

SHED ENLARGED AT LOCAL MILL

BROOKS-SCANLON COMPANY INCREASES SIZE OF DRY ROOM AND ADDS FIVE PLANERS TO PRESENT EQUIPMENT.

(From Friday's Daily Bulletin)
For the second time since the Brooks-Scanlon plant was put in operation in April, 1916, it has been found necessary to increase the size of the dry shed, and workmen are now busy in clearing out stumps and cutting down a knoll to make room for the extension. The addition will be built on the west end of the shed running toward the main entrance to the yard, and will be 48 feet in length. The spur track beside the shed will probably not be lengthened. For any further increase in dry shed capacity it will probably be necessary to move the office building from its site over toward the river. Another addition made necessary by the amount of business done by the company is the installation of five planers. These were ordered some time ago and are now on the road. They will be put in as soon as they arrive here, causing the need for an extension of the planer shed. With this new machinery it will

be possible to fill orders rapidly and especially to obtain quick car loading, a condition of great importance in a time of car shortage.
