JOHN FOSTER IMPROVES HERD

LAKE COUNTY RANCHER BUYS FINE PURE-BRED SHORTHORN BULL TO ADD TO HIS HERD OF FINE STOCK.

Quietly and unassumingly plugging away for several years down in the summer Lake valley there is a rancher today who may now be considered as one of the biggest breeders of pure bred stock in Oregon. He is John Foster of Summer Lake. Mr. Foster is not a new comer in Central Oregon. He has farmed in Central Oregon for years, but only recently did he take to raising pure bred livestock and especially pure-bred shorthorn cattle.

This week Mr. Foster will receive one of the finest pure bred, two-year old shorthorn bulls that has ever come into Central Oregon. This two-year-old bull arrived in Bend Saturday from Alex Chalmers of Forest Grove, Oregon, a well known breeder of pure-bred shorthorns. The cost of the bull, delivered to Mr. Foster, will be about \$1,000.

It was ascertained this week that Mr. Foster will have about 30 pure-bred shorthorn bulls for sale this year. He already has on his ranch at Summer Lake 60 registered cows and expects to increase his herd materially.

President Wilson, like Stewart Edward White will visit Oregon. The Commercial club ought to get him here. Put it up to him right and he will be sure to come.

REGENTS OF O. A. C. WILL EXTEND AID

(Continued from Page 1.)

plaining his position. "I feel however, that a final statement would be out of place until more facts bearing on the situation are at hand."

Mr. Weatherford spoke of the work being done by the O. A. C. in training men and women for useful citizenship, emphasizing particularly the important part played by the graduates of the college in the world war. From this he turned to the subject of the training of successful farmers, and assured his hearers of the hearty cooperation of the board of regents in regard to any problems of development and production which might exist, or which might arise.

Must Be on Big Scale.

"The experiment station would undoubtedly be a good thing, and we are certainly willing to cooperate in bringing it about if it is found feasible," was the statement of Mr. von der Hellen. He mentioned also the work at the Talent experiment station, and the excellent results obtained in the use of sulphur in connection with alfalfa culture.

Jefferson Myers, secretary of the board, was strongly in favor of putting in a station here, but declared that it should only be on a generous scale. "We must have big brains in charge of it," he asserted, "and if we can't have that, and can't put enough money into it to make it a tremendous success, I would not favor it."

Walter M. Pierce declared that Bend and Central Oregon deserve an experiment station, not only because of the immense territory to be served, but on account of the leadership

which Bend has taken throughout the state in establishing effective cooperation between banking and mercantile interests on the one hand and the farmers on the other. As to a branch agricultural college, he declared that this an old log rolling scheme which had been used in Union county, and that he would be against it.

Timber Work Sketched.

George Cornwall of The Timberman developed the topic of the dual relationship between timber and farming interests, showed that the state college has always taken an important part in preparing men for the timber industry, and took occasion to speak a good word for the cause of selective reforestation as going hand in hand with improvement in farm methods.

Jay Upton of Prineville was called on, and emphasized the need that the people of Central Oregon should support the irrigation securities commission, and refrain from fault finding when the bonds of an unworthy irrigation district are turned down. "We have reached the best in irrigation legislation in Oregon," he said, "and what remains is administration to make it entirely effective."

Immediately following the luncheon, members of the committee from the Bend, Prineville and Redmond Commercial clubs met to make arrangements for the reception of the U. S. geologists who are due to arrive tomorrow to investigate the Benham Falls storage reservoir site.

WORK ON TUMALO PROJECT IS SEEN

(From Tuesday's Daily.)
Accompanying State Engineer Copper and Fred N. Wallace, R. A. Ward and Claude Callierate of the Coast Culvert company, spent yesterday afternoon on the Tumalo project inspecting flume and ditch work in that section and noting the use of sulphur in alfalfa growing. On the ranch of G. C. Tweet, a patch of sunflowers, planted for silage, was seen apparently untouched by the frosts of the late spring and early summer, growing to the height of from 35 to 45 inches.

Rev. A. J. Vallery Makes Statement

Says Taulac Has Overcome His Troubles and He Feels Like a New Man.

"I feel that it would be helping others to tell what Taulac has done for me," said Rev. A. J. Vallery, living at 834 Chelsea avenue, Memphis, Tenn.

"About three years ago," he continued, "I had a general breakdown that made me very nervous. I had a sour stomach and would spit up undigested food. The pains in my stomach hurt so at times that I thought they would kill me. I also suffered with rheumatic pains in my joints and my kidneys were in bad shape, my sleep was poor and I felt so tired all the time that I could not do my work."

"Since taking Taulac I have been relieved of indigestion and those pains are all gone. My kidneys don't trouble me any, I am not nervous like I was and I can sleep fine every night. My strength and energy have been restored and I feel like a new man."

Taulac is sold in Bend by the Owl Pharmacy, in Sisters by George F. Altken and in Bend by the Horton Drug Company.—Adv.

WAVE OF MORALITY IS NOTED IN BEND

Only Five Civil Actions and One Criminal Case Have Appeared in Justice Court in 2 Months.

(From Friday's Daily.)

A morality wave, which is nearly putting the justice court out of business, is passing over Bend, according to court records inspected today. In nearly two months' time only five civil cases and one criminal case have been heard in the lower court, a smaller number than for any similar period in the last six years.

P. & S. E. TO BUILD RAILROAD TO BEND

(Continued from Page 1.)

project, Mr. Foster stated that the P. & S. E. was not associated with Hill interests. In speaking of any difficulties regarding the obtaining of right of way, Mr. Foster said that there were no serious problems in this connection facing the company, as more than 50 miles of right of way have been obtained from Mr. Angel, and from that point the line is to be projected through the Santiam forest and from the eastern extremity of the Santiam it will enter the Deschutes national forest, following in government property a greater part of the distance to Bend.

May Electrify Line.

That the P. & S. E. intends to electrify at least a part of the line from Mount Angel to Bend is indicated in a statement by Mr. Foster that leases for power site purposes have been obtained on Marion lake in the Santiam forest in Curry county. Marion lake, according to State Engineer Copper, who is in Bend today, is one of the greatest power possibilities in Oregon. It is capable through the harnessing of Marion creek, of developing between 30,000 and 40,000 horsepower. According to Mr. Foster, it is the intention to harness Marion creek for the development of power. At the present all data is in the Portland office of the P. & S. E. The waters from Marion lake, it is understood, have been gauged over a weir daily for a period of three years. The height of effective power is 1100 feet. The distance of this power site from Portland is 190 miles. Regarding immediate steps for the development of power from this source, Mr. Foster was not prepared to state.

Rumors Come True.

For several weeks vague rumors have been current in Bend regarding the activities of Mr. Foster and his associates in the Myler Construction Co. Local men who have been to the summit say that there is a large crew surveying there. Mr. Foster is planning for extensive operations within the next few months.

With the commencement of railroad activity in Central Oregon, there is now some speculation as to whether or not the Hill interests are back of the project. The route of the proposed line runs through, or near by, the extensive timber held by Hill interests. It is estimated that there are 2,000,000,000 feet of merchantable timber tributary to the proposed line, of which the Hill interests

The Brunswick
ALL PHONOGRAPHS IN ONE

PLAYS ALL RECORDS AT THEIR BEST

THE Brunswick Method of Reproduction includes several new ideas which bring the utmost in true tone. Each record, of whatever make, is played according to its exact requirements.

This is accomplished by a new invention, the Ultona, the greatest improvement in phonographs in years.

Hear the Brunswick before you buy. Decide for yourself.

A New Idea in Phonographs

ALL records, no matter what the make, are played at their best on the Brunswick, because of the new Brunswick Method of Reproduction—an exclusive feature.

Once you hear this remarkable instrument your ideas of phonographic tone will change.

Come hear your favorite selections today. Let your own ear decide.
