

COUNCIL FAILS IN ATTEMPT TO REMOVE HAZARD

Lawsuit on Aune Barn Again Thought Necessary

ORDER MORE DRILLING

Eight Inch Hole for Subterranean Drainage to Be Sunk—Warrant Indebtedness of City Given as \$27,226.94 in Report

When the present city council took office at the beginning of 1921, one of the big things which the administration sought to accomplish was the elimination of the Aune barn as a conflagration hazard. As the council goes out of office with the close of 1922, it will be continuing the fight with the somewhat meager satisfaction that although it has not made any progress toward this goal, it has at least lost no ground.

Mayor E. D. Gilson's queries at Friday night's regular council session as to just what had been done in the matter, brought a statement from Fire Chief Tom Carlson that H. H. De Armond, special attorney for the city in this case, had been unable to secure an agreement from the owner of the property that it would be razed by a certain date, and that apparently a law suit would be necessary to force abandonment of the barn.

"It looks to me like a game of stalling," declared Councilman G. H. Baker.

"I move that the case be referred back to City Attorney C. S. Benson," suggested N. H. Gilbert, alluding to the fact that the city attorney had been ready to start suit when the matter was taken from his hands.

Benson couldn't see Gilbert's motion at all. "No you don't," he retorted. "You've got legal talent now."

Another step toward a subterranean system of sewage disposal was taken by the council when drilling of an eight inch hole near the foot of Oregon street was authorized. The hole, it is estimated, will take care of surface drainage for a large part of the downtown district.

In the effort to secure more uniform illumination of the business section of the city by cluster lights, the city attorney was empowered to draft an amendment to the existing ordinance, authorizing the city to shut off the current on clusters not properly maintained.

Councilman Innes reported completion of numerous bridge repairs.

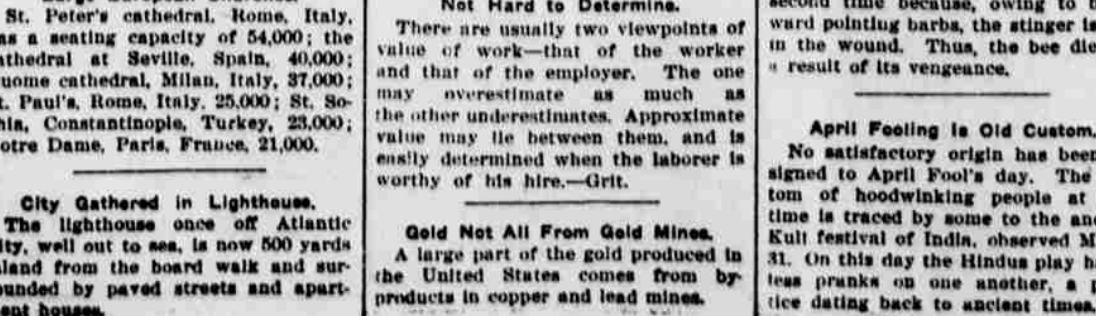

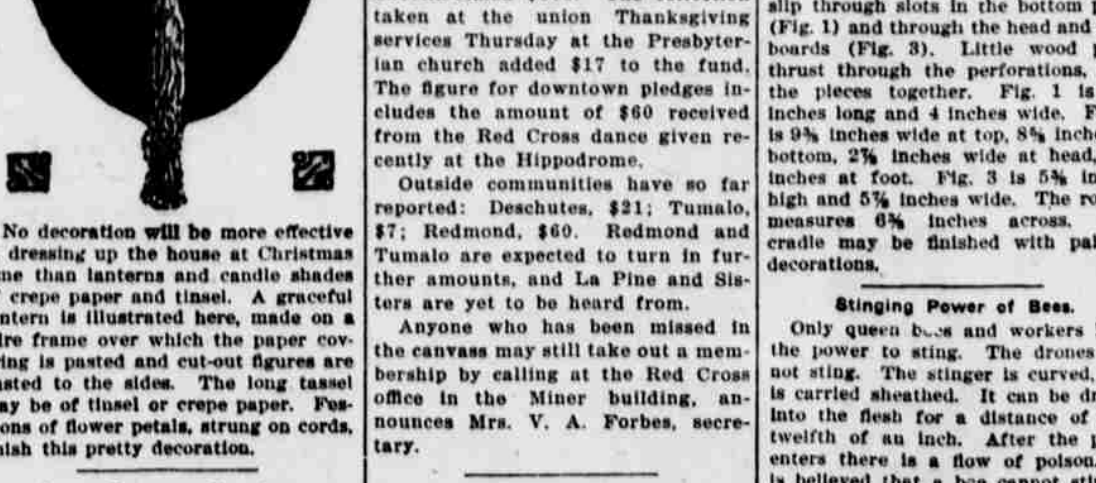

Fires Are Few

Officers' reports featured the statement by Miss M. E. Coleman, treasurer, that the city's outstanding warrant indebtedness is only \$27,226.94. Receipts of the recorder's office for the past month were \$648. Sixteen scarlet fever cases quarantined and 19 released were reported by the city physician, while the number of births was 15 as against four deaths. Fire Chief Tom Carlson gave two fires as occurring in the month of November. The police department made 14 arrests for drunkenness and disorderly conduct, one for permitting minors to gamble, and one for carrying a deadly weapon, and two for possessing liquor.

Bills Ordered Paid

The following bills were ordered paid:

Miller Lumber Co.	\$2.24
C. S. Reed	92.60
Bend Hardware Co.	5.60
Emma U. Broderick	3.50
C. S. Benson	91.66
C. A. Fowler	34.00
A. G. Long Co.	86.70
James Gallagher	25.50
J. Whitted	19.50
Frank McConnell	48.00
W. W. Carlson	176.21
M. P. Hoover	150.00
Anna R. Finley	75.00
Woman's Civic League	20.00
Tom O'Brien	127.50
Ross Farnham	151.25
A. J. Welch	125.00
J. E. Albright	12.00
Albert Julian	105.00
H. O. Jackson	500.00
W. M. Houston	167.50
Albert Wright	10.00
Heyburn Hardware Co.	1.75
H. O. Jackson	117.94
W. B. Reed & Son	73.00
W. D. Evans	9.40
Fred Gilbert	18.50
James Henderson	26.00
C. R. Gartrell	2.00
B. W. L. & P. Co.	572.65
A. L. Saye	3.50
C. E. Graesen	61.00
J. C. Penney Co.	7.92
Seattle Kitchen	8.40
Bend Press	11.50
The Bend Co.	500.00
Fire Department	16.84
Mary E. Coleman	103.00

RAILROAD PUBLICITY MEN WILL SEE CENTRAL OREGON RESOURCES

Reach Bend Thursday on Trip to Secure Data for Advertising Campaign

Incident to a gigantic publicity campaign for the northwest, planned by the Great Northern, Northern Pacific and Burlington railway lines, through which \$1,000,000 will be spent in four years in advertising this region, a party of officials of these roads are due to arrive in Bend this forenoon, coming by automobile from Redmond, and meeting with the directors of the Bend Commercial club and others interested at a luncheon at the Pilot Butte Inn. The rest of the day will be spent in viewing Central Oregon and local industries. The party will leave at 5 o'clock that evening for Portland.

The party will be headed by Carl McQuinn and Harlan Smith, special advertising representatives of the C. B. & Q., Great Northern and Northern Pacific railways. Others included will be R. W. Foster, general agent, C. B. & Q., of Portland; F. W. Graham, assistant general agricultural development agent, Great Northern, of Seattle; C. E. Arney, western immigration and industry agent, Northern Pacific, of Spokane; R. H. Crozier, assistant general passenger agent, S. P. & S., O. E. and O. T., Portland; J. T. Hardy, traveling freight and passenger agent, S. P. & S. and O. T., Portland; W. H. Ormsby, traveling freight agent, Northern Pacific, of Portland; John Ruming, traveling passenger agent, Great Northern, of Portland; F. G. Smith, traveling freight agent, Great Northern, Portland; W. P. Powers, traveling freight and passenger agent, C. B. & Q., Portland.

Official announcement of the plan to advertise the northwest was made in Portland Saturday under the signatures of P. F. Eustis, A. J. Dickinson and A. B. Smith, passenger traffic managers there of the three railroads. The announcement reads in part as follows:

"This territory is tremendously rich in natural resources. Its agricultural and mineral wealth, its natural outlets to the commerce of the world, are assets thoroughly appreciated in the northwest, but not by the balance of the country. It is believed that through publicity, the northwest can be established in the national consciousness as a section holding out great appeal to any man who desires to improve his condition.

"To this end, a campaign of national advertising has been planned. The story of the northwest will be told; its history, its development, its economic position, its economic possibilities. The films recently taken for the motion picture library are now being developed. Next comes a campaign which involves the use of the largest national magazines and agricultural publications."

McQuinn and Harlan have come to the northwest to gather information in all parts of the territory, studying the industrial and natural resources, to supplement the information already in the possession of the railroads, to be used in this campaign.

Bend Observes Driest Thanksgiving; Police Search In Vain For Liquor, And Can Locate Only One Inebriate

Bend experienced the driest Thanksgiving day in her history Thursday, police reported this morning, after a fruitless search for booze. Perhaps the fact that the roads leading into the city have lately been watched more closely than usual, had something to do with it, but at any rate, Bend was practically boozeless.

The convivial twins, Tom and Jerry, were conspicuous chiefly by their absence, and the serving by officers of half a score of search warrants failed to produce any results.

Sobriety was especially noted at dances and at the smoker, officers stating that during the holiday period only one inebriate was found. He was quietly intoxicated in his own home, and was allowed to remain there.

Ideal Thanksgiving weather was enjoyed, crisp and bright in the morning, with a light fall of snow in the afternoon and evening.

Union services were held at the Presbyterian church, and mass was celebrated at St. Francis Catholic church, both services coming in the morning.

In the afternoon the intersectional football game at Redmond with Oregon City drew many fans, and the smoker and dances were the chief features of the evening.

ROLL CALL NOT YET COMPLETED

Receipts Below Those of Last Year—\$1,953.50 Is Total Today

Receipts from the Red Cross roll call in Bend were so much below those of last year at the time fixed for the campaign to close, that it has been necessary to leave the membership open for a further period, announces Rev. F. H. Beard, in charge of the canvass. A total of \$1,953.50 was received up to Saturday in pledges and cash memberships. No part of the canvass was complete, however, and there are a number of communities outside of Bend yet to report, so that the present total will be increased.

Pledges made in the Bend business district amounted to \$328; and cash memberships taken out downtown and in the residence district totaled \$430.50. The canvass at the Brooks-Scanlon plant yielded \$560, and at Shevlin-Hixon \$600. The collection taken at the union Thanksgiving services Thursday at the Presbyterian church added \$17 to the fund. The figure for downtown pledges includes the amount of \$60 received from the Red Cross dance given recently at the Hippodrome.

Outside communities have so far reported: Deschutes, \$21; Tumalo, \$7; Redmond, \$60. Redmond and Tumalo are expected to turn in further amounts, and La Pine and Sisters are yet to be heard from.

Anyone who has been missed in the canvass may still take out a membership by calling at the Red Cross office in the Miner building, announces Mrs. V. A. Forbes, secretary.

Not Hard to Determine.

There are usually two viewpoints of value of work—that of the worker and that of the employer. The one may overestimate as much as the other underestimates. Approximate value may lie between them, and is easily determined when the laborer is worthy of his hire.—Grit.

Gold Not All From Gold Mines.

A large part of the gold produced in the United States comes from by-products in copper and lead mines.

FAMOUS PRIEST TO COME HERE

MacSwiney Advisor on Way to Join Catholic Clergy of Bend

Father John F. O'Connor, better known as Father Dominic, spiritual advisor to Terence MacSwiney, late lord mayor of Cork whose death came as the result of a hunger strike while a British prisoner, will be a member of the local clergy at St. Francis Catholic church. Father O'Connor arrived in New York Sunday night from Ireland, accompanied by Father Joseph Fennelsen, who is to be stationed at Los Angeles. It is understood that Father Luke Sheehan, head of the Catholic clergy in Bend, is accompanying them. Father Sheehan has been on a protracted visit in Europe.

Father O'Connor is a nephew of Father Sheehan. It is understood that his coming will be an addition rather than a replacement in the personnel of the local clergy.

Cardboard Doll Cradle

Little girls get much joy out of dolls' furniture. A Dutch cradle and the pieces that make it are shown here, in heavy cardboard. The tabs on the side pieces (Fig. 2) are perforated and slip through slots in the bottom piece (Fig. 1) and through the head and footboards (Fig. 3). Little wood pegs, thrust through the perforations, hold the pieces together. Fig. 1 is 8 1/2 inches long and 4 inches wide. Fig. 2 is 9 1/2 inches wide at top, 8 1/2 inches at bottom, 2 1/2 inches wide at head, 2 1/2 inches at foot. Fig. 3 is 5 1/2 inches high and 5 1/2 inches wide. The rocker measures 6 1/2 inches across. The cradle may be finished with painted decorations.

Stinging Power of Bees.

Only queen bees and workers have the power to sting. The drones can not sting. The stinger is curved, and is carried sheathed. It can be driven into the flesh for a distance of one-twelfth of an inch. After the point enters there is a flow of poison. It is believed that a bee cannot sting a second time because, owing to backward pointing barbs, the stinger is left in the wound. Thus, the bee dies as a result of its vengeance.

April Fooling Is Old Custom.

No satisfactory origin has been assigned to April Fool's day. The custom of hoodwinking people at this time is traced by some to the ancient Kuli festival of India, observed March 31. On this day the Hindus play harmless pranks on one another, a practice dating back to ancient times.

FREIGHT TRAIN PUT ON DESCHUTES RUN

Three Trips Weekly to Be Made by Oregon Trunk Train—Relieves Passenger

Three round trips from Bend to Fallbridge weekly will be made by a freight train which is now being scheduled, to relieve the passenger train of hauling freight and particularly of the necessity of hauling empty cars to Bend to be loaded with lumber, it is announced by J. T. Hardy, traveling freight and passenger agent for the Oregon Trunk.

On Wednesday nights a refrigerator car will be run to Portland, its use at this time of year being to prevent freezing damage to goods shipped, as well as damage from heat.

ARMIES OF WOMEN WARRIORS

Amazons, According to Ancient Writers, Were Fierce Fighters—Some Records of Their Deeds.

According to ancient writers, the Amazons were a nation of female warriors, who allowed no men to live among them, but marched to battle under command of their queen. They held occasional intercourse with the men of neighboring states. If boys were born to them, they either sent them to their fathers or killed them. But the girls were brought up for war, and their breasts were burned off that they might not be prevented from bending the bow. From this custom they received the name of Amazons, which is "breastless."

The Asiatic Amazons are said to have at one time subdued the whole of Asia, and to have built Smyrna, the city recently captured and burned by the Turks, and other cities. Other nations of Amazons mentioned by the ancients were the Scythian Amazons, who in aftertimes married among the neighboring Scythians, and the African Amazons, who subdued the Gorgons and Atlantes, marched through Egypt and Arabia, and founded their capital on the Lake Tritonis, but were annihilated by Hercules.

What is Earth Like Inside?

Old ideas in regard to the high heat on the unknown inside of the earth may have to be revised, if the inconclusive evidence adduced by temperature tests in 107 deep wells in the United States by Dr. C. E. Van Orstrand, physical geologist of the United States Geological survey, should be confirmed by later investigations. According to this expert, the steady increase in temperature, so great that a miner could not live at a depth of one mile, appears to be less rapid a little beyond that depth. Combined with the fact that mathematicians have not yet found the law of distribution of temperature from the surface to the center of the earth, this makes uncertain the estimation of some scientists that the heat at the center is as high as 180,000 degrees Fahrenheit. Observations at a depth of about 7,500 feet have been taken, but Dr. Van Orstrand has not been able to carry his investigations further.—Science Service.

Population on Farms.

The total farm population, which in the last census for the first time was enumerated separately from the rural population as a whole and therefore has no comparative figure in the preceding census, amounts to 61 per cent of the rural population, which includes residents of incorporated cities and villages having fewer than 2,500 inhabitants, unincorporated hamlets, mining regions, and other areas not devoted to agriculture. Thus, while the rural population constitutes nearly one-half of the country's total, only about three-tenths of its inhabitants are living on farms.

Early Irish Monastery.

The site of one of the earliest Christian monasteries in Ireland has been found at Mahee Island, Strangford Lough, near Belfast. The ruins have been identified as those of Nendrum monastery, mentioned in Mulcha's "Life of St. Patrick," written before 609 A. D.

Extensive excavations have been carried out and valuable material, including some stones with writing, the exact meaning of which has not yet been ascertained, have been unearthed. Some of the writings are believed to be of Danish origin.

Simplicity.

Mrs. Casey was calling upon Mrs. Callahan, and soon the talk turned to the daughter of the latter, who had but recently returned from school in another town.

"There's a plain girl for ye," said Mrs. Callahan, "absolutely no airs, in spite of the fact that she has been at a finishing school. Nothing stuck up about Mary. She's unanimous to everybody and never keeps a girl waiting. No, Mrs. Casey, she just runs down, non de plume as she is!"—Exchange.

To Screen the Phone

Little conveniences that adorn the house carry messages of good will at Christmas time. A phone screen covered with plain and figured cretonne, and providing a place for records of telephone numbers and calls will be welcome to men and women alike.

Stockings.

The long stockings formerly worn were called hose; when knee-breeches were introduced the breeches were called upper-stocks and the lower part either-stocks or stockings. The knitted stocking originated in Italy; it was first brought to England by William Butler in 1564. Woven stockings were introduced by William Lee, of Stroudbridge, in 1590.
