PIERCE CLAIMS DECLARED FALSE

To the Editor: Walter Pierce, democratic candidate for governor, has succeeded in creating the impression that if elected governor he can cut taxes in two. The claim that he can reduce taxes 50 per cent is simply a vote catching extravagance upon which to ride into office. Let us see how much a governor has to do with Deschutes county taxes.

The total amount levied on Deschutes county property this year is \$615,065. Of this, 83 1/2 per cent was levied by county and local authorities for schools, roads, city and town purposes, including the irrigation district tax of \$76,088. How could any governor cut this local part of the tax bill in two? Reduction of these local taxes is up to the voters in the local districts.

When cornered, Mr. Pierce admits his 50 per cent tax cut promise is intended to apply to state taxes only. Let us see how this works out on Deschutes county.

Only 16 1/2 per cent of all Deschutes county's taxes this year were state taxes—for soldiers' bonus 1 1/2 per cent, for market roads 1 1/2 per cent, for state aid to elementary schools 3 1/2 per cent, and for state higher educational purposes 5 per cent, the latter including the educational aid to the soldiers and sailors, as well as all the millage bills and appropriations for Oregon Agricultural college and University of Oregon.

Senator Pierce introduced several of these tax measures and supported all of them. Which ones will he cut out?

The balance of the state tax, 4 1/2

per cent, goes mainly to support institutions caring for the insane and other afflicted, besides paying expenses of state government. Even if Mr. Pierce cuts this amount in two, he would reduce Deschutes county's tax bills only 2 per cent; yet even this amount could not be cut in two without turning insane, feeble minded, orphans and other dependents out upon the public for charity.

The claim that taxes can be reduced 50 per cent or any other substantial amount, by a governor or through his influence, is so preposterous that it is obviously intended only for campaign purposes.

The problem of tax reduction is mainly a local one, up to the people of the various taxing districts.

Of the total tax bill of Oregon this year, \$40,473,996, only 23 per cent or \$9,373,376, was levied as state taxes. This amount included soldiers'

bonus millage necessary for soldiers' loan bond redemption, market road millage, millage for state aid to elementary schools and all the millage and appropriations for state educational institutions, including the soldiers' educational aid.

Only \$2,514,080, or 6 per cent of all taxes paid in Oregon this year, were for general state purposes outside of roads and education, while 94 per cent were taxes voted by the people of the state or of local taxing districts, or for purely local expenses under control of the people of each county and locality.

As state senator, Mr. Pierce introduced more bills than any other member of the kind that increase taxes. He voted for practically every appropriation and millage bill that came up.

Orchids in British Isles. Glasgow, with 12,000 orchids in four of its public gardens, probably takes the lead among British municipalities. Kew gardens has 1,000 or more different orchids in cultivation, but 10 or 20 times that number are represented in a dry state, stored and classified in the Kew herbarium. Apart from public gardens, orchid growing in the past has been considered the special privilege of the rich.

Simple Paint Remover. Heated lye water applied with an old scrubbing or paint brush to woodwork or furniture will easily remove the paint or varnish with the aid of a scraper.
