

SHEEP BRIDGE TO BE ERECTED

NUISANCE OF DRIVING HERDS THROUGH TOWN WILL BE REMOVED — MANY COMPLAINTS FROM RESIDENTS, THE CAUSE.

(From Saturday's Daily)
After having been the subject of numerous complaints in the past from townpeople, the nuisance of driving sheep through the city limits is to be removed. Instead of ranchers finding it necessary to drive their herds to one of the city bridges in order to get them to the opposite side of the river, they may soon take them over a specially constructed span at what is known as Dutch John's bridge four miles above Bend.

J. T. Hardy, commercial agent of the Oregon Trunk, was in town yesterday and stated that the sheep men in the district had decided to finance the construction of the much needed bridge themselves. Mr. Hardy has been working for such an arrangement for some time.

The forestry service has agreed to oversee the building of an approach driveway connecting the passage with the main road on either side. The bridge itself will be an ordinary pole one of ample width to allow several sheep on it at once.

NEED FOR ANOTHER GRADE TEACHER FELT

Children are Turned Away From the Schools—Will Pick Extra Instructor Today.

(From Monday's Daily.)
The second week of the city school year opened with the urgent call for a new grade teacher. Eight new students registered in the high school and 21 in the other buildings. Miss Stanka, at the Reid school, sent home 24 children this morning on account of lack of seating accommodations. A few have also been sent away from the others temporarily. It will be necessary for the school district to

rent a room and fit it up for the left-overs. A meeting of the school board was called early this afternoon for the purpose of picking another teacher and consider the advisability of securing an extra additional one.

Tell them to go ahead

You might as well have the use of that building you are planning—there is nothing to be gained by waiting. There is no prospect of prices going down for some time after the war is over. Go ahead and let your contracts.

When it comes to the roof you can make a real saving, and get a better roof by specifying

Certain-teed Roofing

CERTAIN-TEED is not cheaper because the quality is lower, but because it is a less expensive roofing to manufacture. It is better, not only because it is cheaper, but also because it is light weight, weather-tight, clean, sanitary, fire-retardant and costs practically nothing to maintain.

It is now recognized as the preferable type of roofing for office buildings, factories, hotels, stores, warehouses, garages, farm buildings etc., where durability is necessary.

CERTAIN-TEED is guaranteed for 5, 10 or 15 years, according to thickness (1, 2 or 3 ply).

There are many roll roofings on the market, but only one CERTAIN-TEED. It pays to get the best. It costs no more to lay a CERTAIN-TEED roof than it does to lay a poor roof, but there is a vast difference in the wear. You can't tell the quality of a roofing by looks or feel. Your only safety is the label. Be sure that it is CERTAIN-TEED—then you are certain of quality and guaranteed satisfaction.

Certain-teed Slate-Surfaced Asphalt Shingles are supplanting wood and slate shingles for residences. They cost less, are just as good looking, wear better, won't fall off, buckle or split. They are fire-retardant, and do not have to be painted or stained.

Certain-teed Paints and Varnishes are the best quality paint materials, ground and mixed with mechanical accuracy. Made for all uses and in all colors. With paint, as with roofing, the name CERTAIN-TEED is a guarantee of quality and satisfaction.
