

BEND HAPPENINGS FROM DAY TO DAY

Thursday—

W. A. Foster of Prineville, is in the city today.

Gordon Thompson day clerk at the Pilot Butte Inn, is in Portland on a short vacation.

Miss Janice Simpson has recovered from her recent illness and was able to be out this morning.

G. A. Seeley and Norman Inherwood, of Sisk, arrived in the city last night, and are remaining over today.

J. H. O'Neill, General Passenger Agent for the O-W. R. & N., was in Bend yesterday and today on an official visit.

Mrs. P. B. Smeal, of Biggs, who has been visiting her mother, Mrs. Ada Eperson, left this morning for her home.

Mrs. M. L. Beesley and son were in the city this morning on their return trip to La Pine, after an absence of six weeks.

T. A. McCann and J. P. Hennessey of The Shevlin-Hixon Company, will leave Friday night for Minneapolis to attend a sales conference.

Mr. and Mrs. A. E. Fredrickson arrived in Bend this morning from Portland, and have taken over the management of the Wright hotel dining room.

Mrs. Ed Dougherty has taken a temporary position at the local post-office for the remainder of the month. Mrs. Dougherty was formerly in the Baker office.

J. W. Brownlee, timber operator of New Brunswick, arrived in the city this morning from Seattle, on a short business visit. Mrs. Brownlee accompanies him.

G. W. Millican, of Eugene, is in Bend on a short business trip. Mr. Millican is the son of George Millican, Central Oregon Pioneer, whose death occurred last week.

In the last edition of the directory of the American Association of Engineers, a copy of which has just been received here, one member is listed from Bend, R. A. Snow, of the forest service.

J. P. Keyes, Chairman of the Red Cross chapter in Bend has appointed Mrs. E. P. Mahaffey, Dr. Anna Ries Finley, and J. D. Donovan on the committee which will secure information on which the charter's preparations for a recurrence of the influenza epidemic will be based.

Friday—

C. B. Prather, of Silver Lake, arrived in Bend last night.

Miss Margaret Thompson is confined to her home by illness.

Mr. and Mrs. Roy E. King, of Burns, are visitors in the city today.

Mrs. I. G. Anderson returned to Bend this morning after a month's absence.

Miss Nelle Merkel returned this morning from a protracted visit in the east.

Reuben A. Long and Frank Murry of Silver Lake, are spending the day in Bend.

Mr. and Mrs. Harry C. Smith, of Burns, are in the city for a few days, visiting friends.

E. P. Jeck and J. E. Van Huffel, of the Cent-Ore Motor Co., left last night for Portland on business.

F. D. Ballard, representing the Oregon Agricultural College, left yesterday after a brief visit in this vicinity.

Orpha Faults has been kept from attending classes at school this week by a light attack of blood-poisoning.

Siems and Carlson, contractors for Shevlin-Hixon logging railroad construction, have established a new camp at Benham Falls.

Lloyd Magill returned this morning from a business trip to Portland, where he purchased additional stock for the Christmas trade.

A pie social will be held on Saturday evening, December 13, at Roberts Hall, in the Arnold District. Every lady attending is asked to bring a pie.

Members of the Central Oregon Shorthorn Breeders' association will gather at a banquet to be given Saturday evening, December 13, at the Pilot Butte Inn.

Henry G. Klopp, formerly in charge of the sash and door factory at The Shevlin-Hixon Co., plant in this city, was in Bend yesterday on a business visit from Spokane.

N. G. Jacobson, Supervisor of the Deschutes National Forest, left this morning for Fort Rock to attend a meeting of the Northern Lake County Livestock association.

Especially the Walking Kind. Ghosts are regarded as gods in some parts of India.

ADS IMPORTANT TO ALL FARMERS

OREGON AGRICULTURAL COLLEGE, Corvallis, Dec. 11.—With a plan to bring the farmer into closer cooperation with the home newspaper the short course on using advertising to sell farm produce, to be offered Farmer's Week, December 29—January 3, is receiving widespread attention by the farmers, and valuable support by the newspapers of the state.

"The value to the farmer of these discussions on advertising cannot be emphasized too strongly," says Homer L. Roberts, a former news writer for weekly papers in eastern Oregon, and now an industrial journalism student at O. A. C.

"Advertising columns of the home newspaper open a way to cheaper and quicker market facilities. The country press is the farmer's traveling salesman. It will sell his alfalfa or clover seed and grains. I have known of a farmer who had an improved strain of wheat that he wished to introduce to his neighbors. He advertised. The supply was exhausted after the first appearance of his ad."

The producer advertises his prices and the time the product will be ready, and sells a large share of the crop in his own neighborhood. The man who sells purebred livestock will learn the advantages the newspaper offers in placing him in touch with the buyer he wants to meet.

The art of writing advertisements that sell, the preparation of copy for the press, and many other points of practical interest to the advertising farmer, will be explained by C. J. McIntosh of the department of industrial journalism.

COLD SNAP RECALLS WINTER OF 1884-85

Pioneer Resident of Central Oregon Remember Intense Cold, Heavy Snow, and Stock Losses.

Below zero weather of the last two days is nothing in the life of James Smith, hotel clerk at the Cozy hotel, and Central Oregon pioneer, who derives much comfort from a comparison of the temperature now, and the really cold weather which he encountered while riding for stock

made of the popular Beacon blanket. A large assortment of styles and colors, at decided savings \$4.98 to \$12.50

Beautiful Winter Coats Smart Suits and Delightfully Charming Dresses

for Christmas Gifts.

All very moderately priced.

The People's Store

BEND, OREGON

in the winter of 1884-85. No official records were kept at that time, Mr. Smith says, but he remembers vividly the night when the mercury fell to 25 degrees below. "Some of the boys said it was 40," he admitted, "but I wouldn't like to be accused of exaggeration."

To make things worse, four feet of snow fell, and failed to melt for 60 days. Cattle huddled close for warmth, and when a temporary thaw came and was followed by another severe cold snap the resulting crust held the stock prisoners. The loss of horses and cattle was appalling, and the need of reserve stores of feed was brought home to the stockmen in no uncertain manner.

STEPS OF FORMER DAYS POPULARIZED

The old-fashioned country dance will be featured when Percy A. Stevens Post, American Legion, gives its holiday party on December 19, at the gymnasium. It was announced today by Ralph Allen, chairman of the dance committee. There will be modern steps too, but it behooves the exponents of the shivery, shaky, sliding type of terpsichorean effort, to take a leaf from the book of the past and bribe grandmother to initiate them into the mystery of the minuet, the hilarity of the quadrille, and the intricate variety of the Virginia reel.

Maybe there'll be a polka and a set of lancers, too, and the committee intimates that the barn dance may be exhumed, its musty elements laid aside and exhibited to the mystification of the younger generation. Anyhow, there's just time to learn how they did it two or three decades ago, and there's every chance that there may be just as much difficulty in standardizing the stately measures of an earlier day as was experienced in bringing the one-step and the fox-trot to their present state of bewildering simplicity.

The First Cup and Saucer. The beverages of the sixteenth century were water, mead, sack and ale. In the middle of the next century tea was introduced, and with it came the Chinese "or china" teacup. The handle of the cup came from Mediterranean lands. Originally it was made of thick and strong earthenware and applied to heavy jars and lamps.

HOW TO OVERHAUL CREAM SEPARATOR

After the cream separator has been in use for quite a while it will frequently get so it turns much harder than it should. A good plan is to keep an oil can filled with kerosene near the machine and once every ten days put a few drops in the oil holes. This will cut the dust and gum which has accumulated in the bearings. Great care should be used not to get any of the kerosene on the tinware where it will be at all possible for it to taint the milk or cream.

Once or twice a year the machine should be given a thorough overhauling. If the machine has become stained and greasy it may be cleaned with a soft cloth dipped in gasoline, provided no fire or lamps are brought near until the fumes have been carried away.

Next remove all the oil cups and empty them and wash them out in a pail containing about a quart of gasoline. If there is an oil receptacle in base of machine, that should be thoroughly drained and washed out with some kerosene.

Now remove the machine from the base and inspect the bearings. See that the ball bearings are free from

accumulations of dirt and that they turn freely in their seats. If not, they should be removed and all parts cleaned with gasoline. Examine the bowl spindle and see if it wobbles in its bearing. If it does, consult the instruction book and then tighten the bearing according to instructions given.

See that the bowl stands at the proper height. Instructions will be found in the instruction book telling how to set it.

Carefully reassemble all parts and fill all cups with clean oil. If the oil used becomes a little too heavy in cold weather a small quantity of kerosene may be added to it.

Inspect the tinware carefully and if the tinning is worn off in small spots they should be scraped bright at once and covered with a thin film of solder. This will check further rusting.

Tragic Pens.

At the prison of St. Paul, at Lyons, France, there is a curious collection of pens. They are the pens with which the executioners signed the regulation receipts for the prisoners handed over to them to be guillotined. At each execution a fresh pen is used for the purpose, and the ink is left to dry upon it.

Compare

the typebar system, carriage and escapement wheel of the Woodstock with those of other typewriters and you will readily understand why this machine holds up better. It has less parts, too which adds to its durability.

The Rebuilt Typewriter Company DISTRIBUTORS

304 Oak St., Portland, Oregon.

Slightly used Underwoods, Remingtons, L. C. Smiths and other makes of machines can be had at reasonable prices.
