

What's Doing In The Country

THRESHING ENDS ON CLOVERDALE FARMS

CLOVERDALE, Sept. 15.—Claud Lund purchased a mutton for threshing from R. O. Andrus last week. Threshing is over in Cloverdale and all report a good yield.

F. W. Small was a business caller at the W. F. Fryrear home last Monday.

Mr. and Mrs. J. B. Hodson went to Bend with a veal Tuesday.

Thomas Arnold was in Bend on business Monday.

School opened Monday, September 13, with an attendance of 15.

J. B. Hodson and daughter, accompanied by Sam Kline, went to Redmond Sunday and brought Miss Anna Doty out to her school.

Master Thomas Harrison, who is attending high school in Sisters, had the misfortune to have to walk home Monday night. He had left his wheel in the garage and, on going for it after school, found the garage locked.

Miss Doty and Sam Kline were in Sisters Monday night.

Miss Louise and Master Raymond Andrus, accompanied by their aunt, Mrs. J. W. Stebbins, arrived home Saturday morning from Madras, where they had been spending a few days' vacation.

Mrs. George F. Cyrus has moved to her Redmond home, where Dona and Wayne will attend high school and Esther the grade school.

Richard King has the car he purchased from Mr. Arnold in the Sisters garage, where it is being overhauled and repaired.

Mrs. W. J. Stebbins, accompanied by Mrs. Andrus and daughter, Pauline, returned to Madras Sunday evening.

Thomas Arnold shipped two calves to Portland last week.

KILLING OF SIRES CUTTING DOWN DEER

Hunters on Middle Fork of Willamette Find Few Bucks Or Fawns, But Many Does.

Belief that the annual killing of male deer in the mountains is exercising not only a direct, but an indirect influence as well in decreasing the amount of game in Central Oregon was expressed by P. Pierson of this city, following his return from a fruitless hunting trip to the headwaters of the middle fork of the Willamette. During the entire trip Mr. Pierson saw not a single buck, not even on the high ranges. Out of more than a dozen does which passed him, not more than two or three were accompanied by fawns, he said. Other hunters whom he met in the mountains reported much the same conditions.

DEFUNCT DISTRICT BROUGHT TO LIFE

Mrs. Maude Catlow Named Instructor At Harper For Own Children Student Body Numbers One.

A defunct Deschutes county school district came to life Saturday when Mrs. Maude Catlow, at Harper, was named as instructor for her two children. County Superintendent J. Alton Thompson reported today. Mr. Thompson received a phone call Saturday afternoon advising him of the election of Mrs. Catlow and asking that the necessary school supplies be sent at once. The Harper school has been empty since Peter Thompson

and his 10 children moved to Paulina two years ago. Last year no tax for district No. 25 appeared on the assessor's rolls.

An even smaller student body is reported in district No. 11 school, at Brothers, however, where the enrollment reaches a total of one. No teacher has as yet been secured for this district. Horse Ridge boasts of two, sometimes three, pupils.

FINE APPLES GROWN ON M. G. COE RANCH

Big Yield of High Grade Roman Beauties Reported This Season —Hood River Fruit Equalled

People who ship their fruit in from the Willamette valley and other sections of the state are all wrong, declares M. G. Coe, rancher, living near Bend, who arrived in the city Friday afternoon with two boxes of large Roman Beauty apples, picked from the orchard on his ranch. The apples are equal to the Hood river fruit brought in here and Mr. Coe states that he has plenty more of the same quality.

SWIMMING CLUB TO GIVE WATER SHOW

The swimming club at the Y. M. C. A. will bring its work for the season to a close with a water carnival, to be held at 8 o'clock on the evening of Friday, September 17, it was announced on Thursday. Members of the club have been preparing enthusiastically for the coming exhibition, which will include a 20-yard handicap race, diving competition, free-style 50-yard handicap, 20-yard relay race, egg and spoon race, endurance under water swim, polo game, life-saving demonstration, water comedy and a duck hunt. Prizes will be awarded to entrants placing first.

The feature event of the evening will be the duck hunt, for which, it is announced, a nearly wild bird will be used. The swimmer capturing the duck will have it for his own. Funds obtained from sale of tickets will be used in purchasing trophies to be awarded to the members winning honors during the season now drawing to a close.

C. J. BREIER STORE TO OPEN HERE SOON

W. F. Sloan, who will manage the new C. J. Breier Company store, to be opened in the Downing building on Bond street, arrived on Saturday from Pendleton, where he has been in the company employ. Mr. Sloan expects to open the new store in about two weeks.

OWNER RECOVERS PURLOINED AUTO

Left outside the gate at the Shevlin-Hixon mill on Saturday, the auto belonging to John Clemens of this city was stolen while the owner was at work on the night shift. This morning Clemens found the machine, apparently unharmed, near the county bridge. It is believed to have been taken by joyriders.

SEATTLE WOMAN GAINS 15 POUNDS

Could Hardly Breathe After Eating, But Digestion Is Perfect Now.

"I have gained 15 pounds in weight and am enjoying the best of health since I began taking Tanlac," said Mrs. A. G. Sekund, who resides at 2404 Third avenue, Seattle, Wash., recently. Continuing, she said: "For the past several years I have suffered from a severe stomach trouble. My appetite was very poor and I had to virtually force down every mouthful I ate, and even this would sour and ferment, gas would form and I would bloat something awful. I also suffered with terrible pains in my stomach, my heart would palpitate dreadfully and I had great difficulty in breathing. My head would ache so badly I thought at times it would simply burst open, and I would have such bad dizzy spells it was with the greatest effort I could keep from falling. My nerves were in such bad condition I could get but little sleep, and I was so restless at night I would just roll and toss from one side of the bed to the other all night long and would be completely exhausted in the morning. I lost so much weight and became so weak I could hardly get about at all and was unable to do my housework. "A friend of mine, who had been greatly benefited by Tanlac, advised me to try it, and I took her advice. The results I have obtained are simply remarkable. I now have a fine appetite and can eat anything I want and never suffer from it afterward. I am never troubled with gas or bloating and never know what it is to have a pain of any kind. The headaches and dizzy spells have all gone and my nerves are in such fine condition I can now sleep all night long as peacefully as a child and get up always feeling greatly refreshed. I am regaining my lost weight and strength every day, and can do all my own housework with the greatest ease. I owe all my present good health to Tanlac and am glad to recommend it to others."

Tanlac is sold in Bend by the Owl Drug Co., in Sisters by George F. Aitken, and in Bend by the Horton Drug Co.

FOOD VALUE OF CORN SILAGE

Crop is More Easily Harvested and Put into Silo Than Rye, Cowpeas or Alfalfa.

Almost any green crop can be made into silage successfully. Much care, however, must be taken to expel the air from such hollow-stemmed plants as the small cereal grains by cutting fine and packing firmly. Other crops, of which legumes are examples, are deficient in the fermentable constituents needed for palatable silage. On the other hand, a few crops, such as the saccharine sorghums, have so much sugar that unless cut at a more mature stage they have a tendency to produce sour silage.

In most parts of the United States more food material can be obtained from an acre of corn as silage than from an acre of any other crop that can be grown. Corn is more easily harvested and put into the silo than

None of Corn Crop is Wasted in Filling a Silo.

crops like rye, clover, cowpeas, or alfalfa, and when cut for silage the maximum quantity of nutrients is preserved. Experiments have shown that corn, when silaged, lost 15.6 per cent of the dry matter, against 23.8 per cent when cut for fodder and cured in the field. Moreover, there is less waste in feeding silage than in feeding fodder, since good silage properly fed is all consumed. When corn is cut for silage the land is cleared and left ready for another crop sooner than when the corn is shocked or is husked from the standing stalk. Corn can be put into the silo at a cost not above that of shocking, husking, grinding and shredding.

Farmers' Bulletin 578 on the Making and Feeding of Silage may be had by addressing the United States department of agriculture, Washington, D. C.

Candidates for Brainstorms. Once we were young and now we are older, but never yet have we seen a disciple of wind-blown doctrines who didn't end by having a brain-storm.—Dallas News.

POULTRY CACKLES

CARE FOR LITTLE CHICKENS

When First Put into a Brooder They Should Be Protected by Board or Wire Frame.

When chickens are first put into a brooder they should be confined under or around the hover by placing a board or wire frame a few inches outside (this would not apply to the small outdoor colony brooders). The fence or guard should be moved gradually further away from the hover and discarded entirely when the chickens are three or four days old, or when they have learned to return to the source of heat, poultry specialists in the United States department of agriculture say.

Young chickens should be closely watched to see that they do not huddle together or get chilled. They should be allowed to run on the ground whenever the weather is favorable, as they do much better than when kept continuously on cement or board floors. Weak chickens should usually be killed as soon as noticed, as they rarely make good stock, while they may become carriers of disease. Brooders should be disinfected at least once a year, and more frequently if the chickens brooded in them have had any disease.

FOR SUCCESS WITH POULTRY

Good Stock is First Fundamental for Best Results on Farm—Dual-Purpose Breeds Best.

The first fundamental of successful farm poultry keeping is good stock. Of course, it is well known that farmers may at times get fairly good results from ordinary stock, but at the same time it must be remembered that with the same care and attention better results will be obtained from good stock. By good stock is not necessarily meant stock which has been bred for exhibition purposes. It means standardbred stock, which by virtue of its pure breeding has been systematically developed and which is better fitted therefore to give the results expected of it and to yield a more uniform and more desirable product.

On the average farm the poultry flock is expected to furnish eggs and

Plymouth Rock is Good for Eggs and Table.

poultry for the farmer's table as well as to produce a surplus for sale. For that reason the so-called general-purpose breeds, such as the Plymouth Rock, Wyandotte, and Rhode Island Red, which are good layers and at the same time make excellent carcasses for the table, are recommended by poultry specialists of the United States department of agriculture as best suited to the farm needs. A further advantage of good stock is the fact that the owner will take a pride in such a flock which he will not feel in a flock of mongrels, and as a result he will give the hens better care.

CULL UNPROFITABLE LAYERS

It Will Help Increase Profits for Breeder to Dispose of All Hens in Poor Condition.

While some hens will prove to be profitable, others are kept at a loss and are a drag on the profitable hens in the flock. It is important, therefore, to cull out the unprofitable producers, as this will increase the profit realized from the flock as a whole. Any hens found to be sickly or in poor condition should be culled as soon as discovered.

INJURIOUS LITTLE RED MITE

Insects Sap Vitality of Hen by Sucking Her Blood and as a Consequence She Won't Lay.

The little red mite saps the vitality of the hen by sucking her blood. Hens have actually been killed, virtually eaten alive, by mites. Hens cannot lay except when their vitality is maintained. Vitality and mites cannot exist in the same henhouse.

FEEDS FOR YOUNG CHICKENS

Little Fellows Should Be Given Just Enough to Satisfy Appetite and Keep Them Busy.

Young chickens should be fed not more than barely enough to satisfy their appetites and to keep them exercising, except at the evening or last meal, when they should be given all they care to eat.

"NOW-A-DAYS"

says the Good Judge

A man can get a heap more satisfaction from a small chew of this class of tobacco, than he ever could get from a big chew of the old kind.

He finds it costs less, too. The good tobacco taste lasts so much longer he doesn't need to have a fresh chew nearly as often.

Any man who uses the Real Tobacco Chew will tell you that.

Put up in two styles

RIGHT CUT is a short-cut tobacco

CHAMPIONSHIP WON BY ORRELL

REYNOLDS DEFEATED IN FINALS 6-3, 6-3; HANER MAKES STRONG BID IN PREVIOUS MATCH PLAYED IN RAIN.

The title of men's singles champion of Bend and the trophy, consisting of a pair of tennis shoes, were won by Buell Orrell, a high school student, by taking the final match of the Y. M. C. A. city tournament from Paul Reynolds yesterday afternoon, 6-3, 6-3. Orrell had just finished defeating Ralph Haner in the elimination round and played the finals without stopping to rest after the three hard sets of the former match, the deciding set of which was not decided until 18 games were played.

Orrell is not a spectacular player, winning his games chiefly by steady and intelligent play, using either forehand or backhand stroke accurately and playing a strong game at the net. Reynolds proved fast on

the court and had a speedy service, but lacked the steadiness of his opponent.

Due to the rain, which made playing disagreeable, but did not slow up the play, and to the fact that weather conditions made it impossible to predict the time of the match beforehand, less than a dozen people saw the finals, but those who were there were treated to a style of tennis which compares favorably with that played on the coast in junior tournaments. Orrell was awarded the tennis shoes immediately after the final match.

The finals of the girls' tournament will be played off Wednesday afternoon at 4 o'clock, between Marjorie Baird and Eunice Catlow.

Drying Decanters.

An excellent and quick method for drying the inside of decanters, vinegar bottles, etc., which are in daily use: After washing out thoroughly with hot water, turn upside down and allow very hot water to run over the outside about a minute. This dries the inside quickly without leaving marks. Hold them under the hot water tap. This method has been known to be used for years without a mishap. For oil bottles dry out with twisted tissue paper.—Exchange.

Four chairs at your service at the Metropolitan. No waiting.—Adv.

EVERYTHING THAT IS BIG HAS HAD ITS SMALL BEGINNING

At some time the large fortune was small, but it grew. Your fortune may be now in its infancy; you may not have more than a dollar that doesn't need to be spent at once for some necessity. But put that dollar away, in a safe place; let it draw interest; and by and by put another dollar with it, and then another and another. Like a child your fortune will grow—steadily, surely. In time, what you have put aside, added to what your savings have earned, will amount to enough to make a good investment. You have made the beginning of your fortune.
