

Only People Who Don't Know the Pathephone are Those Who Criticize

The SAPHIRE BALL POINT Will Not Cut Glass

We Guarantee every Pathe record to play at least ONE THOUSAND TIMES with the Pathe Saphire Ball Point, without impairment to the unexcelled beauty of the tone and without showing any perceptible wear on the record.

It is certain that a piece of Saphire, *jewel polished* under the microscope and fitting the sound groove of the record *perfectly* cannot but produce the beautiful mellow tone for which it was intended. Nothing can replace the Saphire Ball Point and yet produce that desired effect. A steel needle, no matter how well made, will become a jagged chisel before the record has revolved 3 times. **ONE IS METAL--THE OTHER IS LIFE.**

Just as the resonant wood of the violin makes the violin music the sweetest of all instruments, so the construction of the sound chamber in the PATHEPHONE produces the music which is beautiful in quality and faithful to the living original. There is no metallic harshness to the PATHE.

The tone control is another feature of the Pathephone that should not be discarded without a word. Instead of being muffled, the tone can be changed from the full orchestra effect to a mere sigh. This is done by controlling the tone at the source, instead of muffling it at the mouth of the sound chamber.

Records are double. This means that you may secure two selections for the price of one. The prices range from 75c. to \$4.00 To get the full music value you must hear them on the Pathephone itself. The Pathephone has the Universal Tone Arm, which enables the player to use any record; so it is not necessary to always buy the Pathe Records, as is to be expected to produce the best musical tones. We are always pleased to show our Pathephones to anyone who is interested and will welcome the chance to play your favorite selection for you. At any time you will be welcome. Come and compare the Pathephone with any other make.
