

METHODISTS TO DEDICATE SOON

Program For August 13 Is Announced — Bishop Shepard Will Speak

Completion of plans for dedication of the new Methodist church on Sunday, August 13, were announced by Rev. J. Edgar Purdy on his return from Portland. The dedication sermon will be preached by Bishop W. O. Shepard at the 11 o'clock service on that morning, which will be the first service held in the new church auditorium. Large attendance is expected both on account of the occasion and because Bishop Shepard is to speak. The service will be simplified so that the bishop may have ample time to deliver his sermon.

At noon a basket dinner will be held in Epworth hall, where tables will be arranged. Everyone is invited to take part in this feature, Purdy announces.

At a service which will begin at 3 o'clock in the afternoon, the church building will be formally dedicated. The actual dedication will be preceded by a reminiscence service, at which former pastors of the Bend church, if any are present, and other visiting ministers, will speak.

The evening sermon will be preached by Dr. William Wallace Youngston of Portland. This will be the regular union service attended by the Presbyterians of Bend, as well as others who are interested in the dedication of the new building.

The building is practically completed, except for the placing of the windows and the seats, and the building of the concrete steps and walks outside.

WILL NOT HURT CRESCENT LAKE

Scenic Beauty To Be Unimpaired By Development Says Copper.

SALEM, July 31. — Raising the level of Crescent lake 10 feet to store water for the use of the Tumalo irrigation project will not spoil the beauty of the lake or lessen its appeal to tourists, is the belief held by State Engineer Percy A. Copper. The only damage which Copper foresees, will be the killing of a fringe of trees around the lake's edge.

In the construction of a dam at the outlet of the lake it will be necessary to dredge out the bottom of the outlet, but the state engineer does not think this will mar the scenic effect of the lake in a serious degree. During the winter and spring months, from October to April, the stored water in the lake will cause the surface to rise possibly 10 feet above the normal level, and this, it is said, will kill a fringe of trees possibly 100 yards wide around the lake.

The state irrigation securities commission has certified bonds for the district in the sum of \$550,000 for construction of the project. About \$40,000 of this will be used in constructing the dam at the outlet of Crescent lake and the remainder for the construction of the rest of the works and for the repair and extension of the Tumalo system.
