**AROUND THE WORLD
WITH THE AMERICAN
RED CROSS.**
At Saloniki.

The veritable mountains of relief supplies turned out by the millions of chapter workers during the war made the American Red Cross one of the biggest "manufacturing concerns" in the world, with great warehouse space at scores of strategic points all around the globe.

One of the biggest distribution centers was at Saloniki, Greece, and in this picture Bulgarian prisoners of war are seen there unloading a Red Cross cargo of 2,300 boxes from a French transport. At the right is seen one of the American Red Cross caissons, fleets of which were used in rushing relief to points where the suffering was greatest.

HEAVY HORSES STILL SCARCE

Large Number of Mares Bred Last Spring Expected to Meet Demand for Draft Animals.

(Prepared by the United States Department of Agriculture.)

While there is a surplus of light horses on the farms of the United States, there is still a notable deficiency in heavy, desirable draft horses, say horsemen of the United States department of agriculture. Last year, they say, there was a tremendous decrease in mares bred, but during the spring of 1919 a very large percentage of good mares were bred, which is expected largely to meet the future demand for horses of the better type.

FORMATION OF BEEF CATTLE

Disposition Should Be Quiet, Bordering on Loginess—Small Udders Best for Cows.

Beef cattle should have a quiet disposition, bordering on loginess. They should be large, with heavy bones, should take on weight easily, and the cows should have small udders and give only enough to raise a calf.
