

What's Doing In The Country

HAYING PROGRESSING AT PLEASANT RIDGE

PLEASANT RIDGE, Sept. 22.—Mr. and Mrs. W. B. Hutchins and baby, Mr. and Mrs. George Roberts and son, Glen, were Redmond visitors Saturday evening.

Alfred Mikkelsen and Oswald Pedersen went to Redmond Saturday.

Waldemar Peterson of Bend is helping O. E. Anderson during haying.

Mr. and Mrs. Frank Rebhoff of Redmond were callers at the Hutchins home Friday evening.

J. W. Cabean of Redmond came down Friday morning to spend a day or two on his ranch here.

Calvin Wingham is working for Antone Ahlstrom during haying.

W. B. Hutchins is having a house built on his place. George Roberts, Mr. Hutchins' father-in-law, is doing the work.

Mrs. O. E. Anderson returned Friday morning from a trip to Portland and up into Western Washington, where she went to visit her mother.

J. E. Williams of Prineville, accompanied by Mr. and Mrs. Perma Marken, were callers in this vicinity Friday.

Mr. and Mrs. Carl Hanson of Tumalo visited Mrs. Hanson's sister, Mrs. J. W. Peterson, Sunday.

Boyd Berry of Bend is working for Rasmus Peterson.

W. B. Hutchins and Glen Roberts are helping Earl Wood put up his hay.

Mr. and Mrs. O. E. Anderson were shopping in Bend Saturday evening.

Mr. and Mrs. George Holton of Deschutes were callers in this neighborhood Thursday.

HUNTERS FAIL TO GET BIGGEST BEAR

Dogs Unable To Hold Bruin, Cobb Reports—General Purposes Hunt Will Start On Thursday.

The biggest bear of the whole Paulina mountain ursine tribe proved too much for the dogs to handle Monday and Irvin S. Cobb, Dr. Dudley Roberts and the Bend friends who are helping Mr. Cobb in his quest for quiet came in Monday without the fourth pelt. Mr. Cobb explained on Tuesday. The party remained in Bend through Wednesday and on Thursday started for the head of the Metolius, where they will stay for 36 hours.

Another brief visit to Bend and they will go to the Watson ranch at the headwaters of Crooked river, and from there toward Burns, intending to be gone for approximately 10 days. "It will be a general purposes hunt," Mr. Cobb declared this morning. "There will be nothing too large or too small for us to shoot, but we will make a specialty of jack-rabbit slaughter."

LA PINE-EAST LAKE ROAD IS COMPLETED

The new 20-mile road, providing a straight route from La Pine to East lake, is completed and the crew of roadbuilders was laid off Friday. Forest Supervisor Plumb reported that working on his return from a tour of inspection of the various districts of the forest.

Fourteen miles of the new road was built by the people of La Pine, the rest being constructed by the forest service.

DESERT SCHOOLS TO HAVE TEACHERS SOON

Instructors Retained For Millican and Hempstead Valleys—Brothers Pupil Must Go To Crook.

Two more of Deschutes county's vacant schools were provided with teachers Monday, when Miss Pearl Dutt reported for duty in the Millican district and Mrs. Clara McKinley opened the Hempstead Valley school.

At Brothers, where the student body numbers one, no teacher has been secured, and it is probable that the same policy will be followed as that adopted last year, when the one boy was sent to the district adjoining in Crook county, his home district paying his board and allowing his parents a fixed sum for transporting the youngster to and from Crook county, the entire expense amounting to more than is required to send the average young man through college.

EAST LAKE TROUT TASTE OF SULPHUR

Fish Feeding Too Close To Hot Mineral Springs Become Unfit For Food, Anglers Report.

Trout, with meat strongly impregnated with sulphur, are an oddity which anglers at East lake have been occasionally finding recently. The sulphur hot springs at one end of the lake are the reason. Trout, feeding among the weeds soaked with the sulphur water, develop so strong a taste as to be virtually unfit for food. Only a small percentage of fish caught have been in this condition, those feeding in the other end of the lake being without odor.

A. L. DODD NAMED FOR AGENT'S POSITION

F. E. Studebaker, freight and passenger agent in Bend for both the O.-W. R. & N. and the Oregon Trunk, who resigned recently to accept a position as traveling freight and passenger agent for the O.-W. for Central Oregon, succeeding S. L. Wiggins, has been relieved at his local work by A. L. Dodd, who comes to Bend from Lyle, Wash. Mr. Studebaker will report at O.-W. headquarters in Portland for instructions.

R. C. Little and George Burl, auditors, respectively, for the S. P. & S. and U. P. systems, were in Bend Tuesday checking over the retiring agent's accounts before turning his books over to Mr. Dodd.

METHODIST CHURCH LETS NEW CONTRACT

The contract for the construction of the basement wall of the new Methodist church has been let to A. E. Freiburg and work will start at once. It was stated Friday by Rev. J. Edgar Purdy, pastor of the church. At the present rate of construction, Rev. Purdy hopes that the roof can be started by Christmas.

SPENT 7 MONTHS IN BED, HE SAYS

"I Believe Tanlac Saved My Life," States George Hastings.

"If I had only one dollar left in the world, I would spend it for a bottle of Tanlac," said George C. Hastings, who resides at 85 Bell street, Seattle, Wash. Mr. Hastings has resided in Seattle 38 years. Continuing, he said:

"Along about the first of the year I began to suffer from a dreadful stomach trouble. I would have such pains I could be heard hollering a city block. I had a very poor appetite, and what little I did manage to force down would sour and ferment and I would bloat something awful, and I also had pains in my chest and legs. I could not retain a thing I ate and just the sight of food would cause me to become terribly nauseated. I became to weak and dizzy I could not stand without staggering, and if I tried to walk a few steps I would fall down. I finally had to give up and go to bed and was down for seven months. I was very nervous and would not sleep a wink for night after night. I was in such misery and I lost weight until I was nothing but skin and bones. Everybody thought I was going to die and I was told I could not live very long, and I thought so, too. I tried all sorts of treatments and medicines, but none of them did me a particle of good.

"My friends, several of whom were G. A. R. veterans, said: 'George, try Tanlac, because it has helped so many of us,' and as I had also read so much in the newspapers about the good it was doing others, I decided to take their advice. I got my son to bring me a bottle. Well, sir, talk about a life-saver! As soon as I began taking Tanlac I could see a change for the better in my condition, and after I had finished my second bottle I got out of bed and have been up ever since, and the pains have all completely left me. I have a fine appetite now and can eat anything I want without suffering any bad after effects. I began to pick up and regain my lost weight and feel like a new man. I never have a dizzy spell and I walk all around town as well as I ever did. I firmly believe Tanlac saved my life, and will always praise it, and anyone wishing to find out any more about what it did for me can either write or call on me, and I will be only too glad to tell them."

Tanlac is sold in Bend by the Owl Drug Co., in Sisters by George F. Aitken, and in Bend by the Horton Drug Co.

RAPID PROGRESS IS SHOWN BY SWIMMERS

Water Carnival at Y. M. C. A. Made Occasion For Badge Presentation—Life Saving Is Demonstrated.

Before a large crowd, Y. M. C. A. swimmers put on their long-heralded water carnival at the plunge Friday night and the presentation of swimmers' and beginners' badges was made by Rev. J. Edgar Purdy. He commented especially on the rapid progress made by the boys during the short period in which the club has been organized.

One of the most interesting events of the entire program was the duck hunt, four boys at a time being permitted in the tank, where the duck swam, dived and half flew over the water. Thirty endeavored to capture the bird before Ralph Haner was finally successful, receiving the duck as the prize. A comedy costume event was another enjoyable feature of the evening.

The program of contests was as follows, with entrants placing in the order named: Twenty-yard handicap, E. Taylor; diving competition, Todd, McKay, Ralph Haner; 60-yard handicap, M. Meagher, Todd and Birdsall; egg-race, Duncan McKay; under-water swim, Todd (90 feet), Homer Eperon (60 feet); relay, Cottingham and Meagher; water polo, won by Golden's team.

An interesting life-saving demonstration was put on by R. Bloom, Todd, Cottingham, Rhoades and Hexberg. They demonstrated the five best methods of rescue, and the five methods of release, giving the exhibition both on land and water.

POULTRY NOTES

Gather the eggs twice daily.
Market the eggs at least twice a week.
Keep the eggs in a cool, dry room or cellar.
As food there is nothing better to supply protein and mineral matter than eggs.
Trees with good-sized tops and out in the open so that air may circulate freely about them, are a tired hen's idea of paradise. Fix up some open sheds if you cannot have trees.
Put it in The Bulletin.

BASS WILL BE PLANTED SOON

EASTERN FISH SENT TO BEND AND WILL BE PLACED IN MUD LAKE WHERE NO TROUT WILL BE SUBJECT TO ATTACKS.

The first bass ever planted in Central Oregon waters will be sent out within the next two or three days, Pearl Lynes, superintendent of the Tumalo hatchery, has announced, following the receipt of 10,000 fish of assorted sizes from the western part of the state Tuesday. The bass are of the "big mouth" variety and were brought to Bend by T. J. Craig, for many years in the employ of the state fish and game commission.

According to present plans the fish will be taken to Mud lake, some 34 miles from Bend, where conditions are declared by experts to be ideal for the bass. Another feature being considered is that the lake is landlocked and the capacity of the eastern fish makes it imperative that they should have no opportunity to make war on trout fry.

In addition to the bass, Mr. Lynes now has approximately 2,000,000 trout left at the hatchery to be distributed in lakes and streams throughout Central Oregon.

POULTRY FLOCKS

FOOD PRODUCTS FROM FOWLS On Average Farm Poultry Furnish About 10 Per Cent of Meat for Family Use.

A large proportion of the poultry products of this country are produced on general farms. Nearly every farm has its poultry flock. The average American farmer reserves about three dozen eggs a week for family use and about 50 fowls are consumed by the family during the year. These food products can be secured absolutely fresh, which considerably enhances the value of this contribution from the farm, says the United States department of agriculture. Of the meat furnished by the farm to the operator and his family, poultry constitutes about 10 per cent.

A small flock of poultry can be kept on the farm at little cost. The fowls find scattered grain about the farmstead and on the adjoining grain fields after harvest. Garden refuse and kitchen waste are usually available for them. They also feed on insects and worms. In many cases the farmer's wife and children find pleasure in caring for the flock.

STEW OR SELL ALL ROOSTERS

Male Bird Does Not Aid in Production of Eggs and Should Be Disposed Of in Summer.

Farmers lose many millions of dollars annually from bad methods of producing and handling eggs. Much of this loss is preventable, because it is due to the partial hatching of fertile eggs, which have been allowed to become warm enough to begin to incubate.

You can help save the loss due to blood rings by keeping the male bird from your flock after the hatching season is over.

The rooster does not help the hens to lay. He merely fertilizes the germ of the egg. The fertile germ in hot weather quickly becomes a blood ring, which spoils the egg for food and market. Summer heat has the same

Hens Not Running With Rooster Produce Best Eggs for Market and Preservation.

effect on fertile eggs as the hen or incubator. After the hatching season is over, cook, sell, or pen your rooster. Your hens not running with a male bird will produce infertile eggs—quality eggs that keep best and market best.—United States Department of Agriculture.

CLEAN CONDITION OF FLOCK

Boards Under Roosts Make It Easy to Remove Droppings Daily—Little Sand Helps. To keep the flock in a clean and sanitary condition dropping boards

"Just Between You and Me" says the Good Judge

Here's genuine chewing satisfaction for you, hooked up with real economy. A small chew of this class of tobacco lasts much longer than a big chew of the ordinary kind—that's because the full, rich, real tobacco taste lasts so long. Any man who uses the Real Tobacco Chew will tell you that.

Put up in two styles
W-B CUT is a long fine-cut tobacco
RIGHT CUT is a short-cut tobacco

Wm. W. Bristol Company, 107 Broadway, New York City

should be provided and roosts above them. This makes it easy to remove the droppings each morning and helps greatly to keep the house free from objectionable odors. A little sand sprinkled on the dropping boards after each cleaning will make the cleaning easier.

HOMEMADE HOPPER IS HANDY

Joint of Stovepipe and Wooden Box Make Convenient Device for Feeding Dry Mash.

An easy way to make a hopper for feeding dry mash to poultry is with a joint of stovepipe and a wooden box, 10x10x4 inches. Set the box on the floor and hang the stovepipe from the roof so that it is about 1/2 inch from the bottom of the box. Fill the pipe with the dry mash. It will feed down into the box as the chickens eat it out.

Good Servant, Poor Master.

It is well to have a hobby, says the New York Medical Journal. It is well to have a hobby which can be used as a faithful servant. It is well to have a hobby as long as you can ride it, but when it begins to ride you it is better to look about for another steed.

Synchronicity

Married life will never be a complete success until the baby and its parents get sleepy at the same time.—Boston Transcript.

Peril in Iodine Fumes. Fumes of iodine have recently been urged as a method of administering that drug preferable to the usual tincture. It has been shown by experiments that fumes are absorbed through the skin and when inhaled are absorbed by the lungs, but it is shown also that inhalation is very dangerous even in small quantities, especially when there is any disease of the respiratory passages.

Determining Height of Mountains. The height of mountains is ascertained by barometric observation, showing the pressure of atmosphere at the lower and higher levels. An instrument called the mountain barometer is graded especially for this purpose. It can also be done with a leveling instrument and theodolite, but either way requires technical knowledge.

And the Audience Smiled. A well-known statistician was giving some statements about a certain industry at a public dinner. "These are not my figures, ladies and gentlemen," he said. "They are the figures of a man who knows what he is talking about."

Appropriate. In Egypt yellow-brown, the hue of the dead leaf, is worn as the emblem of mourning.

Four chairs at your service at the Metropolitan. No waiting.—Adv.

THE CONCRETE

S-I-L-O

PERMANENT AS PYRAMIDS

When you erect a Silo, you want a Silo that will stand the test of wind, rain, snow, frost and sun. In the Hollow Concrete Silo Block you obtain this feature, and besides a concrete block is absolutely fire-proof. Will not warp when empty. No guy lines necessary.

Eventually Concrete Why Not Now?

For specifications, write to

Concrete Pipe Co.

BEND, OREGON
Makers of Culvert Pipe, Water Pipe, Irrigation Pipe, Building Blocks, Hollow Silo Blocks Well Curbing.

EVERYTHING THAT IS BIG HAS HAD ITS SMALL BEGINNING

At some time the large fortune was small, but it grew. Your fortune may be now in its infancy; you may not have more than a dollar that doesn't need to be spent at once for some necessity. But put that dollar away, in a safe place; let it draw interest; by and by put another dollar with it, and then another and another. Like a child your fortune will grow—steadily, surely. In time, what you have put aside, added to what your savings have earned, will amount to enough to make a good investment. You have made the beginning of your fortune.
