CHIEF ENGINEER GAINS 30 POUNDS

Had Not Been Able to Work for Five Years—Is Back at Old Job Since Taking Tanlac.

"I had not been able to work for five years before I started taking Tanlac, but now I am not only back on the job, but have gained 30 pounds in weight," said G. F. Henry, 2540 Fifth avenue, West Seattle, Wash., chief engineer of the tugboat "Wallowa."

"Five years ago," continued Mr. Henry, "I was compelled to give up my job as chief engineer of the tugboat 'Wallowa,' as I was almost a complete physical wreck. My stomach was in a terrible condition and I suffered from indigestion of the worst sort. While my appetite was very poor, and I ate but little, even the little I did manage to eat would sour. I would bloat up with gas and have intense cramping pains in the pit of my stomach. My kidneys were in bad condition and I suffered with such pains in the small of my back it felt like it was breaking in two all the time and the muscles seemed to draw in knots. The vibration of the boat would cause my back to pain me so I could hardly stand it, and I finally just had to quit work. My head ached nearly all the time so bad I could hardly see, and at times I would become so dizzy I could hardly keep from falling. I was extremely nervous and this, together with worry over my condition, kept me from sleeping, and I would lie awake all night long nearly every night and always got up in the morning feeling worse than when I went to bed. I was in such a badly run-down condition I was barely able to get around at all and had lost weight until I was scarcely more than a frame."

"I had tried so many different treatments and medicines without getting any benefit I had just about given up hope of ever getting well, but as I had heard so much about the good Tanlac was doing others, and as several of my friends wanted me to take it, I decided to give it a trial. Well, sir, I began to get better almost as soon as I started taking it, and as I continued taking it, I continued to improve until today I am a well man. I have a splendid appetite and eat just anything I want without suffering any bad after-effects whatever. My kidneys are in splendid condition and the pains in my back are all gone. I never have a headache or become dizzy any more and can sleep as sound as a log all night long every night and always get up feeling rested and full of life. Tanlac has surely put me on my feet again and I am back at my old job on the 'Wallowa,' feeling just like a new man, and can do my work with the greatest ease."

Tanlac is sold in Bend by the Owl Drug Co., in Sisters by George F. Aitken, and in Bend by the Horton Drug Co.

TO DOUBLE VALUE OF STOCK

President of Michigan Association Wants Every Farmer to Agree to Use Only Purebreds.

St. Joseph county, Mich., plans to double the value of its live stock within three years. Current activities to accomplish the purpose are described by William T. Langley, president of the St. Joseph County Live Stock Breeders' association, in a statement he has furnished the United States department of agriculture.

"We want every man," he declares, "to give us a pledge to use nothing but purebred sires."

"We have a sign in the making that reads 'Purebred Sire Farm' that we want posted on every farmyard gate."

"We want nothing but high-grade and purebred females."

A general association has been organized that includes the members of the various breeding associations and also all breeders of grades that pledge to use only purebred sires.

GROUND RYE BEST FOR PIGS

It is Better Mixed in Equal Parts With Middlings, Ground Oats, Barley or Corn.

It is generally recommended that rye be ground for feeding to pigs. It is best mixed in equal amounts with middlings, ground oats, ground barley or corn. If the mixture is placed in the self-feeder, care must be taken to see that there is a good supply of water available for the pigs. They should have continual access to salt also.

LIVE STOCK NOTES

The higher the breed of cattle, the better is the beef.

There is no danger of a good grade of tankage spreading hog cholera.

A good bull is just as good as a stag as far as market value is concerned.

Horses are as poor as their feet. Always examine this section of their anatomy when a trade is in prospect.

STEER-FEEDING EXPERIMENT

Cottonseed Meal and Velvet Beans Used With and Without Addition of Shelled Corn.

In a steer-feeding experiment conducted last year on the government farm at Beltsville, Md., four lots of two-year-old steers were fed. The purpose was to compare cottonseed meal and soaked velvet beans when used with and without the addition of shelled corn.

The addition of corn to a ration composed of corn silage, cottonseed meal and wheat straw did not pay. The addition of corn to the ration of velvet beans and corn silage was profitable.

The lot receiving corn silage and soaked velvet beans with a small quantity of cottonseed meal as an appetizer produced the most economical gains and showed the greatest profit, even though the daily gains and the selling price of the cattle were lower than those of any of the other lots.

MORE HOGS ARE NEEDED NOW

Every Farmer Must Put Forth Best Endeavors to Produce More Pork This Season.

If we expect to continue to provide meat to foreign peoples as well as our own people, every farmer must put forth his best effort to produce more hogs. Hogs can be kept profitably upon many farms where they are not found today. Farmers who already produce hogs can produce more, for there is not much chance of producing meat this year in excess of the requirements.

MERCHANT-CLERK PICNIC PLANNED

Outing To Be Enjoyed at Head of Metolius River All Day Wednesday of the Coming Week.

This occasion will be the first annual merchants-clerks' picnic. The stores of the Bend Merchants' association will be closed all day Wednesday, July 21.

Here's where we call a spade just that

THE POET says a rose, BY ANY other name, WOULD SMELL as sweet, AND THAT'S all right, BUT CALLING, SOMETHING ELSE a rose, WON'T CHANGE its smell. OF COURSE not, AND I'M not knocking, BUT JUST telling you, RIGHT OUT, THAT THERE are only, THREE GRADES, OF TURKISH tobacco, FIRST, GOOD Turkish, WHICH is mighty good, AND ALSO expensive, AND SECOND.

POOR TURKISH tobacco, WHICH is less expensive, AND NOT so good, AND THIRD, tobacco, CALLED TURKISH, which, NEVER SAW Turkey, BUT GREW thousands, OF MILES away, AND DOESN'T even, TASTE LIKE Turkish, AND IT'S the good Turkish, THAT'S REALLY from Turkey, THAT YOU get, IN THE cigarettes, THAT SATISFY.

OUR resident buyers in Turkey are experts. They know we want the best—and we get it. And the same with Domestic leaf. Blend them together—by that can't-be-copied method—and you get a smoke that actually does "satisfy."

Many of the picnickers will leave the night before the festivities actually begin, in order to camp out. The merchants' families and invited guests will start early Wednesday morning, to be followed by trucks carrying such prepared eats as will be assembled by the O. I. C. cafeteria.

The morning will be spent in various activities, but a set program for sports and amusements has been arranged for the afternoon, when the men and women will show their skill in various outdoor sports.
