Legislation

Continued from A1

Oregon's child abuse reporting law expressly states that professional privilege, like doctor-patient or therapist-client, shouldn't bar a professional from testifying against a client in cases of child abuse. But the elder abuse reporting law contains no such provision, as Judd's attorneys argued in Deschutes County Circuit Court.

The Legislature should have to address the discrepancy, they argued, and this session, lawmakers will have the chance.

At the time of her death, Nada Colleen Bodholdt was a resident of Stone Lodge retirement home who had recently entered hospice care. Judd, a registered nurse, had been her caregiver for several years.

When Bodholdt died New Year's Eve 2015, her doctors didn't suspect foul play given her declining health, and she was cremated without autopsy.

Several months later, Judd saw a social worker through her job's employee wellness program and

during the session, confessed to smothering Bodholdt. The social worker, Wendy Jones, went to police, believing she was required to under Oregon's mandatory reporting law for elder abuse.

Judd was charged with murder, with Jones as perhaps the state's biggest witness. Judd's defense objected to Jones testifying at a pre-trial hearing, arguing their conversations were privileged, as they would be in other client-therapist relationships. Judge Beth Bagley disagreed and admitted the testimony as evidence.

Judd pleaded guilty to manslaughter in a plea deal calling for 75 months in prison. The deal included a provision allowing Judd to appeal Bagley's ruling allowing Jones' testimony. In 2019, the Oregon Court of Appeals sided with Judd and sent her case back to Deschutes County for retrial.

By April 2020, Judd had been in custody for 50 months. She pleaded guilty again, this time agreeing to a 60-month sentence.

Judd, now 50, is no longer listed as an inmate of the Oregon Department of Corrections.

Judd

Schools

Continued from A1

Of the more than 12,000 Bend-La Pine families that filled out an online survey earlier in January indicating their school preference, 86.5% said they planned to send their children back to in-person learning, according to district spokesperson Alandra Johnson.

Bend-La Pine is not the first local school district to bring back elementary students. More than 90% of Culver students resumed in-person school on Jan. 19, and elementary students in Crook County and Culver have been in school, at least part time, since the fall of 2020.

The Jefferson County School District is tentatively planning to bring back all its students on Feb. 1. Redmond schools were going to reopen on Feb. 2, but that date was pushed back to Feb. 22 due to rising COVID-19 cases among staff.

Many parents at Jewell Elementary were grateful to have their children back inside a classroom. In particular, they were excited for their kids to interact with other students.

Sandra Thomas, who was dropping off her third grader, said although her son's academics were solid at the district's Bend-La Pine Online option, he missed being around other kids and having a teacher in front of him.

"I feel like the education was really good, but missing that social interaction was huge," Thomas said. "It was fun having him home and getting to spend extra time with him, but he needs the kids."

Third grader Keidis Rapien was certainly ready for some social interaction.

"I'm most excited about seeing all my friends and recess," Keidis, 9, said in the Jewell parking lot. His mother, Stevi Dougherty, said she hoped Keidis would get a stronger education in person than through online distance learning. And she was confident that the school's COVID-19 rules, like mandatory mask-wearing and social distancing, would be effective.

"They're going to keep him safe," Dougherty said. "They have a lot of great protocols."

Charles Silva said he felt a little nervous about dropping off his second grade son, Jasper, due to COVID-19.

"I do know they're doing their best to do the social distancing, keep everyone as happy, healthy, safe as possible — but it's a pandemic; you've gotta worry," Silva said.

Still, Silva said he mostly felt comfortable with his son going back into Jewell. And he believed the socialization and ability to work with fellow kids on school projects would benefit Jasper.

"I'm just super grateful for the teachers and staff, who have been working so hard to get this going," Silva said. "The kids need it."

Seven hours later, after the school day was finished, Jewell Elementary Principal Scott Edmondson said this unusual first day back was a success. The students were mostly good about following COVID-19 protocol, and staff enjoyed being back in school, working with their students, he said.

"We're just glad to have kids back, and get back in the routine," Edmondson said in a phone interview with The Bulletin.
