CURIOSITY LEADS TO STAMP PURCHASE

(From Wednesday's Daily.)

One of the biggest purchases of war savings stamps for the week was made yesterday by O. H. Thompson, familiarly known as "Tom," who has a bootblack stand on Oregon street adjoining the People's store. "Tom" got curious about the stickers and went over to the postoffice with one of the Oregon Trunk porters. There he astonished his friend by taking out \$50 worth of the thrift stamps.

LEAVE OF ABSENCE MAY BE OBTAINED

(From Friday's Daily.)

Judge H. C. Ellis has just received a circular from the government land office informing him that persons who are living on unproductive homesteads may secure a leave of absence if they intend engaging in farm work elsewhere. This can be counted as constructive labor on the homestead and will substitute for the same period of actual residence. The land, however, must be improved and cultivated, although the holder is not required to live there for the duration of the war, if he so desires. This only applies to persons who filed before December 20, 1917, when the bill was passed. It does not concern those who wish to work in shipyards or lumber mills. The new circular puts at rest doubts of a number of men who have filed in this section and have tried to get a leave on account of shortage of grain.

4. Bakers are asked to reduce the volume of a Victory loaf from one pound to three-quarters of a pound, and corresponding proportions in other weights. They are by no means to purchase more than 75 per cent. of their flour consumption as used in the four months prior to March 1.

5. Manufacturers using wheat products for non-foodstuffs are to cease such use entirely.

6. There is no limit upon the use of other cereals, flours and meals, corn, barley, buckwheat, potato flour, etc.

cents. Efforts will be made to prevent a repetition of this next year. Several shipments of brown Carleton field peas are being brought in here from Union county.

W. C. Wilkes of the S. P. & S. line is in this section making a survey of the wheat situation for his road. He finds that the condition in the upper Deschutes valley is much better than in many other dry communities. On the north side of Crooked river 75 per cent. of the normal fall sown wheat is in the ground, whereas in some places in Washington only 10 per cent. has been put in. Twenty-five per cent. more seed is in the ground than at this time last year.

DE LAVAL CREAM SEPARATOR

Users of De Laval Cream Separators have carried away every first prize awarded at conventions of the National Creamery Buttermakers' Association during the last twenty-five years. The record is unbroken.

That ought to be proof enough that cream separated by the De Laval is superior to any other.

The reason is that De Laval bowl design, together with low speed, enable the delivery of butter-fat globules unbroken in their natural condition.

The NEW De Laval is the "blue-ribbon" separator.

You can buy a NEW De Laval from us on liberal terms. Come in and look it over and see how the Bell Speed-Indicator works.
