The new double-breasteds by Hart Schaffner & Marx

They've "hit the mark" with young men. Maybe it's because they're such a complete change from the single-breasted army blouse; maybe it's because they set off the broader chests so well; make young men look wiry, athletic.

The old double-breasteds were square and bulky looking; few men could wear them. The new double-breasteds, as Hart Schaffner & Marx make them, look well on any man; one, two and three button models; some with belts.

At this store you not only get the latest styles to be had, but you save at the same time; all-wool quality lasts longer—you don't have to buy so often.

ROD AND GUN CLUB MEETING TOMORROW

Sportsmen Will Take Up Matter of Stocking Streams and May Request Paid Game Warden.

To outline their work for the coming year, and to formulate recommendations to be made to the State Fish and Game commission, members of the Bend Rod and Gun club will hold a special meeting at 7:30 o'clock tonight in the city council rooms.

Among matters which will be put up to the state commission are recommendations for stocking Central Oregon streams with more rainbow and silverside trout, and for the employing of a paid game warden for this section.

Perverse Critters. "I can't help thinking sometimes," said the discouraged farmer, "that the worse you treat your hens the more eggs you will get from them. I remember an old joke where one man asked another: 'How do you get so many eggs?' 'Why,' said the other, 'I treat my hens so unscientifically they're all laying for me.'"

Pia'd That is Shunned. One of the most interesting plants in the Atlantic states is the Virginia wild ginger. It is found both in the Virginias and as far south as Georgia. There are several other species in the Atlantic states as far south as Florida and northward to Connecticut. The plant grows in very hills and wooded places, and is easily recognized by its kidney-shaped leaves and curious purple-brown flowers. These flowers grow one to a stem. No living thing will eat its bitter leaves and one rarely sees the flower unless one hunts for it, for it hides itself out of sight if possible.

Guatemalan Salt. Guatemala's salt industry, which began soon after the Spanish conquest, now produces nearly 2,000,000 pounds a year.

When News is Not News. The supreme court has held that news is property. Some of it is, and then some is "improvements thereon."

The Shorthorns Have Arrived!

OUR importation of registered **Shorthorn Cattle** for foundation breeding stock has arrived and has been distributed among the farmers of the county. "Secret Flash", the highest priced Shorthorn cow in Deschutes county, was secured for T. M. Janssen for \$1025.00, and breeders in Union county considered her cheap at that figure. Our breeders will have a car lot of young stock for sale in the spring. They will be sold locally or consigned to one of the Shorthorn sales. Some of these calves will bring what the cow cost, and the owner will still have the cow. Better join the ranks of the breeders and secure some pure bred livestock.
