because of their native land virtually at war with the United States.

Charles McCulley, of Silver Lake, who came in with young Muraska, completed an even half dozen, who left last night for Portland, to be given their final examination and sent to the naval training camp at San Francisco. The four others were Fred D. Knight, of Bend; William D. Hill, Luther B. Orr, and Paul W. Fawcett, of La Pine.

GILMAN SAYS CARS TO BE PLENTIFUL

(Oregon Journal.)

L. C. Gilman, president of the S. P. & S. Company, who returned this morning from a routine business trip to St. Paul, sees some relief in the car shortage situation within the next two weeks.

"I don't wish to pose as a prophet and then fall down on my prediction," said he, "but if high water does not interfere, I am confident considerable more cars will be coming into this section at the end of two weeks' time."

Mr. Gilman was accompanied east by W. D. Skinner, traffic manager of the North Bank, who also returned today.

PHILIP BROOKS WILL ASK FOR COMMISSION

(From Thursday's Daily.)

Philip R. Brooks left last night for San Francisco to confer with Major General Bell, of the Western division of the army, with the view to obtaining a commission in the service at once.

Before he left, Mr. Brooks stated that he would take his examination in San Francisco, to obtain a commission and, if accepted, he would enter the service of the United States at once.

Mr. Brooks was a member of the Minnesota National Guard, in the artillery, and did service during the years 1900 to 1907. Mr. Brooks hopes to obtain his commission at once and if he is successful will remain in San Francisco.

O.-W. OFFICIALS HERE

Praise Arrangements Made in Advance for Preparedness Car.

(From Thursday's Daily.)

Accompanying the O. A. C.-O.-W. R. & N. food preparedness car, Traffic Manager F. W. Robinson and General Passenger Agent William McMurray, of the O.-W., were in Bend today. They praised highly the work of County Agriculturalist Blanchard in making ready for the coming of the car, and for his poster on vegetable raising with the table of varieties.

The railroad officials gave out numbers of buttons bearing miniature American flags, during their stay here.

GARDENING IS FINE FOR BUSINESS MEN

Home Preparedness Advocates Can Derive Double Benefit From Back Yard Farming.

By Carl Vrooman,

(Assistant Secretary of Agriculture; member National Emergency Food Garden Commission.)

WASHINGTON, D. C., April 12.—Now that we understand what can be done with the back yard garden the next question to take up is how to do it to get the most out of our labor. If everyone with a back yard should plant a garden in it, the result would put a big dent in the high cost of living.

The city man has an hour or two in the morning or an hour or two in the afternoon after dinner. The exercise is just what he needs, for he will be getting back to nature. The outlay is small for the return it will bring.

With a little care, here are some of the vegetables that can be raised in a back yard garden, if the instructions are followed:

Beans, cabbage, parsnips, cauliflower, onions, lettuce, cucumbers, peas, beets, carrots, radishes, asparagus. It will be seen that in this list are vegetables that are commanding record prices right now.

With prices the way they are, every available foot of ground should be made productive. In the work the interest of the children should be enlisted; for they can help, and in helping, their minds will be directed

The Higher Level of Prices

Is Now Upon Us

Don't put off your buying thinking that you may do better later. No chance to do better, as prices are going up with a bound. There will be no advances on present stocks, but—what will we do and what will you do about future goods?

Regardless of existing conditions, this store is maintaining its extreme low prices on nearly everything in stock—in fact our prices are now lower than eastern wholesale prices, and its useless to imagine anything but higher prices.

We make the prediction that within ninety days the market will be bare of nearly all manufactured cotton, woolen or leather goods.

We are not alarmists, but cannot too strongly urge the laying in of supplies to last at least a year of extreme high prices, and a great dearth of all kinds of wearables as well as eatables.

The United States government is calling for bids on immense quantities of goods—mobilizing its resources—The supply is short, and every sensible householder should have a reserve stock of the common necessities. Markets have gone wild the past week, and most wholesale houses have put a limit on the amount of goods sold to a store. Such are the exact conditions. Use your best judgment.

R. M. Smith Clothing Co.

The Fastest Growing Store in the State

in a path that will be of value in later years.

The average back yard is 50x50. First clean it up. Get those ashes up out of the cellar, and if there are no paths about the yard, use some of the ashes to make them.

Be sure the paths are straight. Trenches should be dug along the paths 18 inches deep to secure drainage away from the house if possible. The soil thus found can be scattered about the yard and used to fill depressions.

Put in these trenches the stones, broken bottles, bits of brick and the crockery that may be found. Leave the trenches in this condition until the soil is dry for spading, where the good beds are to be made.

The spade should be driven deep and the soil broken fine in turning it over. All the stones found should be tossed into the drainage ways.

Before the garden is spaded give it a good covering of manure and see that it is turned under the soil. Then rake well, making the soil as fine as you can. This should be done in sections about six feet wide across the garden, so that the soil will not be packed down again by tramping on it.

STRAHORN TO START SOON AT KLAMATH

(Klamath Record.)

That the money for construction of the Klamath Falls municipal railroad will soon be paid into the city treasury by Spitzer, Rorick & Company and that Robert E. Strahorn will immediately commence construction and rush the work, were indicated in correspondence read and placed on file at council Monday night.

The declaration of war has created no financial excitement and it is agreed that no bad effects will be felt on the Strahorn railroad matters. In fact some hold that a flood of money will be thrown on the country and the road is needed as a national

defense and preparedness measure, by encouraging the production of food stuffs over a wide section of territory and facilitating the movement of troops and supplies by connecting the stub ends of several transcontinental lines.
