

Take Action!

Grab a ruler and draw a square with each side 30 cm or one foot long.

Measure your desk or tabletop. How many 30 square centimeters can you fit onto this?

How many worms would you need to eat all of the plastic bags that would fit on your desk or tabletop?

Measure It!

Get a ruler and start measuring parts of the newspaper in inches and centimeters.

Width of one page of the newspaper:

_____ inches

_____ centimeters

The height of the largest photo in the newspaper:

_____ inches

_____ centimeters

The length of the longest headline on the front page:

_____ inches

_____ centimeters

The width of your favorite comic strip:

_____ inches

_____ centimeters

The length of an ad in the newspaper:

_____ inches

_____ centimeters

KID SCOOP'S MISSION

Children are born curious.

From their earliest days, sensory exploration brings delight and wonder. New discoveries expand their minds. When they unlock the joy of reading, their world widens further.

Magic happens.

Kid Scoop opens the doors of discovery for elementary school children by providing interactive, engaging and relevant age-appropriate materials designed to awaken the magic of reading at school, at home, and throughout their lives.

Kid Scoop VOCABULARY BUILDERS

This week's word: **TOXIC**

The adjective **toxic** means poisonous or harmful.

Plastic becomes **toxic** waste in the ocean.

Try to use the word **toxic** in a sentence today when talking with your friends and family members.

PLASTIC-EATING WORMS

Worldwide, people are trying to figure out how to make and use less plastic, but wouldn't it be great if we could get rid of the plastic trash that is already here?

A Discovery in Spain

A Spanish biologist, Frederica Bertocchini, was _____ bees. When she cleaned out her beehives, she made a remarkable discovery.

She found waxworms in the _____. That wasn't unusual because waxworms, which are the larvae of wax moths, like to eat the _____ and the wax. This can destroy a beehive but might be good for the _____.

When Bertocchini took out the waxworms from the beehives, she put them into a plastic _____. Later, when she checked the bag, she _____ the worms had eaten _____ in it.

Could these _____ plastic-eating worms help scientists _____ the world's growing plastic waste crisis?

Uh oh! Hungry waxworms have chewed through some of the words in this article. Can you replace the missing words?

LITTLE DISCOVERED

Find the bee that's different!

How many waxworms can you find on this page?

Worms that eat plastic?

Plastic pollution is a big problem. Scientists believe there are more than 5 TRILLION pieces of plastic in the Earth's oceans alone.

How much is 5 trillion? One research study estimated that the 5.25 trillion pieces of plastic floating in our oceans would be enough to stretch to the moon and back twice.

How much does all this plastic weigh? Circle every other letter to discover the shocking answer!

THE COMBINED WEIGHT OF PLASTIC WASTE IN THE OCEAN IS GREATER THAN THAT OF:

E T B H C I L R V T W Y J E S I N G Q H N T R T
F H G O A U T S Z A B N P D L A C F G R H I L
C L A D N L E V L W E C P A H U A I N V T A S

T _____

Hungry Little Helpers

Scientists have been feeding caterpillars called waxworms the kind of plastics used in shopping bags. They discovered that just 60 little worms can eat more than 30 square centimeters (1 square foot) in a week.

Scientists think that large numbers of these hungry worms could be put to work to eat plastic waste.

In just days, they could eat what would otherwise take hundreds of years to decompose (rot), helping solve Earth's big plastic pollution problem.

One Problem

There is a lot of interest in using lots of worms to eat the tons and tons of plastic waste in the world. But there is one problem slowing this down. Worm poop!

Unfortunately, when wax worms eat plastic, their poop becomes toxic or poisonous. Scientists are working hard to solve this problem. If you grow up to become a scientist, maybe you could solve it!

Help this waxworm find the plastic bag.

Extra! Extra! Headline Mix Up

Cut out 10 words from different headlines throughout the newspaper. Create a story using one clipped word per sentence. Share your story with someone.
