## NEED SHOWN FOR GASOLINE SAVING

Never in the history of the state of Oregon has there been a greater need for the conservation of gasoline than now, according to W. L. Dalziel, deputy state sealer, who is in the city enroute to Klamath Falls on official business.

"The uses to which gasoline should be put now for some time," says Mr. Dalziel, "should be confined as closely as possible to absolute business purposes. The automobile owner can effect a great saving and aid business materially if principles of conservation are used."

"The Oregon towns are going to be called on heavily in the next few weeks to supply gasoline for motorists who will visit Oregon, and especially in this true of the Shriners who will visit the state enroute to the convention in Portland next month."

## Do You "Hate" Yourself?

For I say, through the grace given unto me, to every man that is among you, not to think of himself more highly than he ought to think.—Paul in his letter to the Romans, 12:3.

## DOULTRY NOTES

Be sure chicks do not become crowded.

It is necessary to save some of the old hens for breeders.

Ducks and geese can usually be raised very economically on most farms.

The wild breeds of turkeys are known as the North American, Mexican and the Honduras.

There are many farmers not now raising ducks and geese, but who could find raising them profitable.

Young hens will pay well for care and feed, but if they do not get good treatment they will not produce much profit.

Dampness is always more dangerous than cold, and that's why it is so important to have the hen house tight and dry.

## PARTNERSHIP DISSOLVED.
