140 are missing after glacier breaks in India's Himalayas

BY BISWAJEET BANERJEE AND RISHABH R. JAIN
Associated Press

RISHIKESH, India — Indian rescue crews struggled to reach trapped victims Sunday after part of a glacier in the Himalayas broke off and released a torrent of water and debris that slammed into two hydroelectric plants. At least nine people were killed and 140 were missing in a disaster experts said appeared to point to global warming.

Video from India's northern state of Uttarakhand showed the muddy, concrete-gray floodwaters tumbling through a valley and surging into a dam, breaking it into pieces with little resistance before roaring on downstream. The flood turned the countryside into what looked like an ash-colored moonscape.

More than 2,000 members of the military, paramilitary groups and police took part in the search-and-rescue operation, including soldiers expert in mountaineering, working into the night under bright halogen lights, authorities said.

The flood was caused when a portion of Nanda Devi glacier snapped off in the morning, releasing water trapped behind

it, authorities said. It rushed down the mountain and into other bodies of water, forcing the evacuation of many villages along the banks of the Alaknanda and Dhauliganga rivers.

A hydroelectric plant on the Alaknanda was destroyed, and a plant under construction on the Dhauliganga was damaged, said Vivek Pandey, a spokesman for the paramilitary Indo Tibetan Border Police. Flowing out of the Himalayan mountains, the two rivers meet before merging with the Ganges River.

Pandey said at least 42 workers were trapped in two tunnels at the Dhauliganga project. Twelve were rescued from one of the tunnels, while at least 30 others remained stranded inside the other, he said.

"The rescuers used ropes and shovels to reach the mouth of the tunnel. They dug through the debris and entered the tunnel. They are yet to come in touch with the stranded people," said Chief Minister Trivenendra Singh Rawat, Uttarakhand's top elected official.

An additional 140 workers at the two plants were missing, Pandey said. Surjeet Singh, a police official, said at least nine bodies were recovered.

Avalanche kills 4 backcountry skiers

BY LINDSAY WHITEHURST
Associated Press

SALT LAKE CITY — Four backcountry skiers in their 20s died when one of the deadliest avalanches in Utah history hit a popular backcountry skiing area, police said Sunday.

Four other people were also buried in the Saturday slide but managed to dig themselves out and didn't suffer serious injuries, according to Unified Police of Salt Lake County.

The skiers were from two separate groups, and all eight had prepared with the necessary avalanche safety gear, authorities said.

The four killed were all from the Salt Lake City area, not far from the spot where they were swept up by the skier-triggered avalanche in Millcreek Canyon.

Three of the deceased were identified as Salt Lake City residents: Louis Holian and Stephanie Hop-

Salt Lake County Sheriff Search and Rescue crews respond to the top of Millcreek Canyon where four skiers died in an avalanche Saturday, near Salt Lake City. Four other skiers were injured, authorities said. The skier-triggered avalanche swept up eight people in their early twenties to late thirties who were in two groups touring the backcountry, Unified Police Sgt. Melody Cutler told the Salt Lake Tribune.

kins, both 26, and Thomas Louis Steinbrecher, 23. The fourth, 29-year-old Sarah Moughamian was from the suburb of Sandy, Utah.

They were experienced skiers who were well known in

the community, Drew Hardesty with the Utah Avalanche Center told the Salt Lake Tribune. The avalanche danger around Salt Lake was high on Saturday, the center said as it tweeted out a warning hours before the avalanche.

A faint distress call from an avalanche beacon alerted police to the slide shortly before noon on Saturday. The survivors found their four companions and dug them out, but they were already dead, police said.

The still-unstable snow conditions kept rescuers from immediately recovering the bodies; recovering operations resumed on Sunday morning.

Avalanches have also claimed other lives in recent days: the bodies of three hikers were found near Anchorage, Alaska, on Thursday. In Colorado, four backcountry skiers have died in two separate slides in the last week.

Avalanche forecasters and search-and-rescue groups have been worried for weeks that more people would be venturing into the backcountry to avoid crowds and reservation systems at ski resorts during the coronavirus pandemic.

Taylor Towery and the team at The Bulletin have been knowledgeable, attentive to our needs and delivered successful print and digital campaigns. We will continue to use them as we grow our business and expand throughout Oregon and look to them for advertising solutions. Thank you for your continued professionalism and kindness.
