Flight of the Monarch

Replace the missing words. **SOUTH KINGDOM RETURN GOLD ONCE PLANTS**

An Amazing Migration Tale

While quite small, the beautiful _____ and black monarch butterfly makes one of the longest migrations in the animal _____.

Monarch butterflies live in Canada and Northern United States in the spring and summer. Every fall, when the weather turns _____, millions of monarch butterflies begin flying _____ to Southern California and Central Mexico.

We fly more than 2,000 miles (3,000 kilometers) one way!

The butterflies _____ to the same forests each year, and some even find the same tree where their parents and grandparents wintered.

Scientists aren't sure how the monarchs know where to go _____ each year, since they each only make the trip _____.

The butterflies mate in the winter. The male then dies and the female heads back north, laying eggs on milkweed _____ along the way. The females all die before the next fall migration begins.

Draw and color this monarch's other wing.

How many butterflies can you find on this page?

In the fall, thousands of monarch butterflies clinging to trees blend in perfectly with autumn leaves, keeping them safe from predators.

We fly south each autumn and north each spring!

Monarch Copy Cat

The monarch butterfly is poisonous and birds recognize their orange and black wings and avoid them. The viceroy butterfly is a tasty snack for birds. It protects itself by looking almost exactly like a monarch butterfly. It **mimics** the monarch.

Look at the monarch and the viceroy butterflies. Can you tell which is which?

Label each butterfly with the proper name.

HINT: The viceroy has an extra black stripe on its lower wings.
