

LUMBER MARKET MORE SPOTTED; STRIKE CAUSES SLIGHT EFFECT

On the whole the lumber market is somewhat more spotted, says the American Lumberman's weekly review. In the East, in the South, in the Southwest and in the West the volume of orders and inquiries holds up well, but in territory tributary to Chicago there has been a slacking in the volume of both inquiry and orders. The Lumberman continues: "Some grades continue to be in very short supply and the demand is consequently forcing prices upward; there is evident, however, a decided sentiment in the lumber manufacturing industry to hold prices to a reasonable level. While, of course, manufacturers can no more combine to hold prices down than to raise them, this sentiment can not help but have a beneficial effect."

"On the Pacific coast the demand for the lower grades of lumber is better and this is particularly welcome as there has been a surplus of many

common grades. In the South timbers are in better demand both for export and for the oil fields.

"So far as can be ascertained, the calling off of the railroad strike had little effect upon the lumber market just as the prospect of the strike had little effect. Seemingly, therefore, the lumber industry never was seriously concerned over the prospect of a strike and from all reports, business generally was not alarmed."

"Since the settlement, however, there has been slightly more inquiry for railroad material and there are indications that the railroads will press repairs even more vigorously than during recent weeks and this, of course, will mean the purchase of a lot of railroad lumber. On the other hand, so far no car shortage has developed this year and therefore the railroads are not pressing the construction of new cars as they would if the country were suffering from the usual fall car shortage."

Truck Makes Flying Leap From Bridge—Lands On All Four Wheels, Driver Is Uninjured Except For a Slashed Thumb

A sheer leap from the east approach of the Newport bridge to the ground, 15 feet below, in a truck, the steering gear of which had been broken, Sunday resulted in no greater injury to Herbert Welborn, the driver, than a cut thumb. The cab of the truck was torn off, but it landed on all four wheels, and was not seriously damaged.

Welborn had crossed the bridge and was starting up the incline on the east side, when the truck

suddenly veered to the left, crashed through the railing and shot out into space, landing right side up. Welborn kept his seat until the truck hit the ground, cutting his thumb on the brake handle. He walked up town to a doctor's office for treatment. The cut was deep but narrow.

The truck jumped about 15 feet out from the wall, burying its wheels in the dirt. The cab fell behind the truck.

Alaska's Fine Scenes.
With the exception of a few areas in the Cook Inlet region, the topography of Chugach forest in Alaska is exceedingly rugged, the mountains often rising abruptly from the sea. On Resurrection Bay the towering peaks seem to reach into heaven. The timber line is usually at an elevation of about 2,000 feet; above this rise barren, glaciated peaks ranging from 3,000 to 8,000 feet in elevation.

Chinese Condemns Bribe.
There is a famous oriental saying condemning bribery. It is said that an ancient Chinese sage who lived in the Second century was offered a bribe. His silence being accepted as hesitation, he was assured that he was perfectly safe, as no one knew it. He replied: "Heaven knows it. Earth knows it. You know it. I know it. How can you say that no one knows it?"

Pollysyllable.
A word to the wise is sufficient; provided it is a long word!—Cartoons Magazine.

LEGAL NOTICES

IN THE COUNTY COURT OF THE STATE OF OREGON, FOR THE COUNTY OF DESCHUTES.

In the Matter of the Estate of Chas. L. Alverson, Citation.
To Miles Corning Alverson and Belle Corning Alverson, Greeting:
In the Name of the State of Oregon, You are hereby cited and required to appear in the County Court of the State of Oregon, for the County of Deschutes, at the Court room thereof, at Bend, in the County of Deschutes, on the 7th day of December, 1921, at 2 o'clock in the afternoon of that day, then and there to show cause if any exist why an order of sale should not be entered in the above matter directing the sale of the real property belonging to the above estate situated in Deschutes County and particularly described as the SW 1/4 of the NW 1/4 and the W 1/2 of the SW 1/4 of Section 15, the N 1/2 of the NE 1/4 and the SE 1/4 of the NE 1/4 of Section 23, all in Township 17 South of Range 10, East of the Willamette Meridian. The citation is served upon you by publication thereof pursuant to

the order of the Hon. R. W. Sawyer, Judge of the above named Court, made and entered the 22nd day of October, 1921, the date of the first publication being October 27, 1921.
Witness, The Hon. R. W. Sawyer, Judge of the County Court of the State of Oregon for the County of Deschutes with the seal of said Court affixed, this 22nd day of October, A. D. 1921.
Seal of the County Court
35-39c
Attent: J. H. HANER, Clerk.

NOTICE FOR PUBLICATION
Department of the Interior
U. S. LAND OFFICE at The Dalles, Oregon, November 3, 1921.

Earl Groff, of Bend, Oregon, who, on October 15, 1917, made homestead entry, No. 019356, for SE 1/4 SE 1/4, section 21, E 1/2 NE 1/4 and NW 1/4 NE 1/4, section 28, township 18 south, range 13 east, Willamette meridian, has filed notice of intention to make three year proof, to establish claim to the land above described, before H. C. Ellis, U. S. Commissioner, at Bend, Oregon, on the 15th day of December, 1921.
Claimant names as witnesses: Oscar Malmstrom, Francis H. St. Clair, William H. Stennick, Hugh B. Caldwell, all of Bend, Oregon.
J. M. DONNELLY, Register.

"OFFICER 666" TO BE B. A. A. C. PLAY

Amateurs Will Give Famous Comedy In Near Future—Cast To Be Announced This Week.

"Officer 666," the well known comedy success written by August MacHugh, will be the second offering of the B. A. A. C. players on the American Legion building stage. Parts are now being typed and the cast will be picked this week, starting actual practice next week.

This play, like its predecessor, "Believe Me, Xantippe," which amused local audiences over a month ago, is a Broadway success of unusual reputation. It has the advantage for amateur production of being enacted in one setting throughout the three acts, making long waits unnecessary.

The date on which "Officer 666" will be given has not been selected. It will play only one night.

MEN'S EVENING GYM CLASS IS POPULAR

Business Men Meet At 5:30 O'clock For Work Under Director A. P. Tauscher—Start Volley Ball.

One of the most popular of the gymnasium classes which Director A. P. Tauscher of the B. A. A. C. is getting under way is the business men's class at 5:30 o'clock Monday and Thursday evenings. Attendance has been good at each meeting of this class.

Volley ball was started Monday as part of the program of this class, in addition to the marching, running, calisthenics and apparatus work which the class had been doing previously. Basketball will be played for a part of the period after the men get in better condition. Swimming may be indulged in after the period is over.

THEORY OF ORDINARY COLDS

Doctor Maxwell Expresses Opinion Trouble is Due to Development of Bacterial Growth.

I have believed for some years that common colds are due primarily to the development of bacterial growths in the accessory nasal sinuses and that this development is caused by the obstruction of the drainage of these sinuses by the swelling of the nasal mucosa, writes Dr. G. M. Maxwell of Roanoke, Va. Swelling of the mucosa is due in turn to irritation from some foreign substance, such as dust, bacteria and pollen. The bacteria are those ordinarily found in the nasal cavity and cause trouble only when the free access of air into the field is prevented by the swollen mucosa. This opinion has been strengthened by the fact that continuous treatment or spraying with a mild nonirritant astringent will in the majority of cases arrest an acute cold. When a cold holds on for as much as a week I have nearly always found cloudiness in one or more of the sinuses, and get immediate relief by washing out these sinuses with a mild alkaline solution.

The Cold South.

From the observations made within recent years by Antarctic explorers there has been recalculated the average temperature of the southern Hemisphere as compared with the northern, and the results differ, in some respects, from those heretofore accepted. It is found that the mean temperature south of the equator, for the entire year, is about two and three-quarter degrees lower than north of the equator. But the annual variation of temperature in the northern hemisphere is twice as large as in the southern, our summer temperature being much higher and our winter temperature perceptibly lower than those of the corresponding seasons in the southern half of the globe.

Spies Everywhere.

"How is the patient progressing?"
"Doing as well as could be expected."
"Able to receive visitors yet?"
"Come around in about three days."
"Thanks, I certainly will."
Overhearing this conversation you would naturally suppose that somebody was recovering from a serious complaint. As a matter of fact, citizens who engage in home brewing can't be too careful about discussing it on a street corner.—Birmingham Age-Herald.

Benefits of Dark Food.

A party of picnickers, after a long, dusty walk reached the parking place where they spread out their luncheon. As they were setting the table, one young woman exclaimed:
"Ain't I glad I brought a chocolate cake. It doesn't show dirt."—Milwaukee Journal.

CLOCK CURED OF TOOTHACHE

Dentist Carefully Inserts Two New Teeth and Few Rods in Immense London Timepiece.

The clock that hangs eight feet over the junction of the Strand and Fleet street, London, from the east tower of the law courts, has just recovered from an attack of toothache, London Tit-Bits states.

The bells and the intricate mechanism occupy three stories at the top of the tower, and constant service year in and year out has caused the trouble.

When the dynamo which winds up the weights was put into gear recently there was a squeak from the winding apparatus, and a couple of teeth were wrenched from one of the essential cogs.

A clock dentist was immediately called in, and after careful treatment, involving two fresh teeth and the renewal of a number of steel rods, the clock once more strikes the hour with unerring punctuality and has entirely recovered from the weakness developed during recent years.

The rods which have now been renewed had not been touched since 1883, when the clock was first put up. Few people in London, probably, know that in this clock at the courts they have a mechanism unique in the history of clock-making.

Invented by a carpenter on an entirely novel principle, it is the only one of its kind in existence, an attempt to make a duplicate for St. James palace having proved a failure.

It is so accurate that it does not lose as much as one minute in three months.

The weight controlling the striking mechanism weighs 1 1/2 tons, and hangs on a wire 85 feet long from the top of the tower into the foundations.

Too Bad.

An ardent angler took a friend fishing. He knew nothing about the gentle art, but was set up with all the necessary tackle and a nice, comfortable seat on the bank.

The experienced hand started fishing a few yards higher up the stream.

Presently the novice said: "How much do those red things cost?"

"I suppose you mean the floats?" said the angler. "That only costs about twopenny."

"Well, I owe you twopenny," said the novice. "The one you lent me has sunk."—London Tit-Bits.

Sifting Out the Fleas.

It is known that plague is carried from one person to another by fleas and that these fleas normally live on rats, but Major F. W. Cragg of the Central Research Institute, Kasauli, India, asserts that only certain species of fleas are to blame, and he is now making a special study of all the varieties of fleas in India in an endeavor to find which is really the guilty one.

TUESDAY, NOVEMBER 15TH

At the Ed Halvorson farm, one and one-half miles southeast of Bend, near O'Donnell slaughter house. Sale begins at 10 A. M. sharp.

- 1 Red Durham Milk Cow, giving six gallons when fresh.
