

# 1920 FALL SHOWING OF

# SUITS COATS DRESSES

**A** GAIN, the J. C. Penney Co., with its enormous buying power stretching from the length and breadth of the country, comes forth first in the showing of its splendid array of Autumn Suits, Coats and Dresses.

Appreciating the unprecedented patronage we had last year and during the Spring and Summer of this year, we are better prepared this season to accommodate the needs and desires of every woman in Bend and Central Oregon with our exceptional showing of new Fall Garments. Quality and price figure most prominently in these garments. Owing to the enormous purchasing power of the J. C. Penney Co. with its corps of expert buyers in direct touch with the New York garment markets, the Bend buyer has the same purchasing accommodations as the woman in New York. We feel safe in saying that never before have we been so fortunate as now in being able to give value at such remarkably low prices as this Fall. We cordially invite you to drop in. Our saleslady will be happy to show you any garment.

## A Word or Two About the New Fall Things

### New Fall Coats

There is a great variety of styles shown in coats. The plush are being shown in thirty-three to forty-eight inch lengths; the short sleeves being made with a large flare. The tendency in neck style is toward the cape collar. The coats are tailored in both the loose and belted models. The cloth coats vary in lengths from forty inches to forty-eight inches, and are in both the loose and belted models. The cape collar idea prevails in the cloth coats as well as the plush coats. The outstanding materials used are: tinselstone, silvertone, goldtone, velvet, chamotte-cloth and Bolivia, with one cloth as popular as another.

We have just received a large shipment of these new coats and it will be a distinct pleasure to talk to you about them.

### New Fall Suits

There is a wide variety shown in Suits. Every woman, no matter to what her tastes tend, she should obtain a garment to her liking. A majority of the suits incline toward the tailored models. The coats are from thirty-two inches to forty-eight inches long. The Fall skirts are about the same length as those shown during the last Spring and Summer. The prevailing shades will be navy, brown and taupe; while a few are being shown in burgandy, rookite and sand. The prevailing materials are tricotine, noiset twill, serge, velvet, tinselstone, silvertone and goldtone.

### New Fall Skirts

Indications point to fewness of silk skirts this season. The wool skirts, however, are very attractive. The novelties such as stripes and plaids, are in beautiful color combinations with a great number in pleated models. The knife pleating, box pleating and side pleating predominate. These pleating effects are especially effective as they do not muss when sitting in them as do the accordion pleated effects. Styles are very effective in plain materials. Brown tones in novelties predominate. The plain materials such as tricotine, serges and poplins, are shown mostly in navy.

### New Fall Hats

We are now showing on our balcony a clever assortment of Women's and Misses' Hats. The prices of this head wear will charm you as will the simplicity and smartness.

### New Fall Wool Dresses

Dresses—The new fall dresses are made in attractive styles along long lines and many of them are elaborately trimmed in embroidery and braid, some with bugle bead trimming. The three-quarter sleeve length is the most popular. Navy is the leading shade with brown and taupe popular second.

In silk dresses satin and charmeuse lead as to materials. There are models from the extreme fitted model to the long line model, with a general tendency toward fullness over the hips.

Children's New Fall Shoes

**Great Men Actuated by Dreams.**  
Almost all the great characters of Herodotus believed that dreams were of supernatural origin. Kings resigned their scepters, Cambyses assassinated his brother, priests attained great powers as commanders, cities which had been destroyed were restored; by men who changed their plans and performed those acts because warned, as they supposed, in dreams, and with the invasion of Greece by Xerxes such night visions had much to do.

**Romantic Bohemia.**  
All Bohemia is a land of romance. In the hills and mountains there are picturesque castles perched upon the craggy mountains or concealed cleverly in rocky clefts. The very name Bohemia is associated with wild and wonderful legends of the rude barbaric ages. It has been the battleground of nations. Today it is the land of story and legend, as in the olden days it was the land of loyal knights and robber barons.—Yeats's Companion.

**May Day in Scotland.**  
In Scotland May day was long known as Beltane. "Beltane" is a corruption of Belt Time, and the ancient May day ceremonies which were observed in Scotland until not so many years ago were survivals of the old Bani or fire worship, which in former days held sway over the greater part of the Eastern hemisphere. The ancient ceremonies involved the burning of bonfires, the drawing of lots for sacrifice, and even a mock simulacrum of the sacrifice itself.

**Tests of a Good Thermometer.**  
In order to ascertain whether a thermometer is correct or not, it is first plunged into melting ice and then into boiling water; the level of the mercury should indicate upon the scale exactly 32 degrees and 212 degrees Fahrenheit. When inverted the mercury should fall with a sudden click and fill the tube, thus showing the perfect exclusion of air.

**Variety in Breads.**  
Variety in breads is more important when the lunch must be carried than at other meals because of the danger of monotony. Wheat bread, whole-wheat bread, corn, rye, or oatmeal breads; nut, raisin, and date breads, beaten biscuit, rolls, crisp baking powder biscuit, or soda biscuit, and toast, zwieback and crackers may be used in turn to give variety.

**Natural Preference.**  
We are more easily persuaded in general by the reasons we ourselves discover than by those which have been suggested to us by others.—Pascal.

**Reward of Duty.**  
The reward of one duty is the power to fulfill another.—George Elliot.

# FARM POULTRY

## BROOD COOPS FOR CHICKENS

Directions Given for Construction of Cheap and Effective Pens for Little Chicks.

The accompanying drawing gives an idea of how quickly and cheaply any number of brood compartment coops can be constructed. It shows only two sections, but any desired number can be put together, saving material. We suggest that only three at the most be united, as they are easier handled when desiring to remove to new quarters, says a writer in an exchange.

The one section shows the door closed and button turned to hold lid up at night. The other section shows the door down for daytime to allow the hen and young to range in the orchard or pasture, wherever the coops may be located.

A very convenient size both for cutting material and the handling of completed coop has been found to be as follows: Twenty-four inches high in front, 18 inches high at rear, 18 inches deep from front to back. One-inch holes can be bored at each end and a line of them through the top of the door, as indicated by the closed door in drawing. Also, if the roof boards are allowed to project over back wall several inches it is not a bad idea to bore a few holes in the back wall. Some farmers have been very thoughtful and constructed similar coops during the cold, wet, sleety weather the last winter when nothing in the field could be done, and they are ahead much when the fields demand so much time and attention at this season.

Shingles or prepared roofing, whatever is convenient, will make an ideal

## Homemade Brooders.

covering for the roofs. We have seen where a farmer having a half dozen such constructed coops used galvanized iron from an old shed in town that he obtained for the hauling.

## AVOID HIGH-FLAVORED FEEDS

Onions Have Been Fed in Sufficient Quantities to Affect Eggs—Color of Yolk Influenced.

In extreme cases the flavor and odor of the feed have been imparted to the egg. Onions have been fed in sufficient quantity to bring about this effect. Those who desire to market a first-class article should not give feeds of high and objectionable flavor to their flocks.

In no case should tainted feed be allowed to enter the ration. Feed also has an influence on the color of the yolk, according to the United States department of agriculture. Corn fed exclusively will give a deep yellow or highly colored yolk, while wheat fed alone will produce a much lighter yolk. A fairly high-colored yolk is usually preferred and can usually be obtained by feeding a moderate amount of corn. Plenty of green feed also enriches the color of the yolk.

## DO NOT OVERCROWD POULTRY

Few Hens in Small Yard Do Better Than Larger Number in Same Space—Room for Each.

Better results will be obtained from a few hens in a small yard than from a larger number in the same yard. The backyard poultry flock rarely will consist of more than 20 to 25 hens, and in many cases only a half-dozen hens are kept. For a flock of 20 to 25 hens a space of not less than 25 by 30 feet is required. From 20 to 30 square feet per hen should usually be allowed.

## LARGE BREEDS GROW SLOWLY

Brahmas and Cochins Are Profitable Where There is Demand for Heavy Fowls.

The biggest breeds of poultry, like Brahmas and Cochins, grow more slowly than the medium-sized breeds and therefore are not ready for market as soon, but they weigh more and are profitable where the market demands a large-sized fowl.

## NEEDED EXERCISE BY FOWLS

Hens Can Be Kept Busy by Scattering Grain in Litter on Dry and Clean Floor.

Be sure that the floor of the henhouse is dry and reasonably clean and covered with three or four inches of clean litter in which grain can be scattered so that the fowls can obtain exercise scratching for it.

## SAVE YOUR SUGAR SACKS

This dress was made at a cost of 40 cents by Miss Doris Peterson of Bellingham, Wash., a high school girl, who seems to have solved the women's clothes problem in part at least. The material is sugar sacks, some colored cotton plus two hours of labor, and presto! an attractive dress. Miss Peterson gets the medal.

## CLASSIFIED ADVERTISEMENTS

Classified advertising charges per line 20 cents for 20 words or less. One cent per word for all over 20. All classified advertising strictly cash in advance.
