Reebok

Sun Valley, ID

Continued from A11

But those numbers fail to capture the actual scale of the brand's descent. For a brief moment in the late 1980s, Reebok actually surpassed Nike to become the biggest brand in the industry. Powered by a simple, massively popular aerobics shoe, Reebok actually ket share.

Ric Long, a veteran of the

shoe industry now retired, worked at Reebok in those

"It was crazy," he said. "It was management by chaos and

Reebok asked Long to lead its entry into the basketball shoe business.

"I questioned why we would do that," he said. "We were so popular in fitness and with

basketball?" As far as Long is concerned,

it was bad marketing that proits peak, the brand unveiled its "UBU" ad campaign, which

which bought Reebok in 2006, announced Tuesday that it would sell Reebok.

This stock image

shows a pair of Ree-

bok shoes. Adidas,

equated Reebok with noncon-

The campaign made one thing clear: It wasn't a sports brand, Long said.

Reebok recognized it needed to earn its sports bona fides. In 1987, it paid \$180 million for Avia, a fast-growing sneaker startup here in the Portland

But it never clicked, just as the Adidas acquisition never worked two decades later.

Reebok's moment in the sun was brief.

Nike came back quickly retook the industry lead and never looked back.

Nike has surpassed \$40 billion in annual sales. Reebok's are in the neighborhood of \$2 billion.

Adidas is expected to reveal more about its divestiture plan in March when Adidas reveals its annual financial results.

"Adidas and Reebok will be able to significantly better realize their growth potential independently of each other," sted said.

Lithium

Continued from A11

The lawsuit said the data flies in the face of earlier water reviews in the area by the bureau, trout population studies by the U.S. Fish and Wildlife Service and the Nevada Department of Wildlife and the bureau's own grouse protection

"BLM has wholesale ignored the inconsistency of the mine with BLM's sage grouse plans and associated regulations," the lawsuit said, noting the project borders one of Nevada's largest remaining populations of greater sage grouse.

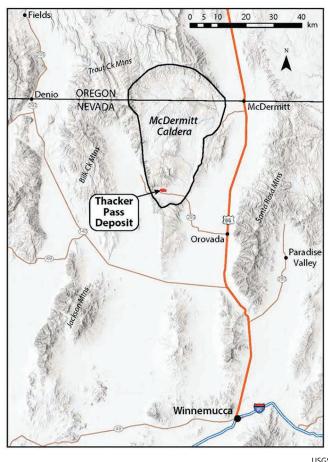

Bureau spokeswoman Heather O'Hanlon said in an email the agency doesn't comment on pending litigation.

Lithium Americas didn't immediately respond to requests for comment.

The Thacker Pass mine is planned on federal land above an extinct volcano formed millions of years ago about 25 miles south of the Nevada-Oregon line. It's projected to produce 1,000 jobs during construction and 300 once completed, generating \$75 million in state and local tax revenue over a decade.

The bureau issued a final environmental impact statement and record of decision approving the mine in December, subject to additional permitting at the state level.

In addition to robbing Bartell Ranch of its grazing and water rights in the high desert, the lawsuit said the project threatens trout habitat that Bartell Ranch "has gone to great lengths to protect."

A Nevada rancher is suing the federal government over the approval of a lithium mine just south of the Oregon border.

Among other things, Bartell has moved cattle away from fish habitat, altered grazing rotations and built fences to protect streams.

The agency's refusal to consult with the Fish and Wildlife Service to determine whether the mine could harm trout is a violation of the Endangered Species Act, the lawsuit said.

Bartell Ranch was held to a higher standard when it joined with the bureau and the Fish and Wildlife Service to con-

struct about 3,000 feet of fence in 2017 to keep cattle out of a creek with threatened

trout. But when Bartell's lawyers pressed the agency to explain why it didn't consult with the Fish and Wildlife Service about the much larger mining project, the lawsuit says its only response was that effects on trout "are not anticipated to occur from the project, therefore, no formal ... consultation was required."

Stocks end mostly lower, led by drops in tech

BY DAMIAN J. TROISE

AND ALEX VEIGA The Associated Press

Stocks mostly pulled back from recent highs Wednesday, weighed down by a slide in technology companies.

The S&P 500 slipped less than 0.1% after giving up an early gain, while the techheavy Nasdaq composite gave back 0.6%. Small-company stocks also fell.

The Dow Jones Industrial Average inched higher, good enough for its second straight all-time high. The modest pickup was due in large part to gains in Verizon Communications and Chevron, which

climbed after Warren Buffett's Berkshire Hathaway said it made major new investments in them in the second half of last year.

Treasury yields, which have been climbing recently on expectations of higher inflation,

mostly fell. The yield on the 10-year Treasury note held near its

highest level in a year. Energy prices rose again, adding to a sharp increase the day before due to the frigid weather that's impacted much of the U.S.

The S&P 500 dipped 1.26 points to 3,931.33. The benchmark index's winners and losers were roughly evenly split. The Dow added 90.27 points, or 0.3%, to 31,613.02. The Nasdaq fell 82 points to 13,965.49. The Russell 2000 index of smaller companies lost 16.78 points,

or 0.7%, to 2,256.11. Optimism that Washington will come through on trillions of dollars of more aid for the economy and encouraging company earnings reports have helped stocks grind higher this month, along with hopes that the coronavirus vaccine rollout will set the stage for stronger economic growth in the second half of this year.

Intel

Continued from A11

In the 2016 layoffs, workers over age 40 were more than twice as likely to lose their jobs as younger workers. Those over 60 were eight times more likely to be laid off

than those under 30. The EEOC document indicates only one of the eight cases of alleged age discrimination involved an Oregon employee. Intel is the state's largest corporate employer, with 21,000 people working at its Washington County campuses.

The EEOC has repeatedly declined to explain why it has taken several years to investigate

the allegations against Intel. However, advocates for older workers say the drawnout process reflects a chronic failure to investigate and enforce age discrimination in the workplace. They say the commission lacks funding to properly investigate allegations, and that federal law requires a higher standard of proof for age discrimination than discrimination against other protected classes.

Congress and the Oregon Legislature have each considered stronger protections in the past few years, but neither has acted. However, U.S. Rep. Suzanne Bonamici, D-Beaverton, said Tuesday she is optimistic a bill that passed in the Democratic House last year will fare better in the Senate now that Democrats control that chamber, too.

"Age discrimination is still too prevalent in the workplace," Bonamici said in a written statement. "My office has been working closely with people who have filed age discrimination complaints, but the burden and outcomes are often very uncertain."
