

CAMPAIGN TO ERADICATE TUBERCULOSIS NATION WIDE

It is hard to find any better food than good milk, yet if the milk used in the daily diet is not good it is a constant source of danger. If the milk is produced by cows that have tuberculosis—and there are thousands of them in the country—and is not pasteurized, the germs of the dreaded disease may be transmitted to humans. This is the reason that the consumers as well as the producers of milk should be deeply interested in, and give their support to what the United States department of agriculture is doing to stamp out tuberculosis in dairy cattle.

The plan is to certify, officially, all herds, the owners of which have specifically complied with requirements which show beyond doubt that the animals are free from tuberculosis. In 1917 the plan was adopted jointly by the livestock sanitary officials of all the states in the union and by the federal department. It consists of giving the tuberculin test to every animal in the herd at least twice each year, at the end of which time, if all the animals are found free from the disease, the herd is accredited tuberculosis free.

Plan Gains Wide Interest.
The idea and advantages of accredited herds of cattle, found to be free from tuberculosis, gained wide publicity and popularity among the cattle breeders from the start. They appreciate the fact that a certificate of approval endorsed by the state in which the herd belongs, and found endorsed by the government, gives prospective purchasers confidence that the animals are free from the disease and they are in consequence willing to pay a considerable advance in price for such animals.

During the first year after the plan had been in operation 296 herds, comprising 9,284 cattle, were fully accredited as free from tuberculosis, and 1,462 herds, having 35,053 cattle passed one successful test in preparation for certification. In addition 4,622 herds, both pure bred and grade, totalling 98,002 animals, were under supervision for the eradication of tuberculosis. Each month a large number of additional herds

are taken under supervision. **Many States Co-operating.**
Tuberculosis eradication work is now being carried on in more than 40 states in cooperation with the state live stock sanitary officials and stock owners. Joint agreements between the state and federal department of agriculture governing the application for the tuberculin test, and the handling of the herd, are forwarded to each owner interested in having his herd freed of the disease, or in having it accepted as officially accredited.

It has been found by very careful experiments and practical work that tuberculosis cannot be detected to any great extent among animals by a physical examination. Herds which seem apparently healthy may be extensively affected with the disease. The most reliable method for definitely determining if the disease exists is the tuberculin test applied by a trained operator. Tuberculin, while it is the most active diagnostic agency known to science is safe only in the hands of a trained and skillful operator who is acquainted with its limitations and with the symptoms it produces to the animals to which it is applied.

All Pure Bred Herds to be Tested.
It is proposed to carry on the accredited herd plan until practically all pure bred herds of cattle in the United States are under the state and federal supervision for the eradication of tuberculosis. Thus it will be possible for an owner in one state to purchase cattle in another state with the assurance that he will receive animals that may be introduced into his herd with perfect safety, so far as tuberculosis is concerned. Under former conditions, many of these animals proved to be a menace, rather than an asset.

In addition to the accredited herd plan, the eradication of tuberculosis from live stock will be carried on in circumscribed areas, comprising one or more counties. The disease will be eliminated from cattle and swine in such areas. This campaign will be extended until it takes in entire states.

In order that the work may pro-

gress satisfactorily, it is necessary that livestock owners cooperate to the fullest extent. The success of the movement for eradicating tuberculosis rests upon the livestock owners of the country to a greater degree than on any other force; whenever they are ready and willing to get behind the work, success is bound to follow.

Four chairs at your service at the Metropolitan. No waiting.—Adv.

Central Oregon Neighborhood... News...

men from Portland to work for him on his ranch on the peninsula. Glen Burley and family of Bend spent Saturday at the Van Tassel home.

F. W. Williams this week sold a cow and calf to E. Cherry who has recently purchased the Skiving place near Redmond.

Mr. Van Tassel and family have moved to their ranch north of town. Mr. Himes received a carload of water pipe recently.

Mr. Lehman, a former resident of this place is visiting with friends here.

Arbor day was celebrated at the school house by a clean up day. A number of rocks were removed from the grounds and considerable work was done on the tennis court.

Terrebonne was the center of attraction Sunday. Many curious visitors came to view the damaged school house.

LET THE CHILDREN GROW.

Cough, colds, "Snuffles" that hang on tend to weaken the system and a suffering neglected child spends so much strength combatting a cold that the little one cannot grow as fast and sound in body as when free from affliction. Foley's Honey and Tar is splendid for coughs, colds, croup and whooping cough. Sold everywhere.—Adv.

CLOVERDALE TEAM WINS IN DEBATE

CLOVERDALE, April 15.—A debate was given at the Sisters' school house on Saturday night, when the question "Resolved, that the government should own and operate the railroads," when the Cloverdale debaters won the decision with the negative of the question. The Cloverdale debaters were Harold Kline, R. J. Skelton and A. E. Peterson.

RABIES RARE THIS SEASON

DECREASE IN NUMBER OF COYOTES AND BETTER CO-OPERATION FROM RANCHERS RESPONSIBLE, SAYS SURVEY MAN.

(From Thursday's Daily.)

If present conditions hold good, the Central Oregon ranges will be comparatively free from rabies this year is the opinion of Stanley G. Jewett of the U. S. biological survey, who arrived in Bend this morning from Pendleton. The number of coyotes has decreased noticeably since last year, and ranchers are taking better care of their dogs, he states as the chief reasons for the non-appearance of any considerable number of hydrophobia cases.

Only two which have been absolutely identified have been reported to Mr. Jewett this season, one dog and one coyote having died with the disease within his district. There is a possibility, however, that some cattle may have become infected, a number of deaths among stock ranging in Klamath marsh having been reported. The brains of the animals have been sent to Portland for examination as the only positive means of determining whether or not rabies was the cause of their death.

The Judges J. A. Thompson, Judge W. D. Barne and John Gotter. The Sisters debaters were P. B. Davis, Verne Kief and F. W. Weber.

Earl Miller, a Cloverdale boy who has been in the Marines and stationed at Galveston, Texas during the past ten months returned home last Wednesday.

Mr. and Mrs. Harold Kline, Miss Roxie Morris and Miss Gladys Parberry were visiting at the J. B. Hodson home on Friday evening.

Mr. and Mrs. H. O. Wilson made a trip to Bend Friday.

Cal Burnside made a trip to Redmond after land plaster Saturday.

Mr. and Mrs. F. J. Burling were visitors at the Parberry ranch on Friday evening.

Mrs. Hilleary and Mrs. Burling visited at the Burling home on Thursday.

Gladys Parberry spent Sunday afternoon at the Harold Kline home. Partin Brothers have taken their cattle to the high desert, leaving last week.

Mrs. Gray was a caller at the Aldrich home Saturday.

Mrs. Irvin Parberry returned to her home here Sunday from Sisters where she has been nursing.

Mr. Montese was a caller at the Aldrich home Saturday.

J. J. Dokken went to Redmond on Sunday.

Van and Lynn Wilson, Inez McKinney and Alice Kappahan went to Bend last Sunday.

J. J. Buckley of Redmond hauled a truck load of land plaster to the Parberry ranch last Monday.

Henry Maruska returned from Lower Bridge Sunday, where he had taken the Dan Angland sheep. A party of young people from Powell Butte and Prineville visited at the Shalts' home Saturday and Sunday.

ALFALFA RANCHER BUYS IRRIGATED 80

ALFALFA, April 16.—Carl Larson purchased the 80 acres of irrigated land known as the Fickert place.

Mr. Buick of the Stanley ranch purchased two cows and some hogs from Carl Larson.

Mr. and Mrs. Frank McBroom, who have spent the winter in Alfalfa, left Thursday for their home in Silver Lake.

Mr. and Mrs. William Spencer have returned to their ranch.

Mrs. Frank Post visited relatives at Post the last week.

Friends of J. M. Roberts will be sorry to learn that he again has a paralytic stroke.

The McBroom & Lane cattle feeding at the Guerin ranch left out for Silver Lake Wednesday.

C. H. Hardy sold a fine horse to Charles L. Lenz Saturday.

Several Alfalfaites attended the dance at Powell Butte Friday evening in honor of Ray Moffet, recently arrived from France.

RANGE ALLOTMENTS MADE FOR STOCKMEN

(From Saturday's Daily.)

Members of the advisory board of the Upper Deschutes Livestock association met this afternoon in Bend with Forest Supervisor N. G. Jacobson to consider allotments of the public range for this summer. Among those in attendance were: Cecil Stearns and M. S. Mayfield of Prineville, William Vandeventer, R. E. Grimes and H. M. Stevens of Bend, and W. H. McCoine of Culver.

"I Believe It Saved My Life," She Says

Former Trained Nurse, Graduate of Bellevue Hospital, Gains 25 Pounds Taking Tanlac.

One of the most interesting of the many remarkable statements yet made in connection with Tanlac was given by Mrs. Marie J. Howard, who resides at 402 Westlake Ave. North, Seattle, recently. Mrs. Howard has been a resident of Seattle for the past eighteen years, and before her marriage was a trained nurse and a graduate of Bellevue Hospital, New York. When asked if she would be willing for her statement to be published, she said: "Yes, indeed, and you may start it by saying I believe Tanlac has saved my life."

"I have suffered from stomach trouble and disordered liver and kidneys for a long time and had gotten in such a bad condition that I honestly felt like I was going to die. Everything I would eat fermented in my stomach and the gas formed by it would cause my heart to palpitate so my breath would almost stop. There were intense pains all through my back about my liver and kidneys and I can't begin to tell how I did suffer. I had fearful headaches and was so nervous I hardly knew what sleep was. I was often down in bed for a week at a time, hardly able to raise my hand. Then I would manage to stay up for two or three days, but would have to give up and take to my bed again. I would often go for two or three days without eating a mouthful of anything. I lost weight right along and am telling the positive truth when I say I was in such an awful condition that I thought I was going to die."

"After reading and hearing so much about Tanlac I bought a bottle, thinking if it did others so much good, perhaps it might help me, too. Well, it has not only helped me, but I have actually gained twenty-five pounds since I began taking it and have never felt better in my life. My appetite is good and my stomach in such a splendid condition that I can hardly eat enough and I don't suffer a particle afterwards. All my pain and misery are gone, my kidneys and liver are acting splendidly and my nerves are perfectly strong and normal. I sleep every night like a child, and don't know what it is to have a headache. My husband has also taken Tanlac with wonderful results. In fact, I think it has done him as much good as it has me, and we both consider it the finest medicine made."

Tanlac is sold in Bend by Owl Drug Co., in Sisters by Geo. F. Aitken, and in Bend by Horton Drug Co.—Adv.

Cleveland Tractor with tandem disks working on 20% grade

Built Like An Army Tank—that's why the Cleveland is so efficient

THE ability to travel over almost any soil—that's why the Cleveland always stays at work. That's why it gets so much work done.

And it is small enough to turn around in the corners—to get into the farm lots—saves the waste ground that can't be reached by the ordinary tractor.

Yet there is sufficient power and speed to enable it to get a great volume of work done, working at a speed of three and one-half miles per hour.

Easy to operate—economical on fuel—the Cleveland is a machine for any farm. Thousands are now in use—building profits—making farms more productive.

Get Your Cleveland Tractor Now

The spring work is now under way in most coast districts. Those who ordered their Clevelands during the winter months have been receiving them according to schedule. If you want a CLEVELAND this season, DON'T DELAY—ACT NOW.

CLUBS ARE POPULAR.

Farm and home work loses drudgery and becomes an interesting game for boys and girls as a result of the club work organized by the United States department of agriculture and the state colleges. These clubs set standards of achievement in home activities and dignify common labor. Boys and girls, both rural and urban, in the clubs have their point of view changed so they want to make further preparation and study in the business of farming and home making. The work is as permanent as the public school system because it is backed by permanent institutions, state and federal, and is a definite part of the co-operative extension program in every state in the union.

Some Things Club Work Does.

Club work socializes community life through the boys and girls and gives young people a real motive in all their work. They are trained through it for community leadership and co-operative work of every kind and are taught that it is infinitely better to be a proprietor of farm land, farm animals, machinery, crops or kitchen equipment, than to be a mere wage earner. The state and national governments in 1918 employed 985 club leaders to superintend the boys' and girls' club work in the counties and states, while several hundred more were employed during the summer. An average of 10 projects a state was conducted during the past year under the supervision of the club organization.

This is the season to--

- Paint up the old wood work.
- Kalsomine the walls.
- Get a Supply of Kitchen Utensils.
- Plant a Garden.
- Get Garden Tools.
- Sow a Flower Garden.
- Start a Lawn.
- Repair the Locks, Hinges and Windows.
- Get ready to keep out the flies.
- Stock up on Fishing Tackle.
- Order Sports Goods.

In all these we can guide you right.
