

WORK STARTED ON EXCAVATION FOR HOSPITAL

LONG DEFERRED PLAN UNDER WAY

COST IS SET AT \$60,000

Four Story Structure to Be Built By Sisters of St. Joseph—Many Modern Features Will Be Incorporated in Building.

After approximately a year of careful investigation and study relative to hospital needs of Bend and Central Oregon by the sisters of the Order of St. Joseph, many of whom have made trips to Bend previous to the war, and subsequently, work was started on the erection of the promised Sisters' hospital on Saturday when the first spadeful was turned in excavation by A. B. Taylor, who was awarded the contract for this work.

Although compelled to abandon many of the features originally contemplated in the erection of the new hospital, owing to the rapid rise in construction costs, the sisters have planned, through Lee A. Thomas and his associates, the architects, a structure complete in all its essentials and modern in every respect and large enough to accommodate every need of the patronage it will serve.

Cost to Be \$60,000.

The new structure will occupy a space of 37x67 feet, facing the new Catholic church on Franklin avenue. It will be four stories in height, including a full basement; will have accommodations for 50 beds, including sisters' quarters, and three wards. The structure will be of Tudor-Gothic architecture, with cement trimmings. The exterior walls will be of re-pressed brick and will conform in most of its features to the type of architecture of the new Catholic church now under construction opposite the hospital site.

According to Mr. Thomas, the cost of the structure alone will approximate \$40,000. In addition to this will be added the cost of equipment, which will bring the total well toward \$60,000.

Some of the features of the new institution will be the silent alarm system, with central switchboards, diet kitchens on each floor and ele-

vator. The sanitary features will be of the most modern hospital plumbing type. The operating room will be large and thoroughly modern and complete in every detail, with sterilizing rooms and lavatories.

MOOSE PROGRAM LIKED BY MANY

MORE THAN 200 MEMBERS AND VISITORS HEAR REPORTS ON CONVENTION, AND TALKS ON MERITS OF THE ORDER.

Upwards of 200 members of the Loyal Order of Moose and visitors attended the open meeting held on Thursday at Sather's hall, a part of the program of the Moose membership drive, which closed on July 19. A well balanced program was given and address were delivered by E. A. Sather on his recent visit to the grand lodge convention held at Chicago, and by H. H. De Armond and Judge T. E. J. Duffy, on the merits of the order.

The program for the evening was as follows:

Seating of officers, saluting of flag; singing "Star Spangled Banner"; invocation, Prelate Beavens; selection, quartet; address, H. H. De Armond; selection, Mrs. Charles Silvis; Loyal Order of Moose service in memory of children of Mooseheart; "Nearer, My God, to Thee", quartet; "Impressions from the Convention and Mooseheart Institution", E. A. Sather; solo, "Mooseheart", Miss Wagner; address, Judge T. E. J. Duffy; solo, Charles Wilson; prayer, Prelate Beavens; "My Country, 'Tis of Thee."

An application has been sent in to the grand lodge, asking for an extension of time in the membership drive, for a purpose of more generally familiarizing the public with the merits of the order.

Arrangement are being made by the Bend local to hold a dance at Redmond July 17. The Moose will furnish free transportation to Redmond for those desiring to attend the dance from here, the public being extended a cordial invitation.

Plans also are well under way for a picnic July 25, to be held at Tama-lo Island. This also will be open to the public.

RAISE STANDARDS OF STOCK

Activities of Live Stock Association Illustrate Benefits of Co-operation.

The manner in which co-operative buying can further the movement for better stock is illustrated by the activities of a live stock association in northern Wisconsin. It purchased 32 head of fine cattle from another part of the state and also several head from its own vicinity. The association sold these animals individually to various stock raisers. The money netted by the transaction was used in further promotion of the purebred cause by purchasing 8 purebred bull calves. The calves were then distributed by lot among the members of the association. Thus the co-operative effort of the association has made possible raising the stock standards on the farms of practically the entire community, having brought into the county \$16,000 worth of well-bred live stock.

KEEP PUREBRED LIVE STOCK

There is No Danger of an Oversupply and Efficiency Has Been Conclusively Proven.

There never was a time in history when pure bred livestock of all kinds received more attention than now. The efficiency of pure bred livestock has been conclusively proven. There is no danger of an oversupply.

CONSIDER SHEEP AND GOATS

Animals Worthy of More Attention Than They Receive—They Keep Down Noxious Weeds.

Sheep and goats deserve more consideration than they receive on some farms. These animals are able to eat some of the coarse feeds and may keep down noxious weeds in pastures.

LIVE STOCK NOTES

The price of successful lambing is eternal vigilance.

Sows should not be bred to farrow until they are at least twelve months old.

Forage crops furnish the best possible way of cheapening the cost of pork production.

German millet hay, properly cured, is a very good feed for cows but not very satisfactory for horses.

SUMMER HOME OF BEND ELKS PLAN FAVORED

\$120,000 IS ASSURED BY GRAND LODGE

METOLIUS SITE LIKED

Money to Be Available If Report on Building, Financing and Maintenance Plans Are Approved At the Next Session.

Approval by the grand lodge of Elks, in its 1921 session at Los Angeles, of the plans of Bend lodge No. 1371 for the financing of the projected Elks' summer home at the head of the Metolius, will result in \$120,000 from the lodges of the United States being available for the construction of the building, according to action taken by the 1920 grand lodge, in session at Chicago, it was learned here last Thursday by prominent members of the order.

The question of the construction of the home in one of the best known of Central Oregon's natural beauty spots was referred to the rules of order committee for a report, later receiving unanimous approval by the grand lodge. The committee was instructed to make full investigation of the plans of the Bend lodge for building, financing and maintenance, the report to be made at the Los Angeles session.

The action thus taken is the only instance of its kind in grand lodge sessions and is taken as virtually assuring for Bend a position as a center for B. P. O. E. summer activities, while adding greatly to the publicity which Bend and Central Oregon will receive throughout the United States.

E. P. Mahaffey, exalted ruler of the Bend lodge, headed the delegation of local Elks at the Chicago grand lodge.

PLAN STATION FOR U. S. P. H. S.

OFFICIALS OF PUBLIC HEALTH SERVICE INTERESTED IN MAKING BEND CENTER FOR TREATMENT OF EX-SERVICE MEN.

The attention of the United States public health service, with district offices in Seattle, has been directed to Bend as a possible location for the establishment of a receiving station to examine and treat all cases of ex-service men whose health has been impaired as a result of military or naval service. This became known upon the return from Seattle of Dr. A. Lessing of this city, where he conferred with Major Hugh De Valin, surgeon in charge of the 13th district, U. S. P. H. S.

The details Dr. Lessing could not make known, as his conference dealt only in general features, but he stated that the public health service is concerned in establishing a central station here for all of the territory south of The Dalles and as far south as Klamath Falls, in which more than 1000 ex-service men reside, a large number of whom either have applied for medical attention, or are likely to do so.

Major De Valin is particularly concerned as to hospital facilities which will pass rigid army inspection, so far as sanitation and equipment is concerned. Dr. Lessing pointed out the unusual climatic conditions of Central Oregon as favorable for such a station, and will communicate with the United States public health service, working in cooperation with the local post of the American Legion and the Red Cross.

Dr. Lessing has had wide experience in this work, having been a major in the medical corps, with extensive overseas service.

GREEN FEEDS ARE ESSENTIAL

Little Chicks Cannot Eat Too Much, and It Pays to Supply Them With Cut Clover.

Young chicks cannot eat too much bran or green food. It pays to give them as much cut clover as they can eat while they are in the brood house and allow them plenty of green food on the range as soon as they are able to forage for themselves.

Put it in The Bulletin.

It's dollars to doughnuts—
no man ever smoked a better cigarette at any price!

CAMELS quality, and their expert blend of choice Turkish and choice Domestic tobaccos hand you a cigarette that will satisfy every smoke desire you ever expressed. You will prefer this Camel blend to either kind smoked straight!

Camels mellow-midness will certainly appeal to you. The "body" is all there, and that smoothness! It's a delight!

Go the limit with Camels! They will not tire your taste. And, they leave no unpleasant cigarette aftertaste nor unpleasant cigarette odor!

Just compare Camels with any cigarette in the world at any price!

Camels are sold everywhere in scientifically sealed packages of 20 cigarettes for 20 cents; or ten packages (200 cigarettes) in a glassine paper-covered carton. We strongly recommend this carton for the home or office supply or when you travel.

LINE IS DRAWN FOR TEACHERS

NORMAL COURSE ADDS TO SALARIES

Instructors Without Specified Special Training to Be Retained at Basic Rate—Objections to Use of Central Building to Be Heard

Teachers in the Bend school who are not normal school graduates will not be allowed to participate in advances in salaries which go into effect next year, but will be retained on the basic rate, it was decided, when the board of directors of district No. 1 held its regular meeting. The board raised the summer salary of William Harris, janitor at the high school, from \$120 to \$140 per month.

Standing committees for the year were appointed, Mrs. E. M. Thompson and C. A. Hayden constituting the committee on teachers, J. P. Keyes being placed in charge of the fuel question, H. E. Nordeen and L. M. Foss on buildings and grounds, Mr. Foss and Mr. Keyes on finance and purchasing, and Mr. Hayden and Mrs. Thompson on sanitation.

The proposition made by the Y. M. C. A., that the district pay \$166.66 per month for the use of the gymnasium by the schools, was left over for later discussion.

That Fire Chief Tom Carlon has protested against the use of the Central building for school purposes was reported, and it was decided that no further improvement of the building should be made until Mr. Carlon could be present to explain his objections.

SKYLINE HIGHWAY WORK TO COMMENCE

Wenatchee Forest Official Arrives to Join Horton on Trip to Diamond Peak.

To take part in reconnaissance work to determine the general location of the Cascade Skyline highway, F. B. Lenzie, grazing examiner for the Wenatchee National forest, arrived in Bend last week and will start out tomorrow with Grazing Examiner Jack Horton of the Deschutes forest for Diamond Peak. There they will be joined by other members of the party, who are starting from Medford. The work will last during the remainder of the summer.

Origin of Coal.
After an exhaustive study of a number of coal seams James Lomax concludes that almost all had their origin in vegetable matter deposited on the spot, the coal substance being formed by the dropping of leaves, twigs, barks and fruits, in the shape of seeds and fructiferous cones mainly from large trees.

"The Mule."
Being told to write a brief essay on "The Mule," Howard turned into his teacher the following effort: "The mule is a hardier bird than the gase or the turkie. It has two legs to walk with, two more to kick with, and wears its wings on the side of its head. It is stubbornly backward about coming forward."

BUTTER FAT!

Same price for Butter Fat f. o. b. Bend as is paid f. o. b. Portland.

Central Oregon Farmers Creamery

THE CONCRETE S-I-L-O.

PERMANENT AS PYRAMIDS

When you erect a Silo, you want a Silo that will stand the test of wind, rain, snow, frost and sun. In the Hollow Concrete Silo Block you obtain this feature, and besides a concrete block is absolutely fire-proof. Will not warp when empty. No guy lines necessary.

Eventually Concrete Why Not Now?

For specifications, write to

Concrete Pipe Co.

BEND, OREGON

Makers of Culvert Pipe, Water Pipe, Irrigation Pipe, Building Blocks, Hollow Silo Blocks, Well Curbing.

MILLIONS FOR SPARE MOMENTS

The International Correspondence Schools of Scranton, Pennsylvania, celebrated their twenty-seventh anniversary in October, 1919, with an enrollment of over 2,500,000 students. Thousands of these students have figured in dollars and cents the actual value to them of the spare moments devoted to the study of I.C.S. technical courses and other subjects ranging from Advertising and Salesmanship to Agriculture and Poultry Husbandry.

\$95.00 an hour has been figured by many of these students to be a conservative estimate to them of the value of the spare moments spent in study of I.C.S. Courses.

Reports on 27,000 typical students show 14,999 now receiving \$1,500 a year or more; 2,451 receiving \$2,500 or more; 412 receiving \$5,000 or more; 20 receiving \$10,000 or more; and 8 with annual incomes of \$25,000 or more.

In the twenty-seven years of its existence the I.C.S. has enrolled six times as many students as Harvard in the two hundred and seventy-eight years since its organization; more than ten times the total enrollment of Yale since its doors swung open in 1701; more than five times the total enrollment of all of the colleges, universities and technical schools in the United States combined.

A letter or a post card will bring complete information regarding the subject in which you are interested.
