SILOS MAY SOON NEED ATTENTION

With the silo-filling season approaching, necessary repairs, according to the department of agriculture, should not be neglected. Airtight walls are a chief requirement. A leak from a hole so small as a nail will cause loss to several hundred pounds of silage. With wood stave silos the hoops and braces should receive attention to insure close fitting.

Absolute Limit.

"A man ain't reached de full human capacity for laziness," said Uncle Eben, "until he gits too lazy even to invent excuses for it."

"In at One, at Five They're Done."

It is never too late for one airy-dainty frock like this which can be worn for one occasion or another at least nine months in the year. This cream-colored combination of net and lace looks to a girl of pink ribbon and French flowers for its coloring and it is vivid in its freshness. This model, though late in the season, is a forerunner of 1920 lines.
