

LARGE CROWD PLEASSED WITH BRILLIANT PAGEANT GIVEN BY PLAYGROUND DEPARTMENT

Graceful interpretive dancing, artistic costumes and excellent music rewarded the hundreds who gathered on the Reid School lawn Tuesday evening to witness "The Heart of the World," the pageant given by the playground department of the Y. M. C. A., under the direction of Miss Ella Dews.

The pageant tells the story of a boy, Doodatus—a part taken by Lloyd Lamping—who is carried to the heart of the world in a dream. After seeking through the myths of many races, he appears as a mortal bewitched, who can only be released from the spell by the love of another mortal. The boy breaks the spell and leaves the spot to find the heart of the world among human-kind.

In the opening part the Spirit of Poesy (Miss Hilah Brick) appears as the guiding spirit of the boy. A band of dryads, clad in green and brown, followed, and in their nature dance presented one of the most enjoyable features of the evening. Marjorie Baird, Alice Stockman, Marion Sather, Helen King, Jeannette Keyes, Louise Inabnit, Mary E. King, Christine Stringer, Leora Connara and Jean Richard appeared in this number. The solo dance by Kathryn Day as Aurora was natural and excellently handled, while another solo dance of merit was given by Ernestine Hupprech as Persephone. Frances Heyburn, Lola Whitmore and Kathryn Heyburn presented the dance of the graces in a finished manner. Others who appeared in the first act were Harlow Allen, as Hermes, guide for Deodatus, and Bessie Lemley as Psyche.

In the second act Deodatus is aroused from a nap by a band of dwarfs, trolls and elves—Elizabeth Keyes, Margaret Allen, Helen Whit-

tington, Catherine Plunkett, Rosine Forrest, Margaret Forrest, Jean Allen, Mary K. Taylor, Frances Taylor, Margaret Taylor, Ruby North, Doris Hudson, Helen Wienecke, Ethel Bowman and Clara Innis—under the command of Marjorie Smith as Andvari, king of the dwarfs. The little people, long-bearded, in gray, with the exception of their red caps and shoes, alternately plagued the lad and danced about him, then appeared with a child stolen from its home. The baby (Helen Donovan) was one of the most popular actresses of the entire pageant. Dolores Catlow was the mother from whom the child had been taken.

Fairies, capably led by Lola Whitmore, appeared in the third act. Mary Taylor, Anna Dornecker, Helen McMunn, Helen Vinal, Lila DeBoer, Gladys McConnell, Celesta Kleinfeldt, Anna McNeil, Alice Holmes, Eloise Spencer, Rose Miller, Ernestine Hupprech, Mildred Simmons, Amy Hinman and Nedra Toomey were the gaily attired beings under the fair queen's dominion. An exceptionally well rendered vocal number was given by Mrs. Ashley Forrest, who sang "When You Look for the Heart of the World" as one of the musical features of the production.

The orchestra, under the direction of J. D. Graham, had as its other members: Connie Knickerbocker, piano; F. O. Minor, bass viol; G. C. Maiby, cello; Olaf Halvorsen, violin; Charles Graham, clarinet; Dr. R. D. Ketchum, trombone; Ashley Forrest, George DrFrayne, cornets; Ole Halvorsen, drums.

The grounds were patrolled by a detail of boy scouts and ushers for the evening were: Gladys Sather, Bessie Smith, Eva Whittington, Nellie Leslie and Mildred Klein.

BEAUTIFUL EXHIBITS SEEN AT FLOWER SHOW ATTRACT ATTENTION OF MANY IN CITY

With floral displays and collections of potted plants filling the tables ranged along the walls and in the center of the new Downing building on Wall street, the Flower and Vegetable show, under the auspices of the Women's Civic Improvement league, opened Wednesday, the morning being devoted to the receiving and arranging of exhibits. All afternoon crowds filled the room in which the show was held and an even greater attendance is expected tonight. The doors will close at 9:30 o'clock.

Awarding of prizes started early this afternoon and up to 3 o'clock the judges were still busy. In competition for the chief awards, the display entered by Mrs. C. W. Hayes

won the Emblem club cup, while second place was conceded to Mrs. H. K. Brooks. Competitors for the cup were required to submit at least five varieties of flowers, to be judged according to artistic arrangement. The Commercial club cup, the other special prize, was won by the Pilot Butte Inn exhibit. Mrs. C. J. Nicholson placing second. Greatest variety and perfection of bloom were the deciding points for this award.

Flowers and plants offered for sale drew much attention, many of these being donated, the proceeds to go to the establishment of a fund to help defray the expenses of the 1931 show. Money received from the sale of refreshments is to be devoted to the same purpose.

DOULTRY NOTES

Select vigorous birds.
Grow your own poultry feed.
Supply an abundance of fresh water.
Don't allow growing chicks to crowd.
Goslings do not need feed until they are 24 to 36 hours old.
Dispose of the male birds not later than June 1. Market a better quality of eggs.
Young turkeys do not bring out of the shell so much unused yolk as do young chickens, hence they must be fed earlier.
The heavier breeds, such as Rocks and Reds, and Orpingtons, will not take the perches as readily as Leghorns and Anconas.
Columbus Property Honored.
According to the Postal Guide, there are 21 cities and towns in the United States by this name.

On Trial.
Customer—I'm mighty particular about how my hair is cut. Do you think you can do a good job on it?
Barber—Well, I'm reckoned fairly decent, but if you want I'll do one side of your head first so you can see how you look.—American Legion Weekly.

Acquiring Sense.
"I'm teaching my boy to paddle his own canoe."
"And a good idea, too. Then he won't be so apt to rock the boat."

"Walking Fish."
This name is given to an eel-like fish of the snake-head family, on account of the fact that it spends some time on land. It is common in the fresh waters of the East Indies and China, and has a double respiratory apparatus, enabling it to breathe in or out of water.

BIG FUTURE FOR BEND IS PREDICTION

(Continued from Page 1.)
plated development work. He believes that not only irrigation of lands tributary to Bend, but also of those to the north, by the proper conservation of the waters of the Deschutes, would be possible. "I promise to do what I can to bring this about," he pledged.

Great Issues Economic.
Turning to topics of nation-wide interest, the speaker asserted that the questions of the cost of living, profiteering and industrial equalization will solve themselves satisfactorily. "Statutes cannot do this," he said, "but these things will be ad-

justed by the laws of economics. Conditions similar to those existing now have been experienced after every war, and it is only a wonder to me that worse conditions do not confront us after the dislocation of world life which has been the real meaning of the conflict through which we so recently passed.

"I have no fear for the future as far as America is concerned. America is now the creditor nation of the world, and it remains to us to see that America remains in this position. We still have to get back to a normal basis, and I look forward to the time when the amalgamation of the foreign-born in our American nationality will be so complete that the necessity for deportation will be eliminated."

Senator Chamberlain closed his remarks with a pledge of service to Central Oregon.

LAVA BUTTE IS OF LATE DATE

(Continued From Page 7)

Nature Makes Reparation.
The lava of the Lava butte eruption filled and dammed the gorge where the latter cuts through the rhyolite ridge and converted the broad and nearly level Deschutes valley into a lake 20 miles or more in length. During the thousands of years required for the cutting by the river of its present notch across the rhyolite ridge, at the head of Benham falls, thus slowly draining the lake, the gorge became filled with impervious silt and obliterated as a topographic and hydrologic feature and the lake basin outside of the gorge was pretty generally, if not completely, lined with similar materials.

Thus, by natural processes, without which the case would be hopeless, the ground, we may believe, was prepared for a successful reservoir. The discharge at Benham falls, compared with the watershed above that point, does not, it is believed, indicate any serious loss of water; on the contrary, we have, in Spring river and Fall river, substantial gains.

All the time, however we must keep in mind the possibility of undiscovered lava tunnels and faults, though reassured by the thought that these features are rare and that repetition within a limited area is improbable. The one known fault is quite certainly wholly outside of the proposed reservoir, and the known tunnel may yet prove to be not unfavorable to the proposed storage of water.

Having, by long-continued volcanic activity, done what she could to defeat the successful storage of water on the upper Deschutes drainage, nature has, during the later ages, made amends by the slow and unobtrusive process of silt deposition. The Crane Prairie project is, un-

doubtedly, simpler and more ideal than the Deschutes project and would naturally be preferred but for the fact that the run-off is only one-fourth that at Benham falls. A compromise scheme that may be worthy of some consideration combines the two projects, storing one-fourth of the total run-off on Crane Prairie and the other three-fourths above Benham falls. This would reduce the height and strength of dam required at Benham falls and leave above the flow line the part of the reservoir most open to suspicion as regards its tightness.

W. O. CROBBY,
Geologist.

CLASSIFIED ADVERTISEMENTS

Classified advertising charge per issue 20 cents for 25 words or less. One cent per word for all over 25. All classified advertising strictly cash in advance.

FOR SALE.

FOR SALE—40 acres, all improved; water right; good house, barn and outbuildings. This place is well fenced and cross-fenced; on the highway, near school and hall, R. F. D. and phone. For information as to price and terms, see Mr. or Mrs. C. M. Charlton, Powell Butte, Oregon. 87-266

FOR SALE—320 acres near Pine Mountain; good house, barn, chicken house and cistern; first class improvements; part cash, balance in bond for city or town property. W. A. Rahn, Millican, Oregon. 46-25-26p

PRACTICAL, convenient, sanitary portable bath for the home or outing; running water or water connections not required; costs less than 1 cent per bath. Price \$9. Address Box 244, Bend, Oregon. 55-24-27p

FOR SALE—One registered sow, with pig by registered boar; two gilts and one male pig, 7 months old. Inquire M. Dunn, R. F. D. No. 1, Bend. 88-24-25p

FOR SALE CHEAP—One small mule and 1 milk cow. L. C. Young, 5 miles northeast of Bend. Phone 10FS. 76-24-25p

FOR SALE—80 acres; 58 acres water right, 40 acres cultivation, 23 acres young alfalfa, 7 acres sweet clover, 4 acres spuds; 3-room box house; rabbitry, few high-grade rabbits; chickens, good Jersey cow, team, wagon, harness; some household goods; crops, everything goes with place; Deschutes, 3 1/2 miles north of bridge and canal; 7 1/4 miles from Redmond. Price reasonable; terms on part. J. H. Lovett, Redmond, 75-24-27p

FOR SALE—40 acres, well improved; good 5-room house and barn; also 4 good Jersey cows; six miles from Bend, on Redmond road. Address Box 563. 61-24-25p

WANTED.

ANYONE, looking for help, inquire of Miss Markel of the Bend Commercial club, at the city rest room. 31-177e

ANYONE, looking for employment on farms, see Miss Markel of the Bend Commercial club, at the city

NEW BURNER AT MILL PLANT IS ALMOST READY

GREATER EFFICIENCY SECURED

IMPROVEMENTS MADE

Thirteen Miles of Steel to Be Laid Narrow Gauge To Afford Means of Distribution in Brooks-Scanlon Mill Yards.

The last word in burner construction, the new plant at the Brooks-Scanlon mill for the disposal of wood waste, will be completed and practically ready for operation by Sunday. The latest precautions for fire prevention and devices for efficiency in burning are included in the new equipment. It is announced that the old burner at the plant will be torn down, but will be repaired and held in reserve for auxiliary work.

The burner which is now nearing completion is 120 feet from foundation to screen. It has an inside diameter of 44 feet and the height from the ground to the top of the screen is approximately 155 feet, or 80 feet higher and 14 feet wider than the burner now in use, and with double the capacity in cubic feet.

Another improvement which is announced for the immediate future at the Brooks-Scanlon mill will be the installation, at a cost of well over \$100,000, of 13 miles of 16 to 20-pound steel rails, to afford a means of conveying lumber to the yards, taking the place of the present method. The steel has already been ordered and will be laid on a narrow-gauge as soon as grading of the yards in preparation for the improvement has been completed.

Either gasoline or electricity will be used for power. The 13 miles specified will take care of present needs. According to General Manager J. P. Keyes, if the system works out with the greater efficiency which is expected of it, more rails will be laid as the size of the yards is increased.

Possible Saving of Lumber.
If spots were wound with 200, instead of 100 to 150, yards of thread, 300,000 loads of lumber would be saved each year.

Colors No Longer Procurable.
Ancient Chinese porcelains cannot be duplicated because the coloring matter used came from mines the chemical components of which have changed as the mines have been deepened.

Notice to Property Owners advising them of the Assessment for Local Improvement in District No. 17, 18, 19, 21 and 22, being for the improvement of portions of Wall Street, Bond Street, Greenwood Avenue, Minnesota Avenue and Franklin Avenue.

Notice is hereby given that there is on file at the office of the City Recorder of the City of Bend, Oregon, at the City Rest Room on Minnesota Avenue, the assessment roll setting forth the owner, with the description of his property, affected by Local Improvements No. 17, 18, 19, 21 and 22, being the improvement on portions of Wall Street, Bond Street, Greenwood Avenue, Minnesota Avenue and Franklin Avenue, and that said assessment roll will be open to the property owners so affected from this date and for a period of 10 days from the date of the publication of this notice.

At its regular semi-monthly meeting, September 3, at the Council Rooms in the Fire Hall, on Minnesota Avenue, at 8 p. m., the Common Council will then and there receive all objections to the assessment as herewith set forth. If no objections are registered against this assessment the Council will then and there approve same preparatory to collection or application to bond.

The assessment roll covered in the above information in full is as follows:
