This Test Reveals a Phonograph's Tone

Ask to have piano records played—the most difficult test of sound reproduction. The Brunswick has proved its merits under this ultimate trial, for it reproduces piano tones faithfully.

On the Brunswick, piano records retain their original quality. They cannot be confused with the harp or zither. This is due to the Brunswick Method of Reproduction.

Before you buy, or even if you already have a phonograph, come in and hear the Brunswick. Put it to any tone test you wish. Let us play the most difficult records for you. You will be delighted with the way the Brunswick plays them all.

The Ultona All-Record Reproducer and the all-wood Tone Amplifier are exclusive Brunswick features. And they are integral parts of the instrument—not attachments in any sense.
