Ladies' and Children's Hose

ONE NEW HIGH SCHOOL DAILY MARK SET IN UNITED STATES

(By United Press to The Bend Bulletin)
 WASHINGTON, D. C., Sept. 15.—New high schools are being established in the United States at the rate of one every 24 hours. And for the past 28 years the United States has maintained this record-breaking clip in educational construction. The number of high schools have increased 452 per cent since 1890 to a present total of nearly 17,000. These and other figures on the state of our nation's high schools were made public today in a report by the United States bureau of education. In 1890 only 60 per cent of American high schools were public schools, today 87 per cent are public schools, according to the report. The 13,591 public high schools of the country have enrolled an army of 1,735,619 students. If these students were stationed at three-foot intervals a line would be formed from Washington, D. C., to Kansas City. And it would take a high school inspector, walking at the rate of

three miles an hour, 41 days to review this "army." In 1890 but 21,882 students were graduated. In 1918, 224,367 students received their "sheepskins." Girl graduates now, as then, exceed the number of boys. The American high school army of more than 1,700,000 is taught by a total faculty of 81,034 teachers. In 1919 there were but 9120 high school teachers. A feature of recent educational development, the report points out, is the increasing dominance of women in the high school field. Today nearly two-thirds of all high school teachers are women. More than one-tenth of the inhabitants of the United States have had, or are having, a high school education. Five times as great a proportion of American youth are now in high school class rooms as there were in 1890. One-half of our thirteen thousand-odd public high schools have an enrollment of between 27 and 100 students, 632 enroll over 500 students and 278 more than 1000.

FAME OF BEND HEN CROSSES CONTINENT

Newspapers Clip Story Until Allentown, Pa., Adopts J. A. McKenzie's Precocious Pullet.

The fame of a hen belonging to J. A. McKenzie, local sawmill employe, within a few months' time has traveled across the continent, and Allentown, Pennsylvania, has even claimed the honor of producing the fowl.

The news story first chronicling the doings of Mr. McKenzie's hen appeared in The Bulletin last spring and related how Biddy flew through the open window of her owners room, deposited a new-laid egg on his bed, then gently pecked McKenzie's nose, leaving the egg for his breakfast. The hen's reputation drifted to Portland and was told by the Oregonian. Then the St. Louis Globe-Democrat found the story and used it, and clippings found their way back to Bend. The Ames (Ia.) Tribune was next and the Buffalo Express followed.

How many dallies throughout the land have heralded the fame of Mr. McKenzie's hen would be difficult to ascertain, for the last to use the story was the New York Sun and Herald of September 8. The New York daily clips the story from the Allentown Leader, which has told the tale as a local occurrence, neglecting,

however, to change the name of the owner. Nevertheless, J. A. McKenzie of Bend still has the hen.

STUDEBAKER TAKES O.-W. R. & N. POSITION

Local Freight and Passenger Agent To Have Charge of Entire Central Oregon Territory.

Announcement that F. E. Studebaker, general freight and passenger agent for the Oregon Trunk and the O.-W. R. & N. in Bend, has been appointed to the position of traveling freight and passenger agent for the O.-W. in the Central Oregon territory succeeding S. L. Wiggins, was made Thursday. Mr. Studebaker sent in his resignation to the Oregon Trunk yesterday, but has received no word as yet as to who his successor will be. Mr. Wiggins is taking a position in the Portland office of the O.-W.

Mr. Studebaker's promotion follows 10 years of service with the S. P. & S.

Hawaii's Pineapple Output. In the Hawaiian Islands the pineapple industry has, during the last few years, experienced considerable development causing it to rank second to that of sugar. At present there are about 7,000 acres planted with pineapple.

GRAIN FOR HOGS ON PASTURE

Full Feed is Not Economical Where Grass is Plentiful—Some Protein Feed Favored.

Hogs on pasture require grain for greatest profit in pork production, but a full feed is not economical when pasture is plentiful and grain high-priced. When corn alone is fed a limited ration is considerably cheaper because the forage crop takes the place of much of the grain. Some protein feed, such as tankage or skim milk, is recommended to be fed in small quantity along with corn and pasture to pigs weighing less than 100 pounds. Pork production is usually too expensive when such feeds are given to large hogs, especially if they are on such pasture as alfalfa, clover, rape or soy beans, all of which are high in protein.

INDIANS FAVOR IMPROVEMENT

Live Stock Owned by Navajos in New Mexico to Be Bred to Purebred Sires in Future.

More than 191,000 head of live stock owned by Navajo Indians in New Mexico henceforth will be bred only to pure-bred sires. The female stock includes 3,000 cattle, 8,000 horses, 150,000 sheep, and 30,000 goats, besides smaller numbers of swine and poultry. The Indians have signified their support of the "Better Sires—Better Stock" movement. The United States department of agriculture is co-operating in supplying the Indians with literature dealing with live-stock improvement.

ESSENTIALS FOR SWINE

The following combination should be kept before the hogs at all times: One hundred pounds of slaked coal or wood ashes, four pounds air slaked lime, two pounds common salt, one pound epsom salts. Mix thoroughly and sprinkle over the combination the following solution: Two pounds copperas dissolved in one quart boiling water.

Same Old World.

Many of us are apt to consider our doll-sized quarters for full-grown people as among purely modern inconveniences; yet nearly a century ago Lord Harvey described Burlington house at Cheswick as "Too small to live in and too large to hang on one's watch chain."—Boston Transcript.

Best Timber for Airplanes.

The best timber for airplane purposes was found to be Sitka spruce, known in England as silver spruce. It is light and at the same time strong, highly flexible and soft in structure, so that it yields to the impact of a bullet without being shattered.

FARM STOCK

RAISE FEED FOR LIVE STOCK

Second in Importance Only to That of Producing Food Necessary for Use by Family.

The production of enough feed for its family live stock, work stock, and commercial live stock is second in importance only to producing food for the family, in the opinion of the United States department of agriculture. Farm management studies in the southern states indicate that the most profitable farms not only produce the necessary farm feeds but have a surplus of them to sell, and that the live stock is usually of better quality and better grade on the farms producing a surplus than on farms where staple feeds are bought. These facts are brought out in a series of 16 tests formulated by the department of agriculture to show whether or not a farm is being efficiently managed.

The average farm family, made up of five adult persons or their equivalent, requires for its proper maintenance 2 cows, 40 fowls for furnishing eggs and poultry meat, and 1 pig for each adult person or his equivalent. Enough calves should be raised to replace each cow reaching the age of 8 years. This family live stock, it is calculated, will require 1 ton of corn and cob meal, 1,254 pounds of cottonseed meal, 55 bushels of corn, 40 bushels of oats, 4,200 pounds of cowpea hay, 2,100 pounds of oat hay, 4,200 pounds of corn roughage, green forage from 2 acres, and 5 acres of pasture or their equivalent. A fair provision to a head for work stock is 60 bushels of corn, 40 bushels of oats, and 3 tons of

Hogs on Pasture Being Made Ready for Market.

The arrangement of crops and pastures to meet these requirements are suggested in United States department of agriculture circular No. 83, "Testing Farms in the South for Efficiency in Management."

VALUE OF HORSES ON FARM

Total Estimated at \$1,993,000,000, or Just a Little Below Figures on Cows.

Even though it may be true that the motor-driven vehicle has begun to put the farm horse "on the run," there is no evidence that he has developed much speed, and his total value still compares favorably with other classes of farm animals. On January 1, 1920, the bureau of crop estimates of the United States department of agriculture estimated the total value of horses on farms in the United States at \$1,993,000,000, or just a little below the figures on cows.

REPORT OF THE CONDITION OF The Central Oregon Bank

AT BEND, IN THE STATE OF OREGON, AT THE CLOSE OF BUSINESS SEPTEMBER 8TH, 1920.

RESOURCES

Loans and discounts	\$425,125.50
Bonds and warrants	80,370.45

State of Oregon, County of Deschutes—ss. I, H. M. Stephens, Cashier of the above-named bank, do solemnly swear that the above statement is true to the best of my knowledge and belief.

H. M. STEPHENS, Cashier.
 Subscribed and sworn to before me this 13th day of September, 1920.
 MARIE FOX, Notary Public.
 My commission expires December 25, 1922.

CORRECT—Attest:
 D. E. HUNTER,
 E. P. MAHAFFEY,
 W. L. O'DONNELL,
 Directors.

tal value of horses on farms in this country at \$1,993,000,000, or just a little below the value of milk cows, which was \$2,022,000,000.

SWINE DURING HOT WEATHER

Fattening Pigs Will Not Suffer From Heat if Given Plenty of Water and Ample Shade.

Fattening pigs require some attention in hot weather, but usually pigs weighing 100 to 150 pounds or more will not suffer from the heat or die if given plenty of cool water and protection from the sun. A concrete hog wallow is quite sanitary and if built in the overflow from a spring it keeps clear with the inflow of clean water. On hot days pigs will lie on the concrete feeding floor in the hog barn during the heat of the day and forage in the rape during the cool of the morning and evening.

Farm Live Stock

RECORD IN CATTLE TESTING

Federal and State Authorities Have 537,240 Head Under Supervision in Many Sections.

From time to time the bureau of animal industry publishes a "communiqué" showing conditions along the wide battle front where the allied forces of federal and state authorities are fighting cattle tuberculosis.

The latest report indicates that since the beginning of the movement in 1917 the owners of 500,000 cattle have placed their herds under supervision. On April 1, 1920, 25,708 herds scattered throughout the United States, with a total of 537,240 cattle, were under the co-operative supervision of the department of agriculture and state veterinarians. There were 2,230 accredited herds—69,237 cattle known to be free from the plague.

A Typical Native Scrub, and Obstacle to Progress in Live Stock Improvement.

Over 115,000 cattle were on the waiting list to be tested as soon as the veterinarians can work with them. Still another lot of 258,331 cattle have passed through the first stage of the test without showing any dangerous symptoms. The least optimistic estimate indicates that two-thirds of this number will conclude the test satisfactorily, and add 170,000 cattle to the accredited column.

The Kookaburra.

Australia has no nightingale, but it has a bird quite exceptional in its song—the kookaburra or the "laughing jackass." Its laugh is so human it startles the newcomer, for when one bird starts to laugh, the others follow. Then there is a merry time which makes men join heartily in the song, if song it be.

Best Method of Reform.

The way to reform men is not by taking away their pleasures and their happiness, but by dealing with them in a spirit of Christian charity and honorable justice and giving them more happiness.—St. Pierre.

SHIFTS LICENSE TAG, IS ARRESTED

Hood River Garage Man Pays \$25 Fine in Bend For Using Dodge Number on Reo Automobile.

E. J. Franz, Hood River garage man, arrested by Chief of Police Nixon, pleaded guilty before Justice of the Peace J. A. Eastes this morning to the charge of using a license tag issued for a Dodge on his Reo car. Under the court's instructions, Franz paid a fine of \$25, with costs, removed the offending tag, and made application to the secretary of state for a license for the auto which he is now driving. He left immediately afterward for Hood river.
