## Lending

**Continued from A11**

First rolled out in the earliest days of the coronavirus pandemic and renewed in December, the program was meant to help keep Americans employed during the economic downturn. It allows small and mid-size businesses suffering loss of revenue to access federal loans, which are forgivable if 60% of the loan is spent on payroll and the balance on other qualified expenses.

The Biden effort is aimed at correcting

disparities in how the program was administered by the Trump administration.

Data from the Paycheck Protection Program released Dec. 1 and analyzed by The Associated Press show that many minority owners desperate for a relief loan didn't receive one until the PPP's last few weeks while many more white business owners were able to get loans earlier in the program.

The program, which began April 3 and ended Aug. 8 and handed out 5.2 million loans worth \$525 billion, helped many businesses stay afloat when government

measures to control the coronavirus forced many to shut down or operate at a diminished capacity.

The latest PPP, which began Jan. 11 and runs through the end of March, has already paid out \$133.5 billion in loans — about half of the \$284 billion allocated by Congress — with an average loan under \$74,000.

A further renewal of the program is not included in Biden's \$1.9 trillion "American Rescue Plan," which he hopes Congress will pass in the coming weeks.

## Remote

**Continued from A11**

Extended-stay discounts, the reopening of certain international borders, and better awareness on the precautions to take when traveling have further enabled a second-wave exodus. While socially isolating in a five-star resort may have been a novelty at the beginning of the pandemic, it's now a need for a certain class of consumer.

"By October, people started to realize they'd be facing another winter in San Francisco with no restaurants, no entertainment, no offices—really nowhere to go. They wanted out," says Leigh Rowan, founder of Bay Area-based Savanti Travel, whose clients are buying one-way tickets and working remotely from beachfront villas or amenity-laden hotels.

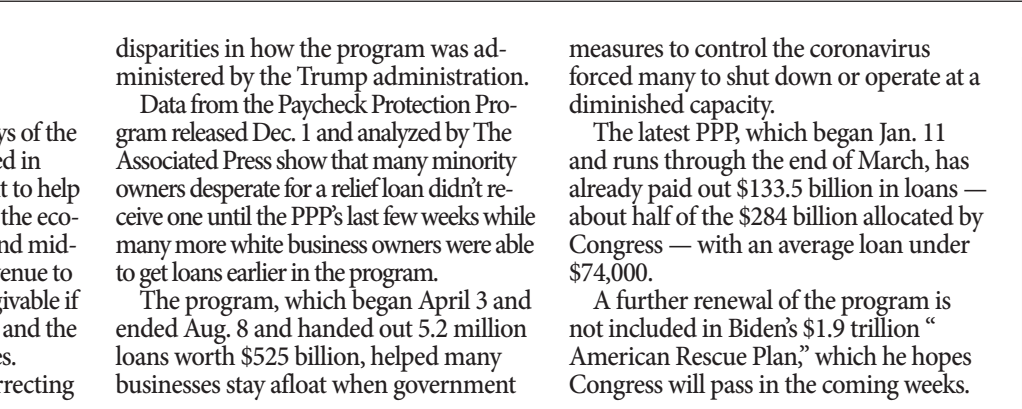

This time, he says, they're not coming back until there's promise of a vaccine appointment.

**Indefinite checkout, please**

Melanie Woods, a 39-year-old graphic designer, left San Francisco well before there was word of a winter lockdown. Since Oct. 1—the day Belize reopened its borders—she's been working out of director Francis Ford Coppola's rustic-luxe Turtle Inn resort, where her desk is by a window with a sea breeze.

"I swim for exercise between calls. On weekends, I feel like I'm on vacation. I can snorkel, zipline, swim," she says.

Belize requires travelers to have a negative COVID-19 test upon arrival, which gave Woods peace of mind. The

Some see this Kaiholo residence at Timbers Kauai as a welcome respite from the pandemic.

27-room hotel, located on beachfront in Placencia, is also almost entirely open-air, making it easy to eat and socialize in distanced, outdoor settings. Rooms start at \$329 a night, but extended stays reap 20% discounts on both accommodations and food; Woods is renting out her apartment back home to offset the expense.

"I probably won't return until summer, or when I can get a vaccine," she says.

**Improved creativity and productivity**

Jetting off to a sandy paradise isn't just a lifestyle play. Travel adviser Rowan says many of his clients can actually do their jobs better in a different setting.

"Many creatives, startups
