

Here Is Certain Christmas Cheer

The *Brunswick*
ALL PHONOGRAPHS IN ONE
FAMILY

Your Christmas Phonograph is here---All the world's greatest artists at your fireside.

The Brunswick is the Universal Phonograph--All records played at their best.

Postively the finest All-Record Phonograph made. There is nothing you could purchase that would give more real all-around yearly pleasure than one of these wonderful instruments.

Any record you possess may be played on the Brunswick without changing the sound box. The tone regulator is so constructed that you can in-

stantly change from the faintest tone of the violin to the full orchestra or band effect.

Brunswick motors are known for their absolute smooth running qualities, while the sound box has no scratch noise. The tone chamber is correctly acoustically constructed of the finest-grained spruce, producing a tone that has no equal. With the

beautifully designed cabinets and the whole instrument backed by the Brunswick guarantee and service, you are assured of an instrument that is a pleasure to own.

Select your instrument now, pay a small deposit and we will deliver it for Christmas. Our easy terms will appeal to you.

FIRST COUNTY SECURITIES GO AT ABOVE PAR

\$125,000 ISSUE SOLD FOR \$127,750.

WILL BE DEPOSITED

Balances to Draw 4% Per Cent Interest — Central Oregon Bank Only Close Rival of Ralph Schneeloch Co.

Deschutes county's first bond issue, for \$125,000, at five and a half per cent, to be retired over a period of six years, four years after the date of issue was sold to the Ralph Schneeloch Co. Friday afternoon, when sealed bids for the county securities were opened by the county court. The successful offer allows a premium of \$14 on each \$1,000, accrued interest from the date of issue, and the privilege of depositing the purchase price through the bonding house and checking for not less than \$5,000 at any one time, 4% per cent interest to be paid on balances. After a consideration of the six bids submitted, only the Schneeloch offer and that made by E. P. Mahaffey for the Central Oregon bank remained as rivals for the contract. The fact that the latter bid allowed a total premium of \$1,200 as against the \$1,750 of the Schneeloch Co., and that the interest offered on balances was at the rate of four per cent, eventually decided the sale. The Central Oregon bank offered a checking minimum of \$3,000.

Bids Are High.
The feature of allowing interest on balances was presented in no other bids, and was a powerful factor in picking the two chief contenders for the bonds, since, on account of the heavy snowfall, it is probable that none of the money raised by the bond flotation can be used for the next four months. Bonding house representatives who were present, de-

clared that the offers were unusually good, and one of the main reasons for this, it was considered, was because the county has no other obligations of the kind.

Of the other bids, two were presented by C. S. Hudson, for the Lumbermen's Trust Co. and Morris Brothers. The first offered a premium of \$15.10 per thousand, while the second offered a total premium of \$2,180. Neither made any mention of accrued interest. Carsten & Earles, represented by R. D. Moores, offered \$2,796.60 as a premium with accrued interest and the additional feature of furnishing the bonds. E. L. Devereaux & Co. submitted a bid for a premium of \$2,593 plus accrued interest.

VOTE TO MOVE BEND LIBRARY

In view of expected financial aid from the county as well as that from the city, the administration of the aided Friday afternoon at a meeting on a county basis, it was decided yesterday afternoon at a meeting of the library trustees, at which Mrs. C. S. Hudson, Mrs. A. F. Larson, Mrs. J. M. Lawrence, Mrs. A. C. Lucas, and R. W. Sawyer, were present. It was considered that because of the more nearly adequate financial support which is to be given, it will not be necessary for the Library club to continue its work in assisting in the upkeep of the institution.

The meeting voted to approve the removal of the library from the Baptist church to the Athletic club, and it was decided that a contract should be let for the construction of a soundproof partition to separate the front second story room, where the library is to be housed, from the gymnasium. New shelves will also be installed.

Inquiries will be made to other cities throughout the state where county libraries are maintained, in order to ascertain the best systems of organization, and the matter of ordering new books will not be definitely taken up until the institution has been put on a county basis.

WORK TO FREE ROADS OF SNOW

OPERATIONS RUSHED BY COUNTY COURT

Many Teams and Men Hired to Break Way Through Blockade, to Connect Towns and Rural Communities.

Making a strenuous endeavor to penetrate the snow blockade on the roads of Deschutes county, the county court worked men and districts, when it was seen that the storm was definitely ended. Plowing was not found feasible, but teams are being driven four abreast breaking out the roads, and drags may be put on later.

Eight teams which had been worked by Siems & Carlson on the McKenzie Pass highway, were driven from Sisters through Cloverdale and will meet teams from Redmond in the vicinity of Cline Falls. The work from Redmond was under the direction of Lynch & Roberts. At Lower Bridge, Gus E. Stadig started four teams toward Terrebonne, and communication between Redmond and Powell Butte was rapidly opened up. From Tumalo, J. M. Griffin worked toward Deschutes, while from the other end of the road, Charles Redfield was in charge. Anton Anne directed operations from Bend to Tumalo, Charles Going broke a road from here on the Bend-Burns route, and L. C. Roberts worked between Bend and the McKinley mill.

Home.
Home cannot be given us. We may be given a house, a place to eat and sleep. This is not a home. A home is a place of love and rest and peace. Love and rest and peace must be earned, must be earned. Nobody can hand them to you as so many packages. They are matters of reciprocity. If you have none to give, there will be but little for you to receive.—Westru Methodist.

FIRE CAPTAIN IS VOTED OUT

CHARGES OF DISOBEDIENCE AND OVERSTEPPING AUTHORITY PREFERRED AGAINST HARRY RILEY.

At the close of the stormiest session in the history of the Bend Fire Department, Captain Harry Riley was dismissed from the service by a vote of 13 to 3 Monday night. Disobedience of orders, and overstepping the bounds of his authority, were the charges preferred against him. The meeting lasted until midnight. No appointment was made to fill the vacancy created, this being left until the next regular election. Unfinished business which was set aside because of the lengthy hearing, will be taken up at an adjourned session tonight.

Considerable trouble has been experienced at the fire station because of the difficulty in distinguishing per-

sonal phone calls from alarms, every man on the department on duty immediately running to his post whenever the telephone rings, usually to find that the call is merely for some member of the force. To eliminate this source of confusion, Manager J. L. Gaither is planning to install, if possible, a system by which the two classes of calls will be readily distinguishable. For his interest in the matter, a vote of thanks was extended by the firemen.

CATERPILLAR WORKS ON STATE HIGHWAY

Huge Tractor Used to Clear Road to La Pine—County and State Share the Expense.

As the very latest idea to be tried out in clearing the county roads from their weight of snow, a 17 ton, 125 horsepower caterpillar tractor, owned by Oskar Huber, contractor, was received in Bend this week, and is being worked on the Bend-La Pine road. If successful, it will be put on other roads later. The expense is being shared equally by the

county and the State Highway commission.

From the other end of the La Pine road, C. McLoughlin with a caterpillar ditcher, is digging a way through the snow.

BEND MAN INVENTS NEW PAVING BLOCK

An interlocking paving block, particularly suited for use on bridge floors and for use in factories and warehouses, is the invention of W. H. Hollenbeck, clerk at the Pilot Butte Inn, and is now going through the U. S. patent office. The locking device is provided by slots which coincide when the blocks are laid, and which are larger at the lower side than at the top. The use of an asphalt compound poured between the wooden bricks, produces a high degree of strength, at the same time giving a pavement which is absolutely impervious to moisture, Mr. Hollenbeck states.

Mow Cruel
Edith—"Loss of sleep, you know, means loss of beauty." Maud—"Indeed. How long have you been troubled with insomnia?"
