

OPEN GAMBLING IN POOL HALLS OF BEND, CLAIM

MAY REVOKE LICENSE, MAYOR'S THREAT

BUDGET IS DUE SOON

Report On City Finances Ordered For Next Council Meeting—Health Certificates For Food Handlers Are Required.

Virtually wide-open gambling is almost certainly going on in one or more of the pool and card rooms of Bend, and at least one of the proprietors who was given warning assumed an unmistakably defiant attitude, Councilman D. G. McPherson, chairman of the police committee, reported on Friday at the regular meeting of the city council. His information on the subject was obtained from Chief of Police Nixon. Mr. McPherson declared that it might be extremely difficult to secure evidence sufficient to obtain a conviction, but Mayor Eastes declared that he is ready to take a short cut and revoke the licenses of cardroom proprietors who are not willing to comply with terms of the law. Another remedy which was suggested, although no action was taken, was an ordinance forbidding the use of cards in any public gathering place of the kind now under suspicion.

When the next session of the council is called the chief issue to come up for discussion will be the size of the 1921 budget. The budget election will be held at the same time as the general election. It was informally agreed by the council, and a statement of expenses of the city government today, which the ways and means committee was instructed to present at the first October meeting, will be made the basis for the 1921 costs estimate which will be placed before the voters in November.

A public health safeguard in the form of the ordinance introduced two weeks ago, providing that persons hired for the handling of foodstuffs, or to care for children, must furnish certificates of health, was passed with little debate. The ordinance is copied from the state law and is aimed to prevent the spread of social diseases. It was explained that the drastic laws in effect in Portland have driven many persons so infected to Bend to seek employment. Health certificates issued under the new law will be good for three months.

school board, appeared for the second time before the council to ask for action on the construction of a sidewalk on Newport avenue, connecting with the Kenwood school. The council will take definite steps toward construction at an adjourned Monday session.

Mr. Nordeen also complained that transformers being installed by the Bend Water, Light & Power Co. in the alley from Greenwood to Oregon, between Wall and Bond, are being placed too low for safety. The matter was referred to the police committee.

The request of the Bend Moose lodge for permission to hold its annual carnival on November 8 was referred to the license committee.

KEEP FLIES OFF LIVE STOCK

Mixture of Laundry Soap, Water, Crude Petroleum and Naphthalin is Recommended.

The following mixture is very effective in keeping flies off live stock and its cost is very small:

One pound of common laundry soap, four gallons of warm water, one gallon of crude petroleum and four ounces of powdered naphthalin.

Shave the soap in very thin slices into warm water and stir it until thoroughly dissolved. Put the naphthalin in the crude petroleum and stir until dissolved. Pour the soap and water into the petroleum and thoroughly mix them together.

RAISING REGISTERED CATTLE

Many Farmers Hesitate to Start With Pure-Bred Animals Because of Lack of Knowledge.

Many farmers would like to raise registered cattle, but because of their lack of knowledge of pedigrees or individuality, or both, hesitate to start with pure-bred animals. A safe way to start is to buy a few bred cows or heifers and grow in experience as the herd increases in numbers.

LIVE STOCK NOTES

The amount of concentrates fed can be greatly reduced if the sows have access to good pasture such as bluegrass, clover, alfalfa or rape.

Good pasture and considerable range for exercise not only lowers the cost of maintenance, but also serves to keep sows in healthy condition.

An old but correct statement that "the bull is half the herd" needs to be heeded more than ever, owing to the high prices of grain, labor and overhead expense connected with production.

Policewomen in Europe. The Swedish cities of Stockholm and Gothenburg were among the first in Europe to have women police.

TRICKEY WILL LEAVE Y. M. C. A.

WINNIPEG MAN IS TO BE SUCCESSOR

R. B. Boyes Elected General Secretary, and Athletic Director is Chosen To Expand Work of Bend Association.

Members of the board of governors of the Bend Industrial Y. M. C. A., in session Thursday, accepted the resignation of General Secretary L. W. Trickey, authorized U. S. Duncan, field representative for the Y. M. C. A., to retain the services of R. B. Boyes of Winnipeg, to fill Mr. Trickey's place, and prepared for increased activities in athletics by voting for a physical director. E. H. Brandenburg of Tacoma was chosen for this position and wires were sent this morning to him and to Mr. Boyes, notifying them of their election.

As the first secretary of the Bend Y. M. C. A., Mr. Trickey has greatly increased the membership of the association, and had established the institution as a successful one in Bend's civic life, when a condition of abnormally high blood pressure, aggravated by the altitude here, forced him to tender his resignation. From Bend, he will go to East Liverpool, Ohio, as general secretary of the association in that city, after remaining here long enough to acquaint his successor with his duties. He expects to start for the East by October 15.

Mr. Trickey's successor was in the textile industries in Scotland as a boy, had university training, was engaged in association war work, and since the termination of hostilities, has been a field representative for the association in the logging camps tributary to Winnipeg.

Mr. Brandenburg, chosen as the new physical director, was formerly an assistant director at Pennsylvania State college, and at the Minnesota Agricultural college. In Minneapolis, before coming to Tacoma, he worked with Director Henkle, one of the best known Y. M. C. A. athletic mentors in the Middle West.

COMMON SCAB AMONG SHEEP

During Past Decade Great Progress Has Been Made in Eradication of Ailment.

Common scab was formerly the greatest drawback to the sheep industry of the United States, but during the past decade great progress has been made in its eradication. The system of grazing sheep on the open ranges of the western part of the United States was such that the flockmasters had great difficulty in keeping the flock free from the scab. The sheep were very frequently exposed to the disease by infectious ranges and trails, "picking up strays" from infected flocks, and in many other ways. It became desirable for the department of agriculture to extend aid to the

An Advanced Case of Scab, Showing Area Denuded of Wool.

Industry by controlling the interstate movement of sheep to prevent the carrying of the infection from one state to another.

Scab is exceedingly contagious and is transmitted by direct contact with animals or objects that are carriers of the mites. Although unable to propagate except on sheep, the mites may be harbored temporarily by animals other than sheep and may live on goats for a long period.

A flock of scabby sheep will infect the roads, trails, sheds, yards, bed grounds, pastures, ranges, and the ground around the watering places. It is therefore important that the flock receive proper treatment as soon as the disease appears, before the infection becomes scattered over the premises.

SCIENTIFIC FEEDING IS BEST

Supply Food in Right Proportions to Meet Requirements Without Waste of Nutrients.

To supply food in the right proportion to meet the various requirements of the animal, without a waste of food nutrients, constitutes scientific feeding.

It is by carefully studying the composition of feeding stuffs, the proportion in which they are digested by different animals and under different conditions, and the requirement of animals for the various food nutrients when at rest, at work, giving milk, producing wool, mutton, beef, pork, etc., that the principles of feeding have been worked out. In applying these principles in practice the cost and special adaptations of different feeding stuffs must, of course, be taken into account.

SIRE TO AID FUR BEARERS

"Better Sires—Better Stock" Campaign Indorsed by Breeders and Fanciers' Association.

The National Breeders and Fanciers' Association of America has indorsed the "Better Sires—Better Stock" movement. Through its secretary, the association has notified the United States department of agriculture of its aim, through better sires, to improve the quality of fur-bearing animals raised in confinement.

In addition to raising animals kept primarily for fur, members of the association also breed such creatures as rabbits, cavy, and mice used for pets and scientific purposes. The value of pure-bred sires is especially great for classes of animals like those mentioned because of their prolificacy.

DECLINE IN BREEDING SOWS

Decrease of 9.9 Per Cent is Noted by Bureau of Estimates—States Affected.

Breeding sows declined 9.9 per cent during the year ending April 1, 1920, according to investigations of the bureau of crop estimates. The same number of these animals for both years is reported for South Carolina and Georgia, and increases for Florida, Texas, and New Mexico. The heaviest declines were found in Massachusetts, Indiana, Illinois, Missouri, North Dakota, Nebraska, Kansas, Kentucky, Tennessee, Montana, Wyoming, Colorado, Arizona, Utah, and Idaho.

PLAN FOR BETTER STOCK.

Boost better live stock in your community. Advertise judiciously. Exhibit at the county, state and other larger live stock shows. Remember that a satisfied purchaser is your best advertisement. So be prompt in registering and transferring animals and make good all guaranties.

HAMM HAS PUREBREDS ONLY

South Dakota Farmer Asks Enrollment in "Better Sires—Better Stock" Movement.

Declaring that not only all his sires but likewise all his female breeding animals were purebred, Charles P. Hamm, a South Dakota farmer, applied for enrollment in the "Better Sires—Better Stock" campaign conducted by the United States department of agriculture in co-operation with state agencies. He is a breeder of Short-horn cattle, Percheron horses, Duroc-Jersey hogs, Rhode Island Red chickens, and Bourbon Red turkeys.

The better-sires movement is aimed particularly at the use of superior purebred sires, but the majority of those enrolled also keep some female stock. Mr. Hamm, however, is the first person officially listed as keeping five classes of live stock in which all the animals—both male and female—are purebred.

LIVE STOCK NOTES

Every good dairyman knows the value of a purebred sire of good record.

If you have surplus stock to sell it will pay you to use a good purebred dairy bull.

Give the sheep some attention during the summer and increase the profits from the flock.

When sheep are on pasture they will not require much attention, but one must see that the pasture is not overstocked and that they have plenty of fresh water and salt.

FARM ANIMALS

SOUND QUALITIES OF HORSE

First Consideration of Buyer and Breeder Should Be Soundness—Examine Thoroughly.

The soundness of a horse is one of the first considerations of the buyer and should be of the breeder, according to the United States department of agriculture. If the animal is not sufficiently sound to withstand the use for which he is intended, the logical time to learn of this is before the purchase. Selection must be based primarily on a thorough, systematic examination; the examination should be based on a clear knowledge of desirable and undesirable qualities.

Not only the presence of unsoundness, but also the condition or seriousness of the unsoundness should be noted. Temporary unfitness should be distinguished from permanent unsoundness.

A hurried examination is likely to prove a disappointment. Observe blemishes, vice, faulty conformation, unsoundness and general characteristics.

Common blemishes are scars from old wounds, poll evil, scratches, shoe boils, and small ruptures. Common vices are halter pulling, cribbing, kicking, stall walking, weaving, and biting.

Common faults of conformation are straight shoulders, crooked, weak, or improperly set legs, ewe neck, long weak back, and drooping croup. Common unsoundnesses are splints, thoroughpin, spavin, curb, extreme fis-

Carnegie, a Well-Conformed Type.

tula, ringbone, side bones, extreme atrophy of muscles, contracted tendons, and broken wind.

General characteristics include fleshing, temperament, quality, color, and age.

In final selection, look for the good qualities and weigh them against the defects.

"BULSHEVIKS" OF LIVE STOCK

New Title Applied by Wisconsin Farmer to the Reactionaries of Bovine Society.

From a farmer in Wisconsin comes a new word for use in the "Better Sires—Better Stock" campaign now being carried on by the United States department of agriculture in co-operation with state and local agencies. He applies a new title to the reactionaries of bovine society, and cites the indubitable fact that scrub bulls are the enemies of good production; that they levy upon the milk, cream and butter checks and compel the farmer to keep cows, where the cows should keep the farmer.

With these charges in mind and with his eyes on the international situation, this farmer suggests that the scrub bulls be known hereafter as the bulsheviks.

Casus Belli.

In an Irish case of a domestic riot involving much injury to person and property, a witness in the course of a vivid narrative swore as follows: "He says to me, 'Is that your father?' And I says to him, 'It is me father.' And he says, 'It is well you told me, for I thought he was an old gorilly,' and then the fight began, me lord."—From the Argonaut.

Solomon's Temple.

It is believed today by many savants that the Old Testament description of Solomon's temple was written by the Jews after their return from the captivity, with the memory of the real splendors of Babylon fresh in their minds. It is possible that the actual temple was a simple place of worship. If it had been otherwise, it is hardly possible that no remains of it would be visible today, seeing that the temples of Egypt, which are so much older, remain, in some cases, almost to this day.—Anstruther Mackay in Atlantic Monthly.

Put it in The Bulletin.

LEGAL NOTICES

NOTICE FOR PUBLICATION (Not Coal Land.)

Department of the Interior, U. S. Land Office at Lakeview, Oregon, September 13, 1920.

Notice is hereby given that Harry R. Hankins, of Bend, Oregon, who, on April 17, 1915, made Homestead Entry No. 08558, for W 1/4, Section 27, Township 21 S., Range 18 E., Willamette Meridian, has filed notice of intention to make final three-year proof, to establish claim to the land above described, before H. C. Ellis, U. S. Commissioner, at Bend, Oregon, on the 29th day of October, 1920.

Claimant names as witnesses: Charles H. Haines, Otis C. Henkle, Augustus Gaulke, Francis X. Wilkowski, all of Bend, Oregon. JAMES F. BURGESS, Register. 20-34c

NOTICE

Notice is hereby given that the Board of Directors of the Tumalo Irrigation District in Deschutes county, Oregon, will meet at its office at Tumalo, Oregon, on the 5th day of October, 1920, the same being the first Tuesday of October, acting as a board of equalization for the purpose of reviewing and correcting its assessment and apportionment of taxes, as provided by law, which said assessment and apportionment was made by said board on the first Tuesday of September, 1920, as required by law, and that the assessment list and record prepared by said board is in the office of the secretary of the board for the inspection of all persons interested. Dated September 7, 1920. FRED N. WALLACE, Secretary of the Board of Directors of the Tumalo Irrigation District, Tumalo, Ore. 28-31c

NOTICE OF FINAL ACCOUNT

In the County Court of the State of Oregon for the County of Deschutes. In the matter of the Estate of Sarah L. E. Fanton, deceased. Notice is hereby given by the undersigned, Administrator of the Estate of Sarah L. E. Fanton, deceased, that he has made and filed with the Clerk of Deschutes County, Oregon, the final accounting of his administration of said Estate and that the County Court has set Friday, the 15th day of October, 1920, at the hour of 2:30 o'clock p. m. of said day at the County Court Room in Bend, Oregon, as the time and place for hearing and settling said final account and for the discharge of the undersigned as such Administrator, at which time and place any persons interested in said Estate may appear and object thereto.

PETER G. REMPEL, Administrator of the Estate of Sarah L. E. Fanton, Deceased. Published for the first time September 9, 1920. 28-32c
