

TWO BEAUTIFUL LAKES SQUARE LAKE : LONG LAKE

Why talk about the wonders of the Yellowstone national park, Glacier national park, the ocean beaches with their balmy saline breezes, and waters too cool to enjoy? Why think about the din of the city, its roaring traffic and its hurrying peoples, its hot and sultry thoroughfares? Why think only of a trip on the road in your motor car, when there are a thousand or more wonders right at your own threshold—places where you can go with little effort?

Central Oregon has thousands of unadvertised and uncommercialized wonders. How much do you know about its lakes? How much do you know about its streams? How many of you know the names of its peaks you see almost every week? How many of you know the trails that lead from the automobile highway? What do you think about its trees? How many of its flowers can you name? Do you know a white pine tree from a fir, a cedar from a tamarack? Would you know a huckleberry bush if you saw one? These and hundreds of things are open to those who venture off the beaten tread of the automobile.

Back in the mountains no more than 50 miles from Bend there lies a chain of lakes. There are four known to the writer and there are several others in what is commonly known as Eight Lake Basin that are going to become familiar to him before the snow flies. His curiosity has been aroused by seeing two of these lakes in the past week. These two more or less isolated bodies of water are Square lake and Long lake, both of which lie only a few miles south of Three Fingered Jack, near the divide and in the vicinity of Hogg Pass.

To reach these two lakes one must either hike in on foot from Suttles lake or obtain saddle horses.

The distance from the northeast end of Suttles lake to Square lake is about eight miles or about a three-hour hike or ride. One might easily leave Bend about noon, arrive at Suttles lake about 3 o'clock and be at Square lake at 6 or 7 in the evening. It is well to do this because the fish bite exceptionally well in the late hours of the afternoon. The trail all the way is good. There are no steep pitches that cannot be climbed. It is a steady pull all the way from Suttles lake to Square lake with the exception of the last mile. On the main trail there is a sign "Salt Ground No. 144." Just before reaching this sign there is a trail which turns to the right. By following this tributary one will find no difficulty in reaching Square lake.

Square lake covers no more than 40 acres of territory. It is protected on one side by high hills, heavy brush, tulles and timber. The water is clear and not too cold. The shore line extends out some little distance when it breaks abruptly. It is at these jump places that the finny beauties—rainbows, dories and red sides lurk at the invitation of the "red upright," "professor" and "royal coachman." The trout taken from the lake die a game death. They do not give up. They die before they give up. They are not whoppers, so to speak, but they are just right to give the sportsman all he can handle on the average fly rod. When they hit they hit hard and keep up the fight until they are landed in the net.

The lake is surrounded by a variety of bushes, all of which have a rich, green color. There is a heavy growth of underbrush and

the flowers are abundant just now. Sunrise should find one out of his pine-bough bed. When the first rays peak over the crest of the hills and illuminate the little basin, a picture too choice for word-description greets the riser. The hills take on a brighter color. The green of the hills and the bushes changes. The rocks seem to have life. The odor from the pines and the firs is exhilarating. It's a hearty breakfast one enjoys.

Long lake is only a short distance from its neighbor. It is only about 200 feet wide and three-quarters of a mile long, but it is deep. The gamiest kind of rainbows greet the angler. This lake, like its neighbor, is sheltered by a wealth of natural beauty.

GOAT MEAT GOOD AS MUTTON

It Is Said Only Experts Are Able to Tell the Difference Between the Two.

There is a growing disposition to give the goat his due. Heretofore this rubbish-eating animal has been regarded pretty much as a joke, but he has continued to eat tin cans and thrive until now his race has acquired census-listing proportions and a market has been established in a middle-western city where surplus goats will be converted into "spring lamb" for the benefit of our non-vegetarians. As an addition to the poor man's meat perhaps the goat will be welcome, especially if his advent tends to lower the present high prices.

Goat meat tastes much the same as mutton, it is claimed, and that the difference cannot be told save by an expert. Perhaps that is just as well. Our imagination has much to do with our taste. Many people are eating horse meat in this country under the impression that it is beef, for horses are slaughtered, but almost nowhere is their meat exposed for sale under its true name. No doubt the easiest way for us to get used to goat meat is to camouflage it as mutton. It is another case of ignorance being bliss.

But, as we are assured by the experts that it is wholesome, a name will not make much difference in the end. Mutton, the world over, has been the poor man's meat. If goat meat can add to the supply, so much the better. The meat of goats was a favorite in the days of the patriarchs. It is still highly prized in the East. There seems to be no reason why it should not ultimately hold a respectable place on our menus.

U. S. GEOLOGIST IS SEEKING OIL LANDS

Representing the U. S. geological survey, which is working in cooperation with the state in the appraisal of lands relative to their possibilities for oil development, John P. Bawalda was in Bend Monday, and left Tuesday for Klamath Falls, making his stay in this section brief, as the formation does not indicate the presence of oil.

From Klamath Falls he will go through the Rogue river and the Willamette river valleys, planning to start immediately afterward for Harney county where he considers oil indications are the best in the state.

On his arrival here, Mr. Bawalda had already been through Hood River, Wasco, Baker, Crook and Jefferson counties.

MORE AND BETTER CHICKENS

Owner of Common Mongrel Flock Will Soon Apologize for Its Existence—Keep Pure-Breds.

(Prepared by the United States Department of Agriculture.)

It will not be long before the owner of a common mongrel flock will apologize for its existence. This is the opinion of the poultry-extension worker of the United States department of agriculture who is a leader in the campaign for more and better poultry on farms in south and southwestern Arkansas. In many parts of Arkansas the importance of better poultry and more efficient management is being recognized by progressive business men, commercial organizations, bankers and others and they are active in their moral and financial support in co-operating with the government and state extension forces in their efforts to convince the farmer that standard bred poultry properly managed is a paying industry, and that the old barnyard mongrel hen must get out of the way for standard-bred, uniform flocks.

The county agent of Drew county has placed 50 pens of one male and four females each of pure-bred Barred Plymouth Rock and Rhode Island Reds on 50 farms, in charge of a boy and girl poultry-club member. The Monticello Chamber of Commerce and the banks of Monticello have advanced the money to purchase these pure-bred fowls and have assisted in their distribution. In addition to the 50 pens of chickens, over 100 sittings of pure-bred hatching eggs have been secured for the club boys and girls. The farm and home demonstration

A Common Mongrel Flock—An Owner Will Take Greater Pride and Get Better Profits From a Good Flock of Uniform Birds.

agents of Ashley, Union and Desha counties are busy with poultry-club work on farms and in the organization of poultry clubs. In each of these counties an effort is being made to double last year's poultry-club enrollments.

On March 12 the Southwestern Arkansas Poultry association was organized at Magnolia with 18 charter members. It is reported that practically every business man in the town will become a member and lend his influence and support for more and better poultry. Plans have been made to hold the state poultry show at Magnolia November 25 to 28, where the finest aristocrats of the barnyard will be on display competing for the coveted American Poultry association gold medal offered to only one association in each state.

KEEPING POULTRY IN TOWNS

Especially in Suburbs of Large Cities Families Should Keep Small Flocks of Hens.

(Prepared by the United States Department of Agriculture.)

When conditions render it feasible small flocks of poultry should be kept by families in villages, towns and especially in the suburbs of large cities. The need for this extension of poultry raising is particularly great where consumption exceeds production, as in the northeastern states. Through utilization of table waste, scraps and other refuse as poultry feed much wholesome food in the form of eggs and poultry for home use may be produced at relatively low cost.

STRONG BIRDS FOR BREEDING

Comb, Face and Wattles Should Be Bright Red—Eyes Bright and Prominent.

(Prepared by the United States Department of Agriculture.)

Fowls for breeding purposes should be strong, healthy, vigorous birds. The comb, face and wattles should be of a bright red color, eyes bright and fairly prominent, head comparatively broad and short and not long or crow-shaped, legs set well apart and straight, plumage clean and smooth.

PRINCE ALBERT

the national joy smoke

Tongue red bags, tidy red tins, handsome pound and half-pound tin humidors—and that classy, practical powder crystal glass humidors with sponge moistener top that keeps the tobacco in such perfect condition.

Copyright 1919 by R. J. Reynolds Tobacco Co.

PUT it flush up to Prince Albert to produce more smoke happiness than you ever before collected! P. A.'s built to fit your smokeappetite like kids fit your hands! It has the jimdandiest flavor and coolness and fragrance you ever ran against!

Just what a whale of joy Prince Albert really is you want to find out the double-quickest thing you do next. And, put it down how you could smoke P. A. for hours without tongue bite or parching. Our exclusive patented process cuts out bite and parch.

Realize what it would mean to get set with a joy's jimmy pipe or the papers every once and a while. And, puff to beat the cards! Without a comeback! Why, P. A. is so good you feel like you'd just have to eat that fragrant smoke! R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

BOATS ARE SENT TO ODELL LAKE RESORT

To make available better facilities for entertaining summer guests at Odell lake, Jerry Hoyt has ordered six large rowboats and four detachable motors to be used in

connection with them. The new equipment, of which the boats were built in Bend, were shipped out to the lake by W. C. Birdsall.

Such is Life.

"Rich man, twin-six. Poor man, six twins," is the way the Everett Herald puts it.

Be Prepared for Vacation Ills.

Change of food and water sometimes causes indigestion that leads to sick headaches, biliousness, bloating, sour stomach, gas, bad breath and coated tongue. Foley's Cathartic Tablets should be in every traveler's grip. They act without pain, griping or nausea. They are a fine and wholesome physic. Sold everywhere.—Adv.

A NEW STOVE OR RANGE FOR WINTER

Did you not say that you would never go through next winter without having a new stove or range?

If your range has been giving you trouble, come in and let us talk over with you

The Colonial Range or The Opal Range

These Ranges are Oregon products. And about a heater for winter! You want fuel savers and heat givers. We carry a full and complete line.

Fall is a good time to begin your painting, or finish where you left off this spring.
