Spanish Influenza Rapidly Spreading

Persons Weak and Run Down Easy Victims—Fortify Yourself Against It by Taking Tanlac.

According to late reports issued by state and federal health authorities, the Spanish influenza epidemic is rapidly spreading to all parts of the country, and it now seems that practically every state in the Union will be seriously affected before it runs its course. It has not only become a great and terrifying menace to the public

health, but unless checked, it is apt to seriously affect the progress of war work in all its various departments. Already the shipping board has announced that ten per cent. of its workers had been affected.

The disease has made its greatest progress in the East, where it has claimed its victims by the thousands. Reports from other sections, however, are equally alarming; and both civil and military authorities have warned the public to take every precaution to prevent its further spread. In many cities schools, churches and theatres have been closed and public gatherings of all kinds forbidden.

Medical authorities agree that people who are weak and run down are the earliest victims of the influenza epidemic. If you find yourself tired, weak and losing flesh, or if you are in a generally rundown condition, or if you catch cold easily this warning should be heeded promptly. You are really in great danger, because the germ of this disease is very catching and you are apt to fall an easy victim if you

come in contact with the germs. People who are well and strong are not likely to contract the disease because they are able to throw it off. The common sense way to keep from taking it is to fortify the system against attack by building up the constitution.

In other words, to use the old adage, "An ounce of prevention is worth a pound of cure." And if you are in a sub-normal condition the proper thing to do is to begin immediately to build up your powers of resistance. To accomplish this, nothing on earth will strengthen you and build you up like Tanlac, the powerful reconstructive tonic, which contains the very elements needed by the system to give you fighting strength and ward off influenza germ.

First of all Tanlac begins its action by creating a good, healthy appetite for wholesome, nourishing food, and assists every organ of the body to perform its natural functions, thus helping to build up health and strength in the natural way. Tanlac is also the ideal strengthening tonic for persons who are suffering from the after effects of influenza, grippe or bronchial troubles and hundreds of thousands are using it daily with the most gratifying results.

In connection with the Tanlac treatment, it is necessary to keep the bowels open by taking Tanlac Laxative Tablets, samples of which are included with every bottle of Tanlac. It is also important that the every-day rules of hygiene be observed; that is, sleep in well ventilated rooms, get plenty of fresh air and exercise and keep away from crowds.

Tanlac is sold in Bend at the Owl Pharmacy and in Sisters by Geo. E. Aitken.—Adv.

WINTERING STOCK.

P. A. Devers & Son, Tumalo, Ore., are prepared to winter horses and cattle at their place six miles west of Tumalo. 35-c
