The
Brunswick
ALL PHONOGRAPHS IN ONE

The Brunswick Method of Reproduction has opened a new era in phonographic art, bringing inevitable refinements. Hitherto phonographs in themselves were wonderful enough, but now their novelty is past. Music lovers are more critical. Old standards do not satisfy. You want a phonograph that plays all records and will give the tone as it should be given. You can obtain this in the *Ultona*, the perfect reproducer. There is nothing to take on or off. At the turn of the wrist it adjusts itself. All we ask is a comparison with any and all machines and any record made.

Pathe Records

are as good as new after being played 1000 times with the Sapphire Ball Point.

The SAPHIRE BALL POINT does not dig, scratch or gouge.

The SAPHIRE BALL POINT does not wear a record in any way.

We guarantee a SAPHIRE BALL POINT to play a record 1000 times and at the end of that time the record will be as good as new in quality of tone.

The SAPHIRE BALL POINT is a jewel polished sapphire, the work of polishing being done under the microscope.

The SAPHIRE BALL POINT is made to fit the sound groove of the record perfectly.

This SAPHIRE BALL POINT cannot do otherwise than produce the whole sound of the record. The TONE is the softer, refined, resonant tone that can be found only where the gliding smoothness of the SAPHIRE BALL POINT is used and it is impossible to produce the screaming shrillness and scratching of the record-wearing steel point.

The SAPHIRE BALL POINT will NOT cut glass and we are prepared to prove it. Call in and let us demonstrate.

GRAZING RATES TO BE RAISED

25 PER CENT. ADVANCE
ANNOUNCED.

Will Go Into Effect on Deschutes
Forest March 1, 1919—Five-
Year Permits May Be
Issued Stockmen.

(From Tuesday's Daily.)

That an increase of 25 per cent. over the rates in effect during the past year will be made on grazing fees charged users of the national forest was the announcement given out this morning at the offices of the Deschutes national forest in this city. New rates will be effective March 1, 1919. It was also learned that five-year permits may be given out where conditions warrant, and where such permits are desired by the stockmen. The change in charges, it is expected, will make an increase of approximately \$600 in receipts for this forest.

The new schedule is authorized by an order from the department of agriculture and fixes 80 cents to \$1.50 for cattle as the charge for a year period, the amount varying with the advantages offered on the different ranges. The grazing season on the Deschutes forest usually lasts for about three months for the majority of stockmen, and the rates will be less than those named in the general order.

The rate for horses will be 25 per cent. higher than for cattle, and the rate for sheep and goats one-fourth of that charged for cattle.

According to records of the local forestry office, grazing preferences are now of considerable value, as the size of the range was insufficient to accommodate a number of new applicants for permits last year.

The issuance of annual permits will be continued where reductions are necessary to insure against overstocking, or where this may be required for any other reason. The plan is to bring about a more secure tenure of grazing privileges through the issuance of five-year permits as fast as this can be done in consideration of the various public interests involved.
