WORLD BRIEFING

White House, Kremlin plan first summit for Biden, Putin in Geneva in June

Low

Moderate

Source: USDA Forest Service

The White House and the Kremlin are working to arrange a summit next month between President Joe Biden and Russian President Vladimir Putin in Switzerland, according to officials.

National security adviser Jake Sullivan is meeting with his Russian counterpart in Geneva, the proposed host city, this week to finalize details, according to one U.S. official familiar with the preliminary planning but not authorized to discuss the deliberations publicly. Geneva is now expected to be the choice for Biden's first face-toface meeting with Putin as president, according to a second official.

Belarus plane 'hijacking' roils Europe

As Western anger continues to grow, European Union leaders on Monday agreed on a set of sanctions against Belarus, including a ban on the use of the 27-nation bloc's airspace and air ports amid fury over the forced diversion of a passenger jet flying between two EU countries in order to arrest an opposition journalist.

In what EU leaders have called a brazen "hijacking" of Irish carrier Ryanair's plane flying from Greece to Lithuania on Sunday, they demanded the immediate release of Raman Pratasevich, a key foe of authoritarian Belarusian President Alexander Lukashenko.

Ryanair said Belarusian flight controllers said there was a bomb threat against the plane as it was crossing through Belarus airspace on Sunday and dered it to land. A Belarusian fighter jet e the plane in a brazen show of force by Lukashenko, who has been in power for over 25 years.

"Having a low-barrier shelter in Bend is an important step towards our Council goal to find 500 beds for our neighbors experiencing homelessness," said Bend City Councilor Megan Perkins in a written state-

67/45/0.04 65/46/t

65/49/pc

The city and the non profit NeighborImpact are funding the shelter with state and federal funds each organization has received

for this service, according to the city.

Both will contribute at least \$300,000 from federal COVID-19 relief funds received last year.

The Emergency Homelessness Task Force, which has been formed between the city and Deschutes County, will explore how to fund the shelter long term.

Roadwork

Continued from A1

Another significant closure is at the intersection of Purcell Boulevard and Butler Market Road. This month, the city closed the intersection to replace what was supposed to be a temporary signal light that lasted 20 years with a roundabout, Oster said. Construction is anticipated to be complete in September, he said.

Construction also continues on Newport Avenue to fix a failing storm drain system.

Oster said he appreciates people's patience as the city faces multiple construction related closures.

"We'll get through this together," he said.

Parade

Continued from A1

"If we would have been able to foresee that the risk levels would drop as quickly as they did, we may have been able to anticipate having the event. However, the governor's change in the risk framework and the drop in risk level came as a surprise to everyone," he added.

Deschutes County dropped to the "lower" risk level for the spread of COVID-19 on Friday after reaching a 65% vaccination rate.

The Pet Parade is an Oregon Heritage Event dating back to 1932. Before the current pandemic's back-to-back cancellations, the only other year the parade did not take place was 1943, during World War II.

La Pine

Continued from A1

Plans for a graduation ceremony that day, which is expected to be held in-person and outdoors at the school's football stadium, are not expected to change, Schmidt said.

All three major Bend high schools — Bend, Mountain View and Summit — have had slightly more COVID-19 cases in the past 28 days than La Pine High, according to Bend-La Pine Schools data.

However, 15 cases means a lot more at La Pine, which is significantly smaller than the major Bend high schools. At about 400 students, it has less than a quarter of Bend High's 1,600-plus student population.

"It's a high number for a small community,"

Schmidt said.

No other building in Bend-La Pine Schools is under immediate threat of going back to distance learning right now due to COVID-19, said Julianne Repman, the district's director of safety and communication.

During the return to distance learning, the La Pine Hawks athletic teams cannot compete. Aaron Flack, athletic director for the school, did not respond when asked for comment.

This outbreak comes a few weeks after Bend-La Pine started hosting voluntary COVID-19 vaccination clinics for students inside its high schools. But La Pine students were much less interested in getting the shot.

When La Pine High hosted its first vaccine clinic May 6, only 27 students received a vaccine dose. Meanwhile, hundreds of students were vaccinated at each clinic held at the three major

Bend high schools at that time. However, all these school-based clinics — including the one at La Pine High — were also available to students from nearby, smaller public

and magnet schools and homeschooled teens. The overall vaccination rate in the La Pinearea ZIP code is fairly low, at 42.5%, according to the Oregon Health Authority. In comparison, the vaccination rate is 62.1% for north and west Bend, 56.6% for east Bend, 46.9% for Redmond, 71.1% for Sunriver and 65.6% for Sisters. The statewide vaccination rate is over 50%.

Oliver Tatom — who oversees the nurses and medical assistants at St. Charles Family Care and Immediate Care in La Pine — said the number of COVID-19 cases detected at his clinic have skyrocketed recently. In April, the clinic saw a new monthly high of 47 cases, and in May so far, there's already been 99, he said.

"Given the prevalence of COVID in the south county community, it's not surprising to me there have been so many exposures and quarantines that the high school has had to transition to distance learning," Tatom said.

Tatom believes the high cases in the La Pine

area are due to a number of factors. One reason is the low vaccination rate, but he also noted that because of the region's rural nature, COVID-19 hadn't had a major outbreak in the region yet. So when Oregon and federal authorities recently began loosening COVID-19 restrictions, it made it easier for the virus to

spread in south Deschutes County, he said. "People are doing more indoor gatherings without masks, and we have not gotten anywhere close to herd immunity with our vaccina-

tion rate," Tatom said. Schmidt said she was unsure whether the COVID-19 cases at La Pine High School were

due to the high case counts in the community, or spread within the school. "I do know the numbers are up in La Pine in

general, and that has trickled into the school," she said. "But we have other schools too, so it's interesting that it's just the high school."

The four other south county schools all have logged fewer than five cases in the past 28 days. Reporter: 541-617-7854, jhogan@bendbulletin.com
