

MANY ANGLERS BEGIN SEASON

GOOD CATCHES ARE REPORTED

Forty-five Cars Belonging To Fishermen Line Metolius River—No Violations of Law Reported—Sunday Is Busiest Day.

Although fishing Saturday and Sunday was more to be remarked for the number of anglers who were out than for the number of fish caught, reports of satisfactory catches have come from various sources. Among others, D. H. Peoples, who fished at the mouth of Little river Saturday afternoon with Guy McReynolds and Kenneth Sawyer, tells of an 18-inch Dolly Varden and another of 14 inches, among a dozen or so caught. Dr. W. G. Manning is said to have bagged a creditable number of trout near the Heising ranch on the Metolius.

Forty-five cars belonging to fishermen were counted along the Metolius yesterday by District Game Warden Earl B. Houston, who remarks that all had licenses, and that none had undersized fish or showed evidence of any game law violation.

J. A. Eastes was out on the Metolius since early Friday and reports a good time. A. F. Larson, C. A. Hayden, Dr. L. W. Gatchell and Lester Mann fished at the cove. W. P. Myers admits catching 19 at the latter place. T. H. Foley spent yesterday fishing at Spring river. Dr. Grant Skinner spent the day on the Deschutes below Bend. Harold Sather took a collapsible canoe boat to Dillon falls, catching a dozen trout during the day. E. L. Payne made a good catch down the river. R. N. Buchwalter spent the day on the Metolius.

"If you desire to know who went fishing yesterday, read the city directory," the latter advised. Fishermen from the Willamette valley were also in evidence at various fishing resorts in this vicinity.

SET TRYOUT DATE FOR DECLAMATION

Grade Pupils of County Eligible For Preliminary Contest On May 7—Four Divisions.

The grade declamatory tryout for Deschutes county, preliminary to the try-county meet in Redmond May 14, will be held in the Bend high school auditorium on May 7. Pupils from all grade schools up to the eighth grade in the county will be eligible. Contestants will be classed in four divisions, according to scholastic grade. First and second grades will be in the first division, third and fourth in the second, fifth and sixth in the third, and seventh and eighth in the fourth.

Selections in divisions Nos. 1 and 2 are restricted to 600 words, and may be humorous in character. In the third and fourth the selections may not be humorous, and are restricted to 800 words and 1000 words, respectively.

PLEASING PROGRAM GIVEN BY LEITERS

A most pleasing musical program was furnished Monday night to patrons of the mill employes' lyceum by the Leiter Light Opera Co., appearing in the gymnasium, assisted by the Shevlin-Hixon band. Every seat downstairs was taken and the balcony was well filled.

Following the band concert, which was even more satisfactory than former appearances, the visiting entertainers gave a varied program, including vocal solos, duets and mixed quartet numbers which were enthusiastically received. The latter part consisted of the presentation of a quartet arrangement of the Gilbert & Sullivan opera, "The Witches' Curse." Character work, comedy and harmony were all of the best. A dance followed the program.

Color Blindness. No fewer than 55 persons in every thousand are more or less color-blind. The commonest form is not, as many suppose, inability to distinguish red and green—that affects one person in 55. The most usual symptom is uncertainty between blue and green. This is experienced by one out of every 40 persons, but only one in 60 is unable to distinguish between brown and green. Color blindness is more common among educated than uneducated people, and an odd fact is that musicians are more liable to this affliction than are any other class or profession.

RANGERS HERE FOR MEETING

OFFICIALS FROM DISTRICT OFFICE AT PORTLAND HERE TO ADDRESS MEN FROM THREE NATIONAL FORESTS.

Four officials from the district national forest headquarters at Portland, supervisors of the Deschutes, Ochoco and Fremont forests in Central Oregon and 18 rangers from stations in the three forests met here Monday in the Lone Pine Labor temple. Plans for fire prevention and protection were the chief topics of discussion in the morning.

The officials present from Portland are: A. O. Waha, assistant district forester, in charge of operation; E. N. Kavanaugh, assistant district forester in charge of grazing; W. B. Osborne, in charge of fire studies, and J. R. Guthrie, in charge of public relations.

Forest Supervisors Gilbert D. Brown of the Fremont national forest, V. Harpham of the Ochoco and H. L. Plumb of the Deschutes forest are in attendance. Rangers, who are in Bend for the meeting, are: Lawrence Frizzell, Pearl V. Ingram, Norman C. White, Jesse G. Egan, William A. La Sater and Ben Young of the Fremont forest; W. A. Donnelly of Prineville, E. W. Donnelly of Sulphur, C. S. Conghton of Paulina, G. C. Blake of Mitchell, Ralph Elder of Antone, J. O. F. Anderson of Prineville, of the Ochoco forest; Perry South of Sisters, Bert Huey of La Pine, Glen Howard of Crescent, Roy Mitchell of Fort Rock, Ben Smith of Sisters, Frank Zumwalt of Sisters, of the Deschutes forest.

District Forester George H. Cecil, executive head of the national forests of Oregon and Washington, was in Bend Tuesday attending the ranger meeting of the Deschutes, Ochoco and Fremont national forests, which is being held in Lone Pine Labor temple. Assistant Forester C. J. Buck was also present.

Fire prevention work and personnel were discussed at the meeting held yesterday morning. Grazing was expected to be the topic of the afternoon session. Although it was thought that the meeting would be concluded Wednesday night, a special session on law enforcement in connection with fire trespass cases has been scheduled for Thursday. A stiff program of fire prevention is planned for the forests this year, with the hope of entirely eliminating man-caused fires.

The need of better sanitation in recreation camps in the national forests was emphasized in yesterday's session of the ranger meeting. Recreation was the general topic.

The forest service will provide outhouses as fast as funds are available for the purposes, but may ask local cooperation for part of this work during the present season, in order to protect the rivers along the banks of which these camps are located.

Forest management and timber sales were discussed in the afternoon.

ARCHITECT GIVEN DAMAGES FROM TWO

Damages of \$588.88 were awarded Lee A. Thomas in circuit court in his suit against C. J. Dugan and P. F. Beaulieu, alleging breach of contract. Mr. Thomas had submitted plans for a building to Dugan and Beaulieu, which he claimed were accepted in calling for bids on the building, which was not constructed. The defendants claimed that they had not contracted for the plans as co-partners, but for a garage company. It was also claimed that plans were faulty.

New York Boys' New Game. The game of marbles no longer holds a throne in boyville. Any New York side street where there's enough room between bluecoats and automobile traffic to play, will show you that a new game has taken its place.

"Sidewalk checkers," the boys call it. The new game really has the elements of both the old marble shooting days and checkers as played on a board. Checker men are used—red, black, blue—the color makes no difference. A ring is drawn with chalk and the object is to flip your checker man with enough force to knock your contenders out of the ring.

"Hully gee!" said a future Ponzil as he gathered up his winnings on Rende street near Broadway, "ain't I got enough lumber here to start me a paper mill?"—New York Sun.

DRAFT GREAT GRAIN SELLING PLAN FOR FARMERS

Here are the men who drafted one of the most gigantic and revolutionary grain selling plans in the history of the nation and which is to be put into operation by the farmers, if action taken at Chicago, April 6, does not go awry. The picture is one of the "Farmers Committee of Seventeen" of the American Farm Bureau Federation. In the center is Chairman C. H. Gustafson, of Lincoln, Neb., and C. H. Hyde, of Oklahoma one of the leaders. Their plan was drafted after nearly two years investigation. It was recommended to the Wheat and Corn Growers of the nation in Chicago this week for ratification. It is planned to create United States Grain Growers Inc. for national and export distribution of corn and wheat, and financed by the grain growers themselves. Herbert Hoover has endorsed the plan.

HOO-HOO HOLD CONCATENATION

FIRST INITIATION BY LUMBERMEN'S ORGANIZATION SINCE 1916 STAGED IN BEND—TWENTY CANDIDATES ADMITTED.

Bend's second Hoo-Hoo concatenation, the first held since 1916, was staged last night at the Emblem club, under the direction of H. R. Isherwood, secretary-treasurer, who is here from St. Louis for this purpose. George M. Cornwall of Portland, publisher of The Timberman, is also here to assist the 23 active members of the order in initiating the 20 "kittens" who applied for membership.

Mr. Isherwood will conduct similar concatenations in Portland, Fresno, Los Angeles, San Diego, and Trinidad, Col., and will hold meetings of lumbermen at Salt Lake, Cheyenne and Denver.

Conditions in the lumber industry in the east are improving, but cannot become normal until an adjustment with labor is reached," said Mr. Isherwood Wednesday. "In cities where such an adjustment has been made in the prices of commodities and the wage scale, business is going on as usual."

Both Mr. Isherwood and Mr. Cornwall were speakers at the noon luncheon of the Commercial club Wednesday. The latter mentioned the opening of a Hoo-Hoo lumberman's club in Bend, with the object of carrying out the program for which the order stands, which Mr. Isherwood characterized as the promotion of friendship, confidence and education among lumbermen in relation to the industry and for the ultimate good of the consuming public.

Good Reason. Grandmother had been talking to four-year-old Mary Ellen about becoming angry so easily. After the little girl had listened a few minutes she thought it time to tell of some of her good qualities, so she said: "Yesterday my doll got stepped on and broken and I didn't cry a bit or scold anybody."

"That was fine," approved grandmother very much pleased. A little later she happened to remember the incident and turned to Mary Ellen: "Who stepped on your doll yesterday?" she asked.

And back came the enlightening answer: "Why, I did, grandma."—Exchange.

Climate and Agriculture.

The surprising idea that an arid climate is the most favorable for agriculture is explained by a report on the Columbia Basin Irrigation Project in the state of Washington. In such a climate plant growth is stimulated by almost continuous sunshine, there is no night chilling or the soil following cloudy days, and crops are harvested promptly without spoilage by rain, the products being greatly improved and the harvesting cost lessened. The chief advantage of all, however, is control of the water, which by artificial irrigation can be supplied at the best time and in the quantities needed by the crops. The scant rainfall of the Columbia basin area has been a preparation for the new method, for the moisture has not been sufficient to leach away the stored plantfood, but there has been drainage enough to prevent the accumulation of alkali salts, the most soluble of the earth's constituents.

Did He Get It?

Awry was in the habit of asking his uncle for pennies. To break him of the habit his uncle told him he would give him pennies sometimes, but never when he asked for them. One day Awry went to his uncle's room, got down on the floor and said, "Uncle Albert, I'm just looking for a penny."

A Mastered Fear.

Government officers in India compile queer statistics. For example, they have recently reported that in 1919 the persons who came to their death by snake bite numbered 20,273, and that, in the same 12 months, 58,416 snakes were killed. Further, there is the record of 1,162 deaths by tigers, 469 by leopards, 294 by wolves, 201 by wild boars, 185 by crocodiles, 118 by bears, 60 by elephants and 23 by hyenas. Whatever may be the fear of wild animals among human beings it does not seem ever to have deterred settlement in new lands or persuaded people against living, as they have in India for centuries, as the neighbors of poisonous serpents and ravishing animals.—Toledo Blade.

Vertigo is Caused by Trouble in Ear.

Dr. Douglas Vanderhoof of Richmond, Va., states in the Medical Record that we must thoroughly understand that the labyrinth of the ear is the sense organ of equilibrium. Vertigo, from whatever cause, was essentially an ear study, and was always due to some disturbance of the vestibular apparatus.

How to Succeed. Orison Scott Marden, well known as an apostle of the cult of optimism, cheerfulness and business efficiency, gives the following formula for success: "Exactly in proportion to the degree in which you increase your self-confidence by the affirmation of what you are determined to be and to do, your ability will increase."

For Entertainment. The grocerwoman was "bidding" the little girl one day and asked her whose girl she was to which she replied: "Papa's." "Well, then, whose little girl is Maybelle?" "She belongs to mamma." "What about brother James then?" he said. She was confounded for a minute, then said: "Oh, he's just for entertainment."
