Actor Brando undergoes tests

SANTA MONICA, Calif. (UPI)—Actor Marlon Brando was to undergo diagnostic tests this week at St. John's Hospital where he was recuperating today from a kidney ailment.

Attendees said the 39-year-old actor was "improving nicely" and that his temperature had dropped to normal over the weekend for the first time since he was rushed to the hospital in an ambulance last Wednesday.

Attendees said it was too early to predict when the Academy Award winning actor would be released from the hospital.
